### Science Has Made Little Headway Against Colds

Because man is a warm-blooded animal with a high body temperature, he is naturally resistant to the invasion of the common cold virus. The inability to control the disease, however, is due to the fact that the virus is so small that it can pass through the finest filters. The virus is also so hardy that it can survive in the environment for several days. The only way to protect oneself is by avoiding contact with infected persons and by using disinfectants.

### PARTITION TALK STIRS SLOVAKS; ACTION FEARED

Official quarters denied today recurring reports that German officials are planning to partition Slovakia. The reports, which have been circulating since the Munich conference, claim that the Germans intend to divide the country into a northern part to be annexed to Germany and a southern part to remain a separate state under German protection.
