EVENING GOWNS TO MATCH HAIR New York Designer Shows Some Stunning Models for Summer Wear.

New York, May 7.—(AP)—When an evening wrap matches one's hair it may be worn with almost any evening gown. This is a summer theory of Maybelle Manning, who showed today taffy colored evening coats for pale blondes. She designs similar coats in other colors, to match one's hair. The first of these long coats she made for Tallulah Bankhead in Lyons velvet with a taffeta back. It had wide epaulettes, no fur, a flat back and a fitted waist. Its skirt movement was toward the front. Under it was worn a simple satin dress. She also designed for Miss Bankhead a glorified shirt-waist dress for evening. It was cut on the lines of a man's shirt, with a collar and tailor front, but the reverse side was a series of long, cut-out panels, leaving the back exposed to the waist line. The material was white triple sheer, beaded all over with tiny rhinestones. The skirt touched the floor, and it had a wide stitched silver belt. Her Favorite. The gown was one of this designer's summer preferences. She has made the same thing in white crepe with a wide red kid belt. Daytime summer clothes she thinks should have a tailor air—halfway between a man's shirt and a tailored suit. For town wear she favors non-crushable black linen frocks with tucked vest-like fronts, big white embroidered collars and matching gauntlet gloves, also embroidered. A white hat worn with such a dress has a black bow on the side. She also showed tailored suits of black starched net, each with a white organdy jabot. She likes bright shantung bathing suits with shirt-bosom fronts and no backs. The collar holds the suit in place. Her most demure gown is a white organza, with circular bias folds on its long skirt, a square collar and plain turn-back cuffs. A brooch is worn at the throat; and under the dress swishes a stiff taffeta slip.

Pruden, 43, went out to catch some fish, but the fish almost caught him. Pruden, after several hours of unfruitful angling, accepted the invitation of a boy to move to a "good spot." The spot was some distance from shore and upon reaching it, Pruden found himself in mud to his waist and sinking fast. The boy threw Pruden a plank, then called police, but Pruden solved the problem by doffing his overalls and wading ashore. Milwaukee, Wis.—Mrs. Helene E. Mathes, 62, and August Metzger, 77, of Spokane, Wash., childhood friends who became separated early in life, were married after a romance carried on by mail. Both were friends in Aurora, Ill., years ago, but were separated when Metzger went to the Pacific coast and Mrs. Mathes came here. Metzger's wife died in 1922 and when Mrs. Mathes' husband died two years ago the couple began corresponding.

The damaged totaled more than \$5,000 partly covered by insurance. The Beers cottage, built many years ago by A. B. Beers of 12 Governor street, East Hartford, now owned by Mrs. Bertha Rosenthal, was totally destroyed as was the Rosenthal cottage built a number of years ago by Mrs. Bertha Rosenthal of 12 Burnside street, East Hartford. The fire started about 2:30 o'clock and a call for aid was sent to the Ellington and the Rockville fire departments. Four strokes of the Rockville alarm were sounded about 2:30 o'clock, indicating that there was a fire in a surrounding town and that aid was wanted. The apparatus from the Fitch station at the rear of the Memorial building responded as did the apparatus from the Ellington fire department. Slight damage was also done to the old Cady cottage, which has been a landmark at Crystal Lake for more than a generation. This damage was caused by the heat from the burning cottages. The First Step To A Modern Kitchen IS A MODERN AUTOMATIC GAS RANGE

Now You Can Have A Modern Gas Range For Less Than 30c A Week

In the past few years many forms of cooking have sprung up, flourished for a period of time, and then fallen into discard to a greater or lesser degree. Amid the welter of conflicting claims, new gadgets, and experiments, gas has gone steadily on, winning new friends, and holding old.

There are two reasons for this: First, gas really is the ideal cooking fuel—faster, more flexible, cheaper, easier to use. Second, alert manufacturers have kept gas ranges abreast of the times, seeing to it that today's gas range will always do anything any other range will do, and do it better... quicker... cheaper.
