WILL THE FALL OF ITALY MEAN A HOME FRONT DEFEAT?

THE fall of Italy is glorious news --- if we take it as the end of round one instead of the finish of the fight. It COULD mean a home front defeat --- if Americans start pulling their punches.

It COULD mean good news to our two major enemies --- if anybody takes it as a signal to slow up, let down, or quit backing their war with everything they've got.

As a matter of fact, the long, hard march to Berlin and Tokyo has just begun. If you think it will be easy, if you think we can win this fight with one hand --- then you are wrong, dangerously wrong.

Before the last shot is fired, a lot of lives are going to be lost and a lot of billions spent. The more American dollars that go

into superior equipment, the less American blood is going to redder foreign soil. It cost 46 million dollars to lay Hamburg low. It cost another 300 million to train, equip and transport the crews and ready everything for the task. And Hamburg is just one enemy city.

War Bonds must provide much of the money for the bitter struggle yet ahead. You --- not the fellow next door --- have a personal responsibility to dig deeper than is pleasant and convenient to make the Third War Loan a success. It will be a success only if every American opens his heart and his pocket and decides TO BACK THE ATTACK!
