The Greatest Vote In Manchester's History!

That should be the answer tomorrow to the group which is trying to force Manchester into a \$1,500,000 gamble in an electric plant!

You all know what the Manchester Electric Company has accomplished. Reasonable rates—lower than the average—good service, good citizenship, high praise in the Senate of the United States.

On the other hand, just how is a town electric plant to benefit the taxpayer and the rent payer? What is it going to get you personally, except more debts and taxes? Who is ultimately going to "hold the bag", if not the rent payer and the tax payer?

We said at the beginning of this series of announcements that we were going to give you ALL the facts, because it is your money that would be spent. We have done so, to the best of our ability. We said then and we say now that: IF all are informed of what they are getting into and IF all will vote, we are fully content to leave the decision to the good judgment of the people of Manchester.

For your final assistance we have summarized the whole situation in eight simple questions and answers, given below.
