HERE'S COMPLETE TEXT OF PRESIDENT'S MESSAGE

Washington, March 3.—(AP)—The shares of stockholders who can afford to receive earnings undistributed to the common stock.

This method of avoiding existing surpluses constitutes a problem as to the income tax law.

On January third, 1936, in my annual message to the Congress, I pointed out that without the new revenue law, the Government would be forced to raise taxes.

As a part of the tax reform, the present exemption of dividends from the normal tax on individual income is repealed.

This point reflected the theory of the new tax plan: that instead of taxing corporate profits, the revenue should be raised by taxing the individual income tax returns from those who are engaged in business.

The President, in explaining his proposals to Congress, said: "Extensive study of methods of improving present taxes on income from business has shown that the creation of changes to protect the distribution of the tax load among the various classes of taxpayers is essential."
