SATURDAY, JUNE 16, 1883.

ABOUT THE STATE.

The whole insurance on the steamer Granite State—\$40,000—has been paid, and the wreck will probably be sold at auction soon.

A New York woman visiting at Squantum has been stung into unconsciousness by a swarm of bees, and her life is in danger. The physicians say there were over 1000 stings.

Asylum street in Hartford is excited because two residents have run a fence between their parts of a private park, which, by the deeds, was to be unfenced. The city attorney had the fence taken down.

The state papers are giving columns to canker worms and remedies for them. New Haven, Wallingford and Lebanon are among the places seriously afflicted. Fruit trees and elms are stripped bare, turning firm; bright red and then gray.

One of the Hazard powder company's wheel mills at the lower works in Hazardville exploded early Tuesday morning, but no lives were lost. The lightning struck a tree Monday very near the magazine, where several tons of powder were stored.

Two negro ministers have got by the ears at Norwich. Rev. Smith has been pastor of a Methodist church six years, being appointed by the local elder. Rev. Hale comes from Boston with missionary credentials. He failed to get possession of the church and so slandered Smith by calling him a "clergyman" and Smith sued for \$1000 for defamation of character. Hale has found bail, and the men are fighting for possession of the church.

In consequence of two or three cases of varioloid or small-pox in Windsor Locks the first selectman, J. B. Montgomery, has had a pest house built at the north end of the town in the region known as Spudville. Some people who live in the section, although not near the building have worked up a feeling of indignation and threatened to burn the house. At present no cases has been placed in the house. One child has the disease, caught, it is believed from a case of varioloid, but it is quarantined with its parents.

The Episcopalians celebrated the anniversary of the election of Samuel Seabury, their first bishop, by 10 clergymen at Woodbury in 1783, in their diocesan convention, and Rev. Haven Tuesday. Bishop Williams preached the memorial sermon, Rev. D. Seabury, a great-grandson of the first bishop, Rev. George D. Johnson, a great-grandson of one of the first church missionaries in the state, Rev. S. F. Jarvis, grandson of the second convention, and Rev. Thomas B. Frogg, grandson of one of the 10 ministers elected Bishop Seabury, took part in the service. About 800 delegates attended.

The Northern Pacific Railroad is within 140 miles of its Oregon connection, and is building at the rate of three miles per day.

Tornadoes continue to tear things in the West. Beloit, Wisconsin, and Elmo in Illinois, near the border of the former state, were the sufferers this week.

The United States government has paid the sum of \$785,000.87 to Japan, the same being the fund known as the "Japanese indemnity," which was extorted from that country by England, Germany and the United States after the Simonski outbreak. The other parties involved have retained the money, despite the now acknowledged fact that Japan was not responsible for the offence.

Prof. Wm. H. Brewer of the Yale Scientific school, considers "the American trotting horse a special product of the highest civilization the world has yet seen." The professor says that it took from the year 2200 B.C. to the present century to produce a three-minute horse, and further declares that the moment a nation's horses decline the glory of that nation will wane. However, Prof. Brewer need have no uneasy feelings in regard to the present generation. Maud S. is still able to do the mile in 2:10.

The steamship Belgavia arrived at New York on Monday, with 780 emigrants in her steerage, whose fares had been paid by the British government. Similar loads of penniless foreigners are being shipped by the Crown to other points in the United States, and with the exception of the action of Governor Butler of Massachusetts, no effort has been made to check this influx of "assisted" tourists. It is a significant fact that most of the Belgavia's load were destined to points in New England. The English government agents allege that there is a call for them in manufacturing towns.

NORTH MANCHESTER.

CHURCH DIRECTORY.  
NORTH M. E. CHURCH, Rev. H. R. Martin, pastor. Sunday school at 10 o'clock; prayer and praise service at 7 p.m. Prayer meeting on Tuesday evening at 7:30.

Mr. Dale is making a popular station agent at Putnam.

Mr. and Mrs. R. P. Bissell arrived from Boston last Wednesday evening.

The Burns club and ladies will picnic in the Centre grove on the Fourth.

Levi Drake and family are rusticated at Norfolk, in the western part of the State.

Flower thieves are at work in the village. Lawns not surrounded with fences are easily accessible to these plunderers.

Judge Campbell, who has just returned from northern Maine, says the season there is three weeks behind ours and the hay crop is larger than before in years.

The Wells Backland estate was mortgaged and encumbered for about \$7000, and at the auction last Saturday, C. W. Cowles paid one dollar for the right of redemption.

P. McFarlane is making a uniform for a new ball nine lately organized at the Green. The nine is composed of Manchester and Bolton players, and call themselves the "Stockinets."

A. R. Franklin sent to the Herald office last week, an egg, the diameters of which were a trifle less than two and three inches. It was laid by a Plymouth Rock fowl, and when cooked made a hearty and palatable dish.

Stone has decided that good help is the cheapest, and to demonstrate his convictions together with increase of business for various reasons has advanced the pay of his men since spring contracts, 25 cents a day. "Who can say it is not a mutual benefit?"

The marriage of Mr. Alon Stevey of New London, and Miss May Spencer, occurred Wednesday in South Bend, Indiana. The ceremony was performed at the residence of Miss Spencer's sister, Mrs. F. A. Burdett. Miss Spencer has made friends here during her visits to the family of G. S. Parkhurst.

Mr. Curtis, the local engineer for the New York & New England road, expected to begin the new survey to Andover, from beyond Burnside, this week, but received word from Chief Engineer Bidwell that his services were imperatively demanded just now at Ally's Point on the Norwich and Worcester division where improvements are in progress. This order will delay the new survey three or four weeks.

BURNSIDE.—Our correspondent was in error in calling J. F. Miner the postmaster. Mr. M. Chandler is still postmaster although the business of the office is managed chiefly by Mr. Miner.—Mr. Chandler has much sympathy in the loss of his son, a blow which bears hard upon him in his declining years.—Miss Alice Ventres, of Haddam, is visiting Rev. Mr. and Mrs. Luce for a few days.

The driver of engine 71, of the New York and New England road, has a dog which accompanies him on his trips. The animal will stand by the hour on the floor of the cab, with his fore-feet within two inches of the edge and gaze placidly at the flying landscape without the slightest show of nervousness. It matters not how severely the locomotive may lurch sideways, the dog never loses his footing.

Here it is again: "Orlens have been issued by the general manager of the New York & New England road, for engineers to avoid all superfluous whistling while moving trains about the yard and through Willimantic on Sundays." From this we infer that on week days, in Willimantic and on all other sections of the road, engineers can do all the superfluous whistling they desire. On all well regulated roads the engineer is not allowed to use his locomotive whistle as a plaything, but this order, strengthened by our experience at North Manchester, proves that the New England road does not come in this class.

KILLED BY THE NOON EXPRESS.—The new timetable has begun to work smoothly so that the noon express does not have to stop at the Manchester station for orders but goes through the village at a tearing rate. Last Wednesday noon a party of Italian laborers were at work loading rails on the main line a few rods west of the depot. A freight train stood on each side of the main line and as the express came along, the men found that they must stand in the narrow space between the trains. This some of them feared to do and started for a place of safety beyond the caboose of one of the freights. They miscalculated the speed of the express and two of them were caught while running across the track. One was killed instantly, the engine having cut off one arm and fractured his skull. The other was badly injured. The train did not stop nor slacken speed. Dr.

Whiton examined the injured man and found that the engine had struck the back of his right shoulder, breaking the shoulder blade and several ribs. He had been hurled to the ground and the fall broke his jawbone. The work train took the dead and injured men to Hartford where the latter was borne to the hospital. His recovery is probable. No coroner's inquest was thought necessary as the cause of death was evident. No one appears to blame for the accident but the victims themselves.

BUCKLAND.—Walter W. Cowles is assisting Mr. Ewing of Kentucky, in purchasing stock to be shipped to the South. Several car-loads were purchased some time since for the same state.

The examination of the Buckland schools will take place on Thursday afternoon, June 21st. Parents and friends are cordially invited to be present.

Annie Belle, daughter of Charles McCleary, was married in Mapleville, R. T., May 31st, to John Jeffers of Mapleville.

John P. Williams is now supplying the Clark Bros. with the nicest kind of strawberries, which they are selling at a reasonable price.

The youngest child of George Rusley, was buried on Monday of this week.

Mrs. E. H. Owen of Hartford has been spending several days with her son, C. H. Owen.

WAPPING.

SOME PARTICULARS OF THE CREAMERY ENTERPRISE.—BEGINNING WORK.

The creamery enterprise in this place has excited considerable interest here, and also in adjoining towns. A description of it may now be in order as the creamery is about ready to commence operations. More than a year ago, much interest was raised in this place by the agitation of a creamery project on the milk gathering plan in Manchester. As the project failed, the people here the most interested favored starting a creamery on the cream gathering plan, this being the way adopted by all the newer creameries. A stock company was formed with a capital of three thousand dollars, and a location fixed upon and plans made at once for building. The land was given by Norman Thrall. The building is 45 ft. long by 24 ft. wide, two stories high with engine house attached, 17 ft. by 22 ft. The lower story, 11 feet high, is of the best brick, furnished by Sidney C. Stoughton. It is divided into a butter manufacturing room, cream tempering room and butter storage room, and engine room, office and coal bin. The floors are of cement, the walls plastered and ceiling overhead, thus forming durable, clean, nice rooms for the purpose of their use. The mason work was done by the Grant Brothers who have excelled themselves in doing this work. The upper story is of wood 8 feet high and will be used for water tanks and a storage room. The work was done by B. H. Grant by contract, he furnishing materials, and has been done promptly and well to the satisfaction of all concerned. A four-horse power Baxter engine will furnish the power and steam for heating. The shafting and steam connections were placed by Mr. Barker of Colt's Fire Arms Co. The cream vats and churns and cream gathering cans were furnished by the Vermont Farm Machine Co., Bellows Falls, Vt. One of the best springs of water in this section is situated at an elevation of 75 feet from the building, furnishing the purest and coolest water for use in making butter. The Cooley system of setting milk will be used by the patrons; this system ensures the best quality of cream. The milk being submerged and kept at a right temperature, no bad cream can be made. The undertaking has been presented harmoniously, and it is believed thoroughly and with a desire for the best success of the enterprise. What is unusual in an enterprise of this kind, the whole expense of building and fitting out, will come within the capital. The directors of the Association are Oliver Clark, Charles A. Jones, H. C. Hayes, Roswell Grant, H. W. Sudd; president and manager, H. W. Sudd, secretary and treasurer, Henry Grant. The butter maker is Geo. S. Hicks, a graduate of Farmington Creamery. Two cream gatherers only, will be employed at the start, Geo. A. Smith and Chas. Lyman. Cream will be collected Monday the 18th inst., for the first time. It is believed that the establishment of this creamery is in the line of progress toward the way that dairy products will be handled in the future, and also that it will relieve the housewife of a routine work, which amounts almost to drudgery, and that there will be a demand for all our products at good prices.

J. A. Collins picked peas from his vine, June 9th, eight days earlier than last year, although this is called a late season. Your correspondent was kindly remembered by Mr. Collins, in his first pickings.

Hawley & Co. of Danbury have failed for \$18,000.

THE WOMAN'S TEMPERANCE CONVENTION.

The Semi-Annual Convention of the Woman's Christian Temperance Union of Connecticut, was held in the Congregational Church, Wednesday, June 13. Delegates from all parts of the state began to arrive on Tuesday and continued to come on each train until Wednesday noon.

Tuesday evening a reception was given in the Second Church parlors, by the ladies of the Rockville Union to the delegates already arrived.

The convention proper began Wednesday morning at 8 o'clock by a devotional meeting, conducted by Mrs. Wheeler of Winsted. At 10 o'clock Mrs. Treadwell, the State President, called the meeting to order and Mrs. Rev. S. B. Forbes, the President of the Rockville Union, gave an address of welcome which was responded to by Mrs. Moody of Plainville. Reports then followed from various local Unions and State Superintendents. Mr. J. N. Stickney was called upon, who extended an invitation from Mr. Belding of Belding Bros. Silk Manufacturing, to the ladies of the convention to visit his mills. The invitation was accepted with thanks. At twelve o'clock the meeting was adjourned and the delegates were invited to the lecture room below where a collation was served to over seventy ladies.

THE AFTERNOON SESSION was opened by a devotional meeting at 2 o'clock Mrs. Treadwell called the meeting to order and Mrs. L. H. Washington, formerly of Iowa, now of Essex, Ct., was introduced and gave a most interesting address on organization. Following her, Mrs. Mary H. Hunt, National Superintendent of Scientific Temperance Instruction, gave a short but telling address.

The question of Compulsory Scientific Temperance Instruction was then taken up and the pros and cons most earnestly discussed, and a motion was made and carried to take up the work of organizing the subject, all over the state through systematic organization.

A rising vote of thanks was given to the ladies of the Convention, and the meeting was adjourned at 4 o'clock, and the ladies at once moved in a body to visit the silk mill. At 6 o'clock p. m. a meeting was again served in the lecture room. The leading feature of the Convention was the address in the evening by Mrs. Hunt of Boston, who was seconded by Mrs. Emily McLaughlin, who was unable to be present. Mrs. Hunt considered the subject from a scientific and scientific standpoint, which is her special province, under the direction of the National Union. She called this phase of the subject a new idea and offered the great difficulties of introducing new ideas. The principle upon which she is operating is that the new ideas of the generation must be educated upon the effects alcohol and narcotics have upon the system. The effects of these upon the physical system are not only of the present generation—but that the effects are transmitted as well to future generations were depicted in rather appalling words.

The homes of Rockville were thrown open to receive the delegates, and some of the ladies were received in their homes and entertained. The delegates departed Thursday morning, having enjoyed the Convention in our homes, and about our beautiful village.

TOLLAND.

The Methodist church has been the scene of their church services, and the Sunday-school concerts which Mrs. Crafts, wife of the pastor, who is so well known in our midst, has arranged for next Sunday evening.

L. S. Brown, former pastor of the Baptist church, who has been engaged to preach the ensuing year.

BROAD BROOK.

Quite a heavy shower visited this village last Sunday evening. On Sunday there was considerable thunder and lightning, the lightning striking one of the houses in the village, and the Semple's house. Mr. George Hogenobler received quite a shock from the lightning Sunday evening.

The strawberry season will soon be upon us, and strawberry festivals the order of the day. From present appearance the crop will be somewhat later than usual.

Last week was the hottest one of the season as yet. One of our little boys, as well as weeds have suddenly developed a rapid growth.

QUARRYVILLE.

Mr. Dwight Rose of Unionville, Ct., spent the Sabbath with his family in this place. The Ladies' Aid society of the M. E. Church was organized on Thursday of last week.

A few of the elderly ladies of this place recently convened at the parsonage so-called, whose united ages amounted to 488 years.

Letters recently received from John P. Keeney and sons, formerly of this place, but now of California, convey items of interest in this vicinity. They are engaged in mining.

Mr. C. Hodgson of the firm of Hodgson Bros. of Stamford Springs, spent last Sabbath with friends here.

The partial taking away of that old elm tree situated on the corner of the Church on land of C. Carver improves the sight indeed, and yet a good ax and steady arm to wield it in well directed blows at the remaining portion will add more improve it.

Mr. J. K. Thompson has refitted his sail boat and launched the same upon the lake. It is a fine water craft.

Miss Hattie Barrows is visiting friends in Springfield, Mass.

STAFFORD SPRINGS.

The father of the girl who died at the American house last week, probably from abortion, went to Stafford Saturday, and it is now believed that Pierce was not her husband. Pierce came back to the Springs Friday, and a sheriff arrived in the morning after a \$800 mortgage on the carriage which Pierce had sold. The matter was finally settled and Pierce again disappeared. Some surprise is felt that the grand juror and selectmen did not investigate the matter more thoroughly.

Reviser Bros. are going to build an 80-foot addition to their river woolen mill, which will make it nine sets. They are unable to fill their orders for blankets, but the grand juror and selectmen did not investigate the matter more thoroughly.

Reviser Bros. are going to build an 80-foot addition to their river woolen mill, which will make it nine sets. They are unable to fill their orders for blankets, but the grand juror and selectmen did not investigate the matter more thoroughly.

Reviser Bros. are going to build an 80-foot addition to their river woolen mill, which will make it nine sets. They are unable to fill their orders for blankets, but the grand juror and selectmen did not investigate the matter more thoroughly.

1864. Though not directly connected with the series of War Histories just completed, it forms a connecting link between the account of the battle of Gettysburg and that of the operations in Virginia in 1864. General Humphreys throws new light on this period which hitherto has never been satisfactorily described. He gives a clear and interesting account of Lee's retreat from Pennsylvania, the pursuit of Meade, and the various strategic operations which followed. The monograph will be well illustrated by maps prepared under the author's direction.

The Manhattan, the new literary magazine has with on stride taken a position at the head of popular literary magazines. The Century, or what used to be Scribner's Monthly formerly occupied the place but of late this magazine has been devoting too large a space to art matters to suit the popular taste. The Manhattan differs from the Century in that its illustrations explain the reading matter while the Century's reading matter is largely written to explain the illustrations, Manhattan is handsomely printed and already has a large sale.

ROCKVILLE.

Judge Loomis is holding a protracted term of Superior court at New Haven.

Snipe last week, 22 feet; today 22 feet 4 inches.

The German Turners have leased Grover's grove for the season.

The season of Sunday School excursions approaches, and several are on the tapis.

The Ashford Baptist Association held its annual Sunday School Convention at Tolland, on Thursday last.

The basement of the silk mill is to be better lighted by the setting out of the bank wall next the street.

No deaths in Rockville, and no interments by Rockville undertakers during the past week. Quite unusual.

Mr. Fred. Howe, formerly cashier of the Rockville National bank, now of Springfield, has been the guest of Chas. Phelps, Esq.

The Market street billiard saloons lost valuable billiard balls at the hands of the circus people it is suspected. One of our exchanges rightly called it a "two-paw" affair.

The servant girl of Mrs. F. Keeney fell from a step ladder on Wednesday, striking a stove in her descent. The result was a severe flesh wound which Dr. E. A. Wilson dressed.

The Orcutt buildings on Main street, are being repaired and renovated in a thorough manner. Rear platforms are renewed, dangerous verandas are being removed, and fronts painted and grained.

The Cogswell fountain about being shipped to Rockville from Bridgeport, is understood to be the first of sixteen ordered. Those who have seen it express great admiration for its beauty of design and finish. It will prove a very great ornament to this village, and a blessing to many.

It is said the lightning struck a tree near the old Cogswell place, Prospect street, on Wednesday. During the same shower, the wind demolished the large maple tree, some two feet in diameter, opposite the residence of N. R. Grant, Esq. West street, breaking it short off about twelve feet from the ground.

A number of the Broad Brook brethren visited Fayette Lodge on Wednesday evening and witnessed the work of the third degree. At the close of the meeting refreshments were served in the hall adjoining. This lodge is in good healthy financial condition. Three dozen comfortable arm chairs have been added to the lodge furnishings.

The drum and fife corps made a call in uniform upon their newly married associate, on Wednesday evening, who had just arrived home with his bride. Mr. Badington of course invited the boys in, introduced them to gain an entrance to the premises. The family was aroused, and the attempt was frustrated. The same night a second attempt was made upon the house of David Eaton, on Mountain street, but Mr. E. frightened them away. The burglary of the Ellington post office occurring a night or two after, may have been perpetrated by the same party. If this business is to be continued householders had best place their revolvers very handy, then shoot first and inquire afterwards.

The Supreme Lodge K. of H. lately convened in Galveston, Texas, made several changes in the laws and constitutions. One prominent change was a law allowing the admission of applicants between the ages of eighteen and fifty. The youngest age heretofore has been twenty-one.

The heats of summer, arriving so suddenly and so severely, have evidently increased our quota of thunder showers both in number and severity, as compared with last year. That of Wednesday noon was a smart one.

WATKINS BROS., FURNISHING UNDERTAKERS, So. Manchester.

Warr. In Bolton, June 7, a son to Mrs. James Melville.

Married. In Plainville, June 6, by the Rev. E. S. Towse, Robert F. Bissell of North Manchester, and Miss Elizabeth M. Hill of Plainville.

In East Hartford, June 12, Antoinette, wife of Frank G. Comstock, and daughter of the late Timothy Deane, aged 69 years.

In Hartford, June 15, Ella M. wife of Charles K. Crane, and daughter of James A. House of Windsorville, aged 21 years and 6 months.

Bied. In Wapping, June 9, Helena, wife of Galinat aged 25 years.

In Coventry, June 8, Maria L., widow of the late E. H. Hunt, aged 71 years.

In East Hartford, June 12, Antoinette, wife of Frank G. Comstock, and daughter of the late Timothy Deane, aged 69 years.

In Hartford, June 15, Ella M. wife of Charles K. Crane, and daughter of James A. House of Windsorville, aged 21 years and 6 months.
