Participating Physicians will accept the CMS fee as payment in full for listed CMS

surgical care to members within these income levels. For individuals and families

whose yearly earnings are above these amounts, the higher allowances in the

revised Schedule of Operations will mean a greater credit against the physician's

Allowances for many frequently-used surgical procedures have been raised. Some examples: Tonsillectomy increased from \$25 to \$30 (children's) and \$40 to \$50

(adults) . . Maternity fee increased from \$60 to \$75 , . Gall Bladder operation

increased from \$150 to \$175 . . Colon Resection increased from \$200 to \$250.

While many fees have not been changed, others have been raised from \$5 to \$50,

IMPROVED SCHEDULE OF OPERATIONS

In addition to establishing a more realistic and practical proportion between the

many surgical procedures, the new schedule of operations has been divided into

sixteen sections, each covering one type of surgical care such as fractures and dis-

Awards Are Presented

February, 1951

The first two years of Connecticut Medical Service, following its formal organization and the issue of its first contract, have shown its value in payment of benefits to thousands of members, and we have gained the experience needed to plot a secure course for she future.

TO ALL CMS SUBSCRIBERS:

We now present an expanded and improved surgical care program described on this page, as an amendment to the original contract, to become effective on April 1, 1951. This revision results from careful study of suggestions made by members

and physicians, and takes account of actual experience in the use of surgical and maternity care by our present large membership of over 400,000 Improved benefits will be available up to a maximum of \$250 for one operation and, where different operations may be required, more liberal

treatment is provided. Income levels for service benefits have been raised and changed to a combined family-income basis, both for simplification and to provide this valuable FULL-SERVICE feature to an even greater percentage of members. We find that under the liberal provisions of CMS, benefits are being used

at an increasing rate. This is in keeping with the basic purpose of CMS-

to make surgical care available when required. Premium rates for this

broadened program have been established to assure sound operation, including an adequate contingent reserve. With today's higher costs of living, broad coverage against health care

se takes on increased importance, better than ever before, the nor

profit CMS plan is equipped to meet this need for you and your family.

## **NEW MEMBERSHIP FEES**

To make possible the higher coverage in the new program and to provide for the increased use of CMS benefits, the following adjusted monthly rates will go into effect on April 1

4		Payroll-group Subscribers	Direct-pay Subscribers
Subscriber o	only	\$ .95	\$1.17 *
Subscriber e	and wife or husband	1.90	2.34 *
Subscriber of	and enrolled family	2.85	3.50 *
			e Quarterly

During the past 2 years, CMS has turned back to members in the form of needed surgical care a larger and larger portion of each membership dollar. At the same time, your plan has used a smaller and smaller part of each dollar for administrative expense. This is the guiding principle of your non-profit, CMS plan and makes possible the broad benefits you receive.

The new CMS program presents an improved surgical

and maternity plan to provide a still better coverage

against the hazard of unexpected and costly surgical
