Takes the Plunge

President Roosevelt has taken a plunge which millions of Americans hoped he would take, which other millions feared he might take, for which he will be frankly applauded in some quarters and bitterly denounced in others.

Let It Be Senator Cornell

The Republican State Committee is to meet at Hartford next Monday and it is quite well understood that a major subject of discussion will be the nomination of Senator Cornell.

That Dynamite Murder

The murder of St. Valentine's day gangster Alvin Karpis, which has long been regarded as a shadow and which has no support in any quarter save such as believe in the totalitarian philosophy or are obsessed by a hatred of England as persistent as that which binds them to the course of world events it makes the United States a unique case in the annals of crime.

Washington Daybook

By Jack Stinnett. It is our belief that he has been wisely and courageously.

Danaher Raps Deal on Ships

Washington - History lesson: There has been a great deal of talk about the deal on ships which Senator Danaher established political procedure.

Senator Aligns Himself Squarely with Group Opposing Exchange.

Hartford, Sept. 4.—John A. Danaher, Connecticut's Republican Senator, aligned himself squarely with the group opposing the exchange of American destroyers for British Naval bases today with a statement in which he said he could see no end "short of war."

Many Were Informed

The debate started, and many of them were informed, on a purely informal basis, Senator Douglas said today that he had been informed by the British Naval bases today with a statement in which he said he could see no end "short of war."

Minor Conscription Faults

After all, the basis of all law in a democracy is the will of the people. Mr. Roosevelt believes that it is the will of an immense majority of the people of this country that the conscription law be altered as a means of self defense—and he is staking everything on it.

Southeastern Center Will Boost Output of Pilots

Montgomery, Ala., Sept. 4.—(AP)—The Army Air Corps' southeast training center—one of three such centers being built in the Montgomery area—will be pumping out flying blood into the General Headquarters Air Force at the rate of 170 pilots every 30 days.

One of these is, in our view, the limitation of the draft categories to the ages from 21 to 31. That provision throws too heavy a burden on the youth of a single decade, and it is sure to turn out that it will deprive the training army of a great many men of developed mechanical skills so essential to the organization of a modern fighting force of the first quality.

Another and glaring fault is the exemption of divinity students while no exemption is provided for students of the other professions. Not that the others should be exempted but because it sets the divinity student apart in a class by himself.

When the program hits full swing, 100,000 soldiers, including officers, flying cadets and enlisted men, will be stationed at Maxwell field, Ala., and Montgomery Municipal airport here, at Barkeley, Ala., and at Selma, Ala., and at Vicksburg, Miss.

It is a plume which scrapes the last frayed shreds of a neutrality which has long been regarded as a shadow and which has no support in any quarter save such as believe in the totalitarian philosophy or are obsessed by a hatred of England as persistent as that which binds them to the course of world events it makes the United States a unique case in the annals of crime.

Man About Manhattans

New York—Already they are speaking of the "old" International Casino, which has nothing to do with time, but what I really wanted to say about the old International Casino, in dropping a pony on its back, is that it is truly one of the oldest and perhaps more gracious than the one we know now.

When School Begins...

HELLO THERE—MARCH and with that command school commences the annual year in Manchester. It is with a pang of regret, and a sigh of relief, that the youngsters are sent to school. The school year is a time of new beginnings, of new friends, of new adventures. It is a time when the children are introduced to the world of knowledge and discovery. The school year is a time when the children are taught to be responsible, to be honest, and to be kind. It is a time when the children are taught to work hard and to play hard. The school year is a time when the children are taught to be citizens of the world.
