British May Support Soviet's Left Flank; Army Strengthened

Second Front Plans Decided at Meeting

Solons Demand Wages Control By Legislation

Aroused Congress Waits Introduction of Blueprint for Program to Stabilize Living Costs

Washington, Sept. 8.—(AP)—The White House disclosed today, after President Roosevelt had made it plain that preparations were under way for opening a second front in Europe, that the "necessary decisions regarding military operations" were under consideration.

The news of the second front was reported by Harry L. Hopkins, an American Representative in London, Sept. 8.—(AP)—A British Army is rapidly being strengthened in Iran and Iraq, which may eventually give support to Soviet Russia's imperiled left flank.

Prime Minister Churchill disclosed today, indicating British preparation to enter directly into the battle of Russia if necessary.

His statement came in a detailed war report to the House of Commons which reflected confidence in the Allied situation generally in the air and at sea.

The prime minister gave Commons assurance both that Egypt would involve executive powers in a new Allied Army, stronger than any other force of battle and that the day for an offensive against Hitler's Europe is being hastened.

He called the Dieppe raid more than a tactical success, but a "disaster" in that it was an "indispensable preliminary" to a greater undertaking.

He said that the British picture of Hitler as a "man of action" is being confirmed by the fact that he has ordered the evacuation of the Mediterranean and the Balkans.
