CANCER. Consumption Conquered! When the Doctors could do no more. CHAS. A. CABRERA, 22 Hawley Street, Boston, Mass., writes: "One year ago I was apparently so far gone with Consumption that my life seemed only a question of days rather than months. With my faith in the ability of physicians to help me all gone, I tried almost every known remedy, with no apparent benefit. Finally, as a last resort, I was induced to try Dr. R. C. Flower's Lung Cordial. The very first dose gave me relief, and with the first bottle I took a new lease of life, and I can honestly say today that one spoonful of this remedy is worth more to the sufferer from Lung troubles than a gallon of any other known remedy. A bottle of it is now one of my choicest possessions, and at the first symptom of a cough or cold I fly to the relief it never fails to give."

United States Hotel. DR. FLOWER'S LUNG CORDIAL is without question the most wonderful Lung remedy ever discovered. It eradicates the germ of CONSUMPTION as no Remedy has ever been known to do. It stands without a rival for Coughs, Colds, Bronchitis, Asthma and Consumption. Price \$1.00 per bottle. A copy of Dr. Flower's Rules for the treatment of Consumption so companies each bottle.

Story of one prophet went to Hartford to attend the hearing before the committee on the bill relating to raising the measure on charcoal from 148 feet to 160 feet. This will make nearly 80 barrels on 100 which will make quite a difference with those who make their business. There are not many who have made new, taking out cost of cutting and burning—allowing 5 cents for 100 barrels which will cost \$5.00 per cord for cutting or \$15 per thousand for burning and 400 for a cord of wood which will make a total of \$48. When burned they will sell for \$50 or \$60 which will leave \$5 or \$10 for drawing, together with cribbing. If they raise the measure on charcoal they will nearly equal to 100 tons of potatoes and grain, which would hardly leave anything for the farmer and coal burner.

Story of one prophet went to Hartford to attend the hearing before the committee on the bill relating to raising the measure on charcoal from 148 feet to 160 feet. This will make nearly 80 barrels on 100 which will make quite a difference with those who make their business. There are not many who have made new, taking out cost of cutting and burning—allowing 5 cents for 100 barrels which will cost \$5.00 per cord for cutting or \$15 per thousand for burning and 400 for a cord of wood which will make a total of \$48. When burned they will sell for \$50 or \$60 which will leave \$5 or \$10 for drawing, together with cribbing. If they raise the measure on charcoal they will nearly equal to 100 tons of potatoes and grain, which would hardly leave anything for the farmer and coal burner.

A beautiful present. The Universalists of Glastonbury, in order to introduce their new and beautiful hymn book, have arranged to present a copy of the book to every member of the church. The book is a beautiful one, and is said to be a very useful one.
