ABOUT TOWN

Rev. J. S. Neil, of St. Mary's Episcopal church, has been in New York for the past two days.

There was a large attendance last evening at the dance given at the Recreation Center.

Dr. and Mrs. Howard Green of Hartford have sold their thirty-five acre farm in Manchester Green known as the Lewis Place to John C. Gove of Oak Grove street.

The "C" parking signs have been placed on Oak, Maple and Birch streets by the Police Department.

The funeral of William McConnell, whose death occurred at the Manchester Memorial hospital Thursday afternoon, will be held from the home of his daughter, Mrs. H. L. Wilson, of Blackwater street, Sunday afternoon at 2:30.

Rev. Richard Patten of the North Congregational church will officiate. The burial will be in the Buckland cemetery.

Fresh Peach Ice Cream, made for us by the New Haven Dairy, 56c a quart, 35c a pint. Edward J. Murphy, Pharmacist, Depot Square, Adv.

Let us bring you up your life. And please your self and loving wife. YOU and your mate have no doubt discussed that the things electrical that you need in your home.

And perhaps you are on the point of investing in a percolator or other cooking device. Perhaps your wife has decided that an electric iron would iron out some of her daily household wrinkles.

Let us give you attention and service.

PERTINENT INFORMATION

Do you always have your gas range oven well heated before using. You should do so for both the baking and broiling ovens.

This method involves no waste of gas, because if food is placed in a cold oven, the cooking will take just as much longer; besides, the result will not be so good.

If the recipe calls for a moderate oven, reduce the flame one-half at the end of ten minutes. For quick oven, keep burners lighted during all or nearly all of the baking.

Also bear in mind that it is better to bake in tin pans instead of sheet iron or agate pans. The iron absorbs the heat and is more liable to burn the contents at the bottom and sides before the baking is done.

You may not have noticed this in using the coal range, but the heat of the gas range is much more intense and direct.

Our new gas holder is beginning to take form. You will be pleased to learn this. Here's hoping it will soon be finished.

CONDITIONS IN ENGLAND MUCH WORSE THAN HERE

Dr. May, Just Returned, Tells What He Found on His Visit Through-Professors Three Also.

Dr. May, a prominent dentist of the town, has recently returned from England where he spent the greater part of the year in the study of eye, nose and throat diseases and has been specializing in the treatment of diseases of these organs.

He has a fine opportunity to come in contact with the people there and has a knowledge of conditions there that the country has passed through and is still passing through in getting back to a pre-war standard as in the United States.

In an interview yesterday he gave a Herald reporter some interesting facts concerning the economic and climatic conditions of England. He said:

"We arrived in England on Dec. 21, 1920. We were immediately impressed by the climatic conditions. It was very dry and it had not rained to speak of in the past few months a very unusual thing for England. The crops suffered tremendously; in fact all vegetation felt the drought.

Among the fruit crops, the apples were abundant but were small and not of good quality. The small fruits suffered exceedingly and were either 50 per cent short of the normal crop or were dried up so that they were practically worthless. This state of conditions is vastly different from the normal season experienced by England or any European country.

Regarding the economic conditions, the coal strike was the cause of most of the trouble. It resulted in the suspension of all manufacturing interests. Since this closing of the manufacturing interests there has been no real revival. The price of coal has not been reduced sufficient to warrant the manufacturers buying it and the people are unable to have bought up large supplies and are storing it along the tracks. I hope that there will be a market for some day. At the present time the coal is of a good grade and can be obtained at a reasonable price compared to the past but it is still higher than what the people feel they ought to pay for it.

As to the housing problem, it is the man who is keeping the price up because he continues to refuse to sell his stock at reduced prices and stand the loss. The labor unions are indispensible to allow the men to return to work at the new wage scale. Yet they will continue to hold out and fight the government although their funds are exhausted and incidentally they have exhausted the funds of the allied labor unions of trades who came to their assistance when the big coal strike was called.

In regard to wage conditions, we thought that some exhibitors during the war but they were nothing in comparison with the wages paid in the average tradesman in England during the war. For an example let us use the housing problem in England. During the war the government undertook the vast project of erecting 250,000 houses in districts all over England. For the sake of comparison let us look at the cost of the construction of one of these average houses before the war. It was large enough to house a man and his wife and several children and it cost about \$750. After the war had been going several years the government let contracts to individual contractors to build houses for them. The cost of these houses to the government was from \$4,000 to \$5,000 each. One may easily see that the English government was forced terribly. The result is that these houses are being sold at less than cost price and eventually will prove a terrible burden on the backs of the English taxpayers.

"Again, here is another example of labor conditions in England. According to the labor unions' curtailment of production, the average brick layer is instructed to lay only 300 bricks per day. A good brick layer, if not restricted, can lay nearly 1,000 per day. Of course this is not fair.

The ancient walls surrounding the city of Canton, China, have been reserved during the last two years, notwithstanding the strong objections of many of the older citizens. It has been a harbor large enough to hold the harbors of Liverpool, London, Rotterdam and Hamburg. Six 1,000 foot piers are about to be constructed and the necessary channels will be dredged to accommodate the largest boats. The piers alone will cost \$75,000,000.

Greenacres a Parklike—restricted Building Lot Development.—Adv.

not face him.

"It is evident that there is general unrest and discontent among the English people. It is the result of mixing labor with Red propaganda. There is a feeling among the radical element that if all productive industry was turned over to the people that the working day would be reduced and that the wages would be higher. They feel that conditions generally will be better. This agitation has resulted in the stopping of many of the common councils of the smaller towns by wage carriers who are out of work, demanding that the councils vote for so much per week for jobs for men and women and their families. In most cases it averages from \$10 to \$15 per week for married men with families. In the town of Woolrich, outside of London, the crowd of unemployed was so great that they stormed the council while it was in session and kept it in the building all night.

The Reds are to blame for most of the unrest but it is the belief of Dr. May that if it comes to a showdown the Reds will be overthrown in the country. Their propaganda is solid but the men who are spreading it are not strong enough to assert themselves openly. As previously noted, the real result of this propaganda has been the exhaustion of the treasuries of the labor unions.

To the passing tourist, England looks prosperous but the people are living on a false prosperity that is not good for the country. It is a case of the workers being taxed to support the unemployed. England is experiencing more difficulties in restoring things to a normal basis than has ever been experienced here. The prices of eggs, meat and butter remain very high and these commodities are scarce but the price of clothing has been reduced but not to the level. It is still about 75 per cent above pre-war levels.

Dr. May told the reporter that he had been in England acquainting himself with the new methods in his profession and that he had enjoyed the trip immensely. He was at Moorhead and Ear Hospital in London which he recognized as one of the greatest of his kind today and several other prominent hospitals. He speculated in the treatment of diseases of the eye, ear, nose and throat.

LEAGUE DELEGATES TAKE A DAY OFF Geneva, Sept. 17.—After another week of arduous labor the delegates to the League of Nations Assembly took a day off today. No meeting was scheduled and practically all the delegates joined in a lake boat trip, as guests of the City of Geneva.

PARADE ODDITIES London, Sept. 17.—As a result of the parade, pressure virtually all of the English clubs, that were formerly for beer only, now received women either as guests or members. The states to open the doors to women in the Engineers' club.

London, Sept. 17.—Women race horse owners are increasing rapidly in England. The latest to start a racing stable is Miss Nancy Paul, who is only 15.

London, Sept. 17.—The Prince of Wales may again visit the United States next year. He is going to India in February after which he will visit Japan and Canada.

PHILADELPHIA WOMEN'S TENNIS TOURNAMENT Philadelphia, Sept. 17.—Miss Edith Sigourney, of Boston, and Mrs. Mollie M. Mallory, of New York, were to play the final round for the women's middle states tennis singles championship on the courts of the Philadelphia Cricket Club today. In the doubles, Miss Mary K. Brown and Mrs. L. M. Williams were to meet Mrs. Mallory and Miss Sigourney.

PHILADELPHIA PRICES OF PIPE Philadelphia, Sept. 17.—Cuts of from 25 to 30 per cent in the most used grades of pipe and on special grades ranging as high as 34 per cent, are announced today by the National Tube Company, subsidiaries of the United States Steel Corporation. The decrease affects oil country coals, steam, gas and water pipes. This is the first price cut in this line of goods since July 7.

LIBERTY BONDS New York, Sept. 17.—Opening Liberty Bond quotations: 3 1/2-88 84; 4 1/4-88 84; 4 1/4-88 84; 4 1/4-88 84; 4 1/4-88 84; 4 1/4-88 84.

THE STOCK MARKET New York, Sept. 17.—Buying orders were in fairly large volume at the opening of the stock market today, causing gains ranging up to one point. Baldwin Loco was the chief feature, advancing one point to 90 1/4.

Mex. Pete yielded 3-4 to 115 and then rallied one point. Studebaker opened at an advance of 1-2, at 76 1/2. Steel Common was quiet, rising 1/4 to 33 1/2. Rails were featureless.

A Development of Character GREENACRES

Manchester's Latest Building Lot Sub-Division is now nearly ready for market—months of hard work has converted this property (formerly the Digney and Beiber Farms) into a Parklike Section that makes it worthy of your consideration for a permanent home site.

Nothing like it has been offered to the public of Manchester heretofore. To see the property is to be convinced.

Large lots in Manchester's best residential section—graded streets—nearly two miles of cement walks, perfect drainage. Good school facilities. Easy access to all parts of the Town. Trolley in front of the property. These are some of the many advantages to be found at Greenacres.

In order to establish Greenacres as a good section we have restricted it to one and two-family houses. Single house to cost not less than \$4,500, double house to cost not less than \$6,500.

Inspect the property today, and choose the lot you are interested in—the prices range from \$400 to \$2,750, none higher.

PROOF OF ESSEX VALUE IN OWNERS' LETTERS "Every day brings new evidence in the shape of letters from owners, emphasizing the great value and economy of the Essex" says Geo. H. Williams local Essex dealer.

ANNUAL MEETING OF W. C. T. U. The South Manchester W. C. T. U. held its annual meeting Tuesday, Sept. 13. Annual reports of departments from all parts of this country and many from foreign lands. We have on our files letters from local owners all pointing to the fact that after thousands of miles of service the Essex is as powerful, as free from squeaks and rattles and as smooth acting as anyone might wish a car to be.

MEMORIALIZED BY FRIENDS. Mr. and Mrs. Carl Lamberg of Washington, N. J., who were married on Labor Day last evening for their home in New Jersey after spending part of their honeymoon with Mr. Lamberg's parents on Oak street. Thursday evening a number of Mr. Lamberg's former friends and relatives held a reception in his honor. Many useful and handsome presents were given the couple. Refreshments and singing were enjoyed during the evening. The house was tastefully decorated with potted plants and ferns for the occasion.
