Nixon Budget in Deep Red

State's Welfare Limit Invalid

Deficits Shown Over Two Years

Resident Law Void On Appeal

WASHINGTON (AP) — Connecticut and New York laws barring welfare for new residents were declared invalid today by the Supreme Court. Without a hearing, the court agreed with lower federal courts that the state laws violate the constitutional rights of welfare recipients. The decisions were in line with rulings by the high court three years ago that states could not set up one-year waiting periods for poor people. At that time, welfare laws in Connecticut, Pennsylvania and the District of Columbia were struck down by a 6 to 3 vote. Appeals by Connecticut and New York to keep their laws alive provided a possible test of views on the issue by the four appointments by President Nixon, Chief Justice Warren E.

Supreme Court Ruling

Burger and Justices Harry A. Blackmun, Lewis F. Powell Jr., and William H. Rehnquist. All joined the court since the 1969 decisions. None announced a dissent and no dissent was announced by any of their colleagues.

The three dissenting votes in 1969 were cast by Earl Warren, John M. Harlan and Hugo L. Black, all of whom have left the court. The New York one-year rule became law last June 23. At the time, about 10 per cent of the families on welfare in the state had arrived during the preceding year.

First U.S. District Judge John T. Curtin of Buffalo and then a panel of three federal judges barred enforcement. The state's appeal was based largely on claims of a "fiscal crisis."

In 1969 the high court said new residents in a state may not be required to wait a year for welfare unless the state shows a "compelling" reason. New York officials said a shortage of funds in a state whose citizens pay the highest taxes anywhere in the nation justify the rule.

All the Supreme Court said in its ruling was that it "affirmed" the judgments of the lower courts.

Stop Raid On Funds, He Urges

WASHINGTON (AP) — President Nixon urged Congress today to "stop raids on the Treasury" by imposing a rigid ceiling to keep the federal spending within the \$246.3 billion requested in his new red-ink budget. "We urgently need an absolute limit on government spending," Nixon said in a statement released as his fiscal 1973 budget reached Capitol Hill. "Only thus can we end inflation, stabilize the economy and provide employment and real prosperity for all," the chief executive said.

The presidential statement came as Nixon announced two huge deficits—\$38.8 billion for fiscal 1972 and \$25.5 billion for fiscal 1973. Deficit spending, he said, "is strong but necessary medicine" for the sluggish economy.

The President's top budget adviser, Director George Shultz of the Office of Management and Budget told newsmen at the White House that the presidential request is for a rigid ceiling that does not "provide any escape hatches whatever."

He described as "ribbery" previous congressional ceilings on spending, contending they were riddled with loopholes. Shultz said the administration would prefer no ceiling at all to a "sieve-like" limit which would give only the illusion of controlling federal spending.

In his statement, read to newsmen by Shultz, Nixon said his fiscal 1973 budget "requires spending more than we will collect in taxes."

"It will be a job-creating budget and a noninflationary budget only if spending is limited to the amount the tax system would produce if the economy were operating at full employment," the President continued.

"Those who increase spending beyond that amount will be..." (See Page Eight)

By STERLING F. GREEN

WASHINGTON (AP)—President Nixon handed Congress today a \$246.3-billion budget for fiscal 1973 written in deep red ink. He announced two huge deficits—\$38.8 billion this fiscal year and \$25.5 billion next—and said they will help speed up the nation's economic recovery.

His budget message asked neither for further tax cuts to stimulate the slack economy nor for tax increases to meet the climbing costs of government, although his deficits are the two largest since World War II.

"Deficit spending at this time, like temporary wage and price controls, is strong but necessary medicine," Nixon said. Yet his message slipped repeatedly at the Democratic-controlled Congress for spending more than he had asked.

Revenues will rise "as the new prosperity takes hold," Nixon promised. This trend makes possible the smaller deficit for fiscal 1973 starting next July 1, he said, and "brings us strongly forward toward our goal of a balanced budget in a time of full employment."

But his new deficits, bringing the total red ink in his administration to a peacetime record of \$90 billion, are sure to become an election-year target of Democrats.

They also may provoke demands for tax increases from conservatives in Nixon's own party. The message did not mention the value-added tax, which Nixon favors, but left open the door for him to ask it later.

When Secretary of the Treasury John B. Connally was asked at a budget briefing whether he personally favors submitting such a tax request to Congress he replied: "Not now."

And he averted discussion of the political aspects of the budget with a quip. He said he is unhappy with the deficit but considers it the best fiscal policy in a time of economic slack. A reporter said this was the same answer given by the Democrats a few years ago. Connally, the only Democrat in the Cabinet, retorted:

"Well, the Democrats say a lot of things that are true." In asking \$78.5 billion for defense, Nixon scheduled the first sizable increase in new weapons-system spending in years, even while "we move to zero draft calls."

Lindsay, Wallace Dicker on Debate

By THE ASSOCIATED PRESS Alabama Gov. George Wallace has brushed aside a challenge to debate fellow Democratic presidential candidate John V. Lindsay, but the New York mayor says Wallace's response doesn't rule out a verbal confrontation.

Wallace, who is running against Lindsay and eight other contenders in the Florida Democratic primary, said Sunday: "I don't intend at this time to engage him in debate because my program mapped out didn't leave any time for it."

"I don't know whether I ought to draw any crowd for Lindsay or not, but that's probably what he wants to do, and I think he's running low in Florida," Wallace said. But, Wallace added, "I just haven't made up my mind."

Lindsay issued the debate challenge last week and at the same time said Wallace "stands for everything wrong

with this country." In a telegram to the governor, Lindsay decided whether they want a debate on the issues in this primary or whether they will settle for a primary circus of staged rallies and no substance.

Lindsay offered to meet Wallace in Montgomery, Ala., if the governor agreed to debate. Wallace, who appeared in Washington on the CBS radio-TV program "Face the Nation," insisted again that he is

Your Share

WASHINGTON (AP) — If you're totting up your financial liabilities, you might consider adding \$1,768.10. That's your individual share of \$71.3 billion, the estimated federal debt by the end of fiscal 1973.

Swiss Bank Pays Out \$650,000

Woman Cashes Hughes Check, Vanishes

ZURICH, Switzerland (AP) — Police throughout Europe are looking for a dark-haired woman who cashed \$650,000 worth of checks which the McGraw-Hill Book Co. paid for a purported autobiography of industrialist Howard Hughes.

Swiss authorities confirmed that an international warrant was issued for the woman, about 31 years of age, who collected the money from the Swiss Credit Bank in Zurich.

The Swiss officials did not identify the woman. But Time magazine said she gave her name to the bank as Helga R. Hughes. The McGraw-Hill checks were made out to H.R. Hughes.

The warrant was issued after McGraw-Hill filed a criminal complaint alleging fraud last Thursday with the Zurich district attorney. The woman was described as dark-haired, with a lean face, about 5 feet 3 inches tall, wearing a mid-dress and speaking broken German. Earlier reports of the mystery woman said she was a blonde. She reportedly pocketed 2.6 million Swiss francs after endorsing the checks "H.R. Hughes," in a handwriting that closely resembled that of the industrialist, according to prosecutors.

dorsing the checks "H.R. Hughes," in a handwriting that closely resembled that of the industrialist, according to prosecutors.

A spokesman for the Swiss Credit Bank said the woman presented a passport when she opened her account at the bank.

"Evidently the bank clerk could not know whether the passport was forged or not," he said.

The district attorney's office meanwhile called off a news conference this morning on the case. But it did confirm that the Zurich police had alerted Interpol, the international police organization. The search for the mystery woman was the latest development in the tangled Howard Hughes autobiography controversy, which involves McGraw-Hill, Life magazine and author Clifford Irving. Irving claims to have compiled the autobiography from interviews with Hughes. His book has been challenged in court as a hoax and its publication suspended by McGraw-Hill and Life pending clarification of controversy over the Swiss bank account where three checks totaling \$650,000 were deposited. McGraw-Hill thought the \$650,000 went to Hughes.

Newsmen Mike Wallace said Sunday on the CBS television

Global Warrant Issued

"60 Minutes" program that Swiss police were looking for a blonde, German-speaking woman "who, according to the bank records, opened an account there last May—using a Swiss passport made out in the name of Helga R. Hughes."

Time magazine said Sunday that an attractive blonde who identified herself as Helga Hughes cashed the three checks through an account in the Swiss Credit bank in Zurich and carried out the money in an airline bag. She endorsed two of the checks "H. R. Hughes" in the

presence of a bank officer and mailed in the third with the same endorsement, said Time, whose parent company, Time, Inc., also owns Life.

McGraw-Hill, in the court action, has produced certificates from handwriting experts asserting that two of the check endorsements were genuine signatures of the billionaire industrialist.

The Time story said the Swiss account was opened by the woman who carried a Swiss passport, identifying her as Helga R. Hughes and who signed a bank signature card, "H. R. Hughes."

After comparing the signature with that on the passport, the bank officer allowed the woman to open the account by depositing 1,000 French francs, or about \$180.

About three weeks later, Time continued, the woman appeared with a \$50,000 check from McGraw-Hill made out to H. R. Hughes and endorsed it in front of a bank official. In the early fall she appeared and endorsed a \$75,000 check and in early December she mailed in a \$325,000 check that

Junior Achievement Firms Schedule Annual Meetings

Three young and growing Manchester manufacturing firms will have scheduled their annual meetings this week. An unusual feature is that the executives and staff of all three firms are students at Manchester High School, and the majority of their stockholders are also students.

The companies, which use standard methods of business operation, are all Junior Achievement companies and in their first year of operation. They hold all their meetings and work sessions at the Hartford Road office of the Savings Bank of Manchester.

The firms involved are JACCO, which holds its annual meeting tonight; the Rising Sun, meeting tomorrow; and J.A.M., which will meet Wednesday.

A total of 60 JACCO students are participating in the present Junior Achievement program, now in its second year. Three adults from each sponsor company work with 15 to 18 students.

JACCO, sponsored by Southern New England Telephone, meets weekly on Monday evenings and produces apple shaped metal cutting boards. The Rising Sun, which meets Tuesday, is sponsored by the company of Vernon Jayces, its product is lamps with log bases. Meeting on Wednesday, J.A.M., whose sponsor is Pratt Whitney Aircraft, makes Christmas candles as its initial product. A new product line includes notebook covers and pen nibs.

Notices of the forthcoming annual meetings have been distributed to the companies' stockholders who paid \$1 a share for the stock. Stockholders are students, teachers, parents and interested Manchester area business people. Each company will follow its established annual meeting procedures, consisting of future reports and prospectus for production activities.

The engagement of Miss Florence Anne Downham of Manchester to Peter J. Shells of Glastonbury has been announced by her parents, Mr. and Mrs. Dwight D. Downham Jr. of 76 Foster.

Her fiancé is the son of Mr. and Mrs. Raymond M. of 62 Ripley Rd.

Miss Patricia is employed in the wage and salary division of the Hartford Insurance Group.

Mr. Shells is employed by the William H. Mino Express Co. in East Hartford.

The wedding is planned for Sept. 2 at St. James Church.

They Announce Their Engagements

The engagement of Miss Florence Anne Downham of Manchester to Peter J. Shells of Glastonbury has been announced by her parents, Mr. and Mrs. Dwight D. Downham Jr. of 76 Foster.

Her fiancé is the son of Mr. and Mrs. Raymond M. of 62 Ripley Rd.

Miss Patricia is employed in the wage and salary division of the Hartford Insurance Group.

Mr. Shells is employed by the William H. Mino Express Co. in East Hartford.

The wedding is planned for Sept. 2 at St. James Church.

The engagement of Miss Patricia Ann Flaherty of Rockville to Thomas P. Martello of Worcester has been announced by her parents, Mr. and Mrs. Robert Flaherty of St. Bernard's Pl.

Her fiancé is the son of Mr. and Mrs. Peter Martello of 15 Worcester Rd.

Miss Flaherty is a graduate of Rockville High School and is attending the University of Connecticut.

The wedding is planned for June 24.

The engagement of Miss Mary Elizabeth Hammond of Chester to Kevin F. Bowler of Halloway, N.Y. has been announced by her parents, Mr. and Mrs. Joseph F. Hammond, of 62 Oakwood Rd. and West Springfield, N.Y.

Her fiancé is the son of Mr. and Mrs. Paul F. Bowler of Charlotte, N.C.

Miss Hammond is a cum laude graduate of Emmanuel College, Boston, Mass. where she is studying for her Bachelor's degree in psychology and elementary education. She is employed by the Manchester school system and is a candidate for her masters degree at St. Joseph College, West Hartford.

Mr. Bowler is a graduate of Providence (R.I.) College where he received his B.S. degree in education. He is employed at Hodara Systems, Hempstead, N.Y.

The wedding is planned for May 27.

The engagement of Miss Donna Jane Dutton of Vernon to David Steven Carter of Rockville, Mo. has been announced by her parents, Mr. and Mrs. Robert S. Dutton of 125 Northbrook Dr.

Her fiancé is the son of Mr. and Mrs. William D. Dille of Boonville.

Miss Dutton is a graduate of Rockville High School and is a junior at the University of Missouri, Columbia, Mo. where she is majoring in elementary education.

Mr. Carter is a graduate of Boonville High School and is employed at the Traveler Insurance Co. in Hartford.

No date has been set for the wedding.

The engagement of Miss Virginia Irene White of Hartford to Kevin K. Caldwell of Hartford has been announced by her parents, Mr. and Mrs. Robert R. White of 24 Sutters Rd.

Her fiancé is the son of Mr. and Mrs. Keith Caldwell of Hartford.

Miss White is a 1971 graduate of Manchester High School and is employed at the Traveler Insurance Co. in Hartford.

A September wedding is planned.

The engagement of Miss Patricia Ann Flaherty of Rockville to Thomas P. Martello of Worcester has been announced by her parents, Mr. and Mrs. Robert Flaherty of St. Bernard's Pl.

Her fiancé is the son of Mr. and Mrs. Peter Martello of 15 Worcester Rd.

Miss Flaherty is a graduate of Rockville High School and is attending the University of Connecticut.

The wedding is planned for June 24.

The engagement of Miss Donna Jane Dutton of Vernon to David Steven Carter of Rockville, Mo. has been announced by her parents, Mr. and Mrs. Robert S. Dutton of 125 Northbrook Dr.

Her fiancé is the son of Mr. and Mrs. William D. Dille of Boonville.

Miss Dutton is a graduate of Rockville High School and is a junior at the University of Missouri, Columbia, Mo. where she is majoring in elementary education.

Mr. Carter is a graduate of Boonville High School and is employed at the Traveler Insurance Co. in Hartford.

No date has been set for the wedding.

Library Use Growing; Suggestion Box Out

A short-lived feature in the junior wing of the Rockville Library was a suggestion box which was stuffed daily with suggestions about the library. They ranged from "The book should be taken out of the library" to "I don't like it."

Mrs. Lucille Denley, head librarian of the junior wing said the box was removed because it was the same suggestions every day.

In her annual report of activities in the junior library, Mrs. Denley commented that the suggestion box also had many constructive comments from the children such as notations of areas where more books were needed. She said that someone started a write-in campaign to turn the radio into a record player. She said there were also suggestions for change for several years in the library.

Mrs. Denley commented on the children's use of books on ecology, nuclear chemistry, electronics and other such subjects.

A total of 110,287 books were circulated during the year. This figure included 18,300 books circulated in the elementary school library. The number of books now on the junior library shelves.

The report notes that 708 new borrowers were added during the past year. The library now has 1,200 borrowers. It has 4,544 borrowers. Outgoing

Education Hurt By Money Lack

Money, or rather the lack of it, is the basis for many educational problems, according to comments made by the principals of the town's four schools during the curriculum subcommittee of the Citizens Advisory Committee on Education (CACE).

Passive reluctance to foot increasing educational bills is attributed to a lack of communication between the school and the parents of students.

While all four principals agree the lack of communication is one of the most serious failings of the schools, none comes up with a solution.

Alternatives for solving the problem vary from publication of a newsletter (which he said time and staff not available) to formation of a PTO (for all schools except the high school which already has one); and after from high school principal Richard Olson to the fact that any community group in an effort to improve town-school communication.

Several common bonds appear throughout the comments made by each principal at individual meetings with the committee.

Most schools attempt to treat each child as an individual. This is as true of the high school as of the elementary school.

Meeting individual needs requires different approaches at the student level by grades through the fourth grade. The young child needs to move, they need physical contact, concrete involvement and activity.

Principal Donald Parker told the committee members, "The situation is a real one for us. It's really undesirable to just keep youngsters quiet in their seats, being talked at and then expected to regurgitate information."

He said the philosophy Parker initiated the British Primary system in the school two years ago, was to have a teacher hired to introduce the method.

The British system encourages the pupils to become more confident, assume responsibility and follow directions.

Andrew Winans, principal of Hicks Memorial School, follows through on the same basic philosophy as Parker.

"Children must be considered as individuals with different talents," Winans said. "The curriculum should satisfy not only academic needs, emotional and social as well, but also."

The Hicks School teachers are urged to continue to give themselves as free time and use their creativity, putting in the extra hours. Teachers often spend their own money on supplies and materials.

"There are not enough school materials available, not enough papers or magic markers," he added. "Teachers are not dedicated; they do use waste materials to save and reallocate resources."

Harding cited money as the underlying cause of the middle school's problems. He said the lack of personnel for art, music and testing as well as the lack of funds for the school's special education program.

Teachers at the middle school volunteer their own time to teach "in-house," using a month in different areas such as furniture finishing, folk singing, etc. The courses are offered before the student's pleasure, not for credit.

Olson noted the establishment of a parent-teacher organization as a need. He also feels money must be found to hire an assistant principal at the high school. He cited many problems of the school system as "money, (running out of) money, (running out of) money."

Special Education Winans had some sharp words for the town's failure to recognize its responsibility for learning problems of its children with various learning disabilities.

"There is no guidance available at Hicks for a child, either gifted or handicapped. He is left thrown in with average youngsters," Winans told the committee.

At the middle school "14 per cent of the students are two or three years behind the reading level of their grade according to the most recent achievement testing. Harding related the reading specialists work with reading groups.

There are youngsters who need help but the state requires that their need be proven through a hearing. A half system-wide test for counseling and testing personnel," Harding commented.

There are no provisions for learning disabled students" at the high school, according to Olson. There are 10 to 12 such students who must be thrust into the regular classroom.

Winans described the lack of speech and hearing personnel at the high school. He said that though such a program is two-thirds reimbursable to the town, the need for such personnel is not recognized by town officials. "Winans described the lack of speech and hearing personnel at the high school. He said that though such a program is two-thirds reimbursable to the town, the need for such personnel is not recognized by town officials. "Winans described the lack of speech and hearing personnel at the high school. South Windsor Groups Recycling Newspapers

Stiff fingers and icy winds didn't prevent South Windsor Conservation Commission (CC) members Cynthia Wotel, left, Elizabeth Warren and Janet Williams, center, and Richard Olson, right, from participating in the newspaper recycling project Saturday at the Sullivan Ave. recycling plant.

On hand to collect and stack the bundles for the new town-wide project, sponsored by the Conservation Commission (CC) and the Town Council, were CC members Cynthia Wotel, left, Elizabeth Warren and Janet Williams, center, and Richard Olson, right, from participating in the newspaper recycling project Saturday at the Sullivan Ave. recycling plant.

The program is being conducted Saturdays and Sundays, from 9 a.m. to 4 p.m., by different groups in town, under the direction of the commission.

The town's goal for recycled newspaper was set by the Capital Region Planning Agency and is five tons per week. The CRPA is looking for participation from at least seven municipalities in the area for a period of two weeks. South Windsor is the second town to join the project. Bloomfield was the first. The Conservation Commission hopes to preserve the ecology of the land by cutting down on the number of trees used for paper, (seven trees make one ton of paper), and the crumpled paper, which is used for other purposes.

Confirm Financial Plight of Schools

A six-member panel of high school students confirmed the financial plight of the schools during a panel discussion meeting with the curriculum subcommittee of the Citizens Advisory Committee on Education (CACE) last week.

The lack of money was apparent in the lack of supplies and curtailed programs at the school.

It became a real complaint of the students regarding the constant need to dig into their own pockets to pay for activities and, in many cases, educational materials normally supplied by a high school.

When the principals met with the Curriculum subcommittee they stressed the difficulty of communicating with the parents regarding the school system.

The students voiced a similar problem in communication with the parents. Most of the students claimed they did not discuss the school's financial problems with their parents because they didn't feel parents were interested or because "parents don't care what school is like when they went and they don't understand it now."

The students said that the principals earlier endorsed the formation of school PTO's as a possible means of overcoming the communication problem.

Asked their opinion of the 12-month school concept, now under consideration, the students threw up their hands at the idea.

Another student disagreed, however, pointing to the conventional French program as "excellent" and "fun."

Many of the students complained the English course was "boring" and contained too much grammar. One admitted, however, the teacher was good, but the students were bored because of the lack of transportation for some grammar courses.

The students had high praise for an English teacher described as "fantastic" who makes English literature of the 1800s pretty good.

Surprisingly, the student panel with one exception, opposed the concept of a pass-fail system of marking. "I work for my grades and am proud of them," one student explained.

Another student it would be unfair for students to be graded on a pass-fail system.

On Sunday the Ecology Club of South Windsor High School conducted the project. (Herald photo by Bruce/Quinn)

PZC Proposal Would Bar Lake Homes on Small Lots

The Planning and Zoning Commission has scheduled a public hearing for tomorrow evening at 8 at the Town Office Building to consider proposed changes in the zoning regulations in the Amston Lake District which will prohibit any year-round residence being constructed on a 60 by 100 foot lot.

Present regulations state that "one-family year round or summer dwellings on 50 by 100 foot lots which were on file in the Land Records on May 1, 1967 are permitted uses."

The commission is proposing the deletion of the words, "one-family year round or," which means that a property owner could no longer construct a year-round residence on his property if he owns only a 60 by 100 foot lot.

The commission, in line with the above, is also proposing the deletion of the words, "one-family year round or," which means that a property owner could no longer construct a year-round residence on his property if he owns only a 60 by 100 foot lot.

The following meetings and dates are scheduled for this week:

Monday: Hebron Congregational Church, 8 p.m. Hebron Elementary School, 8 p.m. Oldale Congregational Church, 8 p.m. Tuesday: Planning and Zoning Commission 8 p.m., Town Office Building, 10 a.m. Wednesday: Conservation Commission 8 p.m., Town Office Building, 10 a.m. Thursday: Recreation Commission 8 p.m., Town Office Building, 10 a.m. Friday: Hebron Youth Basketball Doubleheader, Ovis vs. Hawks and Falcons vs. Eagles, 7 p.m. Saturday: Hebron Gymnasium, 10 a.m., Town Office Building, 10 a.m.

Cotter Backs Bill For Mass Transit

First District Cong. William R. Cotter is joining an effort to raise the multi-billion dollar Highway Trust Fund to provide money for various mass transit programs. The Trust Fund is now limited to only highway construction.

"From both an economical and an environmental point of view, efficient and modern mass transit systems are the wave of the future and the Highway Trust Fund, supported by various transportation taxes, should be used for all forms of transportation, not only highways," said the Hartford Democrat.

Cotter announced he will introduce a bill similar to that introduced by Connecticut Sen. Lowell Weicker and Sen. Abraham Ribicoff which provides that one-fourth of the highway trust fund will be used for mass transit, amounting to \$1 billion annually.

Earlier in the 92nd Congress, Sen. Weicker had introduced a bill similar to one originally proposed by Cong. Cotter, suggesting that the federal government finance 60% of mass transit construction, equal to the federal share in highway construction.

Cotter said he was "pleased" to cooperate with Republican Weicker. "The issue of mass transit is a bipartisan issue. If we are to have adequate mass transportation in Connecticut, narrow partisan politics cannot affect our effort, especially when we must fight a continuing battle for various mass transit programs in the highway lobby, which has successfully blocked a number of attempts to use the Highway Trust Fund for any other necessary program."

Stiff fingers and icy winds didn't prevent South Windsor Conservation Commission (CC) members Cynthia Wotel, left, Elizabeth Warren and Janet Williams, center, and Richard Olson, right, from participating in the newspaper recycling project Saturday at the Sullivan Ave. recycling plant.

On hand to collect and stack the bundles for the new town-wide project, sponsored by the Conservation Commission (CC) and the Town Council, were CC members Cynthia Wotel, left, Elizabeth Warren and Janet Williams, center, and Richard Olson, right, from participating in the newspaper recycling project Saturday at the Sullivan Ave. recycling plant.

The program is being conducted Saturdays and Sundays, from 9 a.m. to 4 p.m., by different groups in town, under the direction of the commission.

The town's goal for recycled newspaper was set by the Capital Region Planning Agency and is five tons per week. The CRPA is looking for participation from at least seven municipalities in the area for a period of two weeks. South Windsor is the second town to join the project. Bloomfield was the first. The Conservation Commission hopes to preserve the ecology of the land by cutting down on the number of trees used for paper, (seven trees make one ton of paper), and the crumpled paper, which is used for other purposes.

Health Tests Due by Pupils

The tests for tuberculosis will be administered to students in kindergarten and grade 7, according to school health nurse Mrs. Polly Connell. Permission slips which were sent home with students must be returned at once, she said.

Physical examinations are required this year for all students in grades 1, 4, 7 and 10. State statutes require that those who have an exam every three years. In addition, Bolton's health requirements state that children entering kindergarten must have a physical prior to admission.

Children who have been examined by a private physician during the past year, particularly at once, Mrs. Connell advised that if a child has had an examination for tuberculosis camp, or during the past six months, a copy of this report will be sufficient.

Parents wishing to have their children examined by the school physician should indicate on the permission slips which were sent home with children.

Kindergarten Registration Kindergarten registrations began today and will continue every day this week, from 10 a.m. to noon and from 2 to 5 p.m. Parents should bring their children's birth or baptismal certificates and their immunization records.

The Board of Finance will meet tomorrow at 7:30 p.m. in the fireplace room of Community Hall.

In Workshop Miss Pamela Conover, daughter of the Rev. and Mrs. J. Stansford Conover, will be participating in a special workshop on story telling during the Dinner, (Oldale College) a January winter term.

possibly by the end of the century, certainly within the lifetime of our children - are inevitable."

Our worst danger, it seems, is that we human beings operate according to our own "deeply rooted beliefs in continuous growth."

Simply applying our ideas of continuing to grow as we now grow, the scientists find, increase "total ecological demand by a factor of 20 over the next 60 years."

"There can be," they say then, "no serious person today willing to increase the possibility, or indeed the desirability, of our accommodating the pressures arising from such growth. For this can be done only at the cost of disrupting ecosystems and exhausting resources which must lead to the failure of food supplies and the collapse of society."

Therefore, say the British scientists, certain things ought to be done, must be done. We should gradually aim at population stability, on a scale which, for Britain, would reduce its present population from 55,000,000 to 30,000,000.

Other measures would put a very high tax on the exploitation of the world's present stores of raw materials, and a special sliding scale tax on all products, a tax of 100 per cent of their value if they are destined to last only one year, no tax at all for products which would last 100 years.

Monday, January 24

Really "Stupid" Or "Happy"? What may be, for all we know, the average, representative people of two nations have had single individuals reporting to speak for them in recent days.

Prime Minister Ian D. Smith of Rhodesia, disturbed by domestic agitation against the new agreement with Britain, under which he, in a slight softening of his white supremacy code, conceded that there might be, in another century, or so, some eventual increase in political privilege for the black residents of his nation, delivered a warning to the blacks of Rhodesia.

"If," he said, "the present generation of Africans are no present as to reject this offer of advancement for their people, they will bear the curses of their children forever."

In Athens, Greece, Deputy Premier Stylianos Patsalos, spoke for the people of that country. The Greek people, he said, are not happy and contented politically under their nearly five years of military rule, and in no hurry to have themselves elected.

"Foreigners," said the Deputy Premier, "are so much more anxious about this sort of thing than the Greek people are. The Greek people say, 'For heaven's sake, don't start all over again.' They want to rest up a bit.... We believe the Greeks have more freedom than is enjoyed in your own country. The Greeks are happier and better off than we are in any other country."

Black Rhodesians who disagree completely with Prime Minister Smith's assessment of what is going to make them happy or reveal them to be stupid have, some of them, been indulging in violence and then been felled by the government's bullets.

As for any Greeks who might disagree with their Deputy Premier about their state of complete happiness or their desire for election, the clearest and safest choice open to them would seem to be to keep their discontent private, since in a land where everybody is so happy, being otherwise would demonstrably be distasteful and unparliamentary.

We tender American idealists tend to think that there ought to be, somehow, a better world for the "stupid" blacks of Rhodesia or, for that matter, citizens of Greece, but all we can think of, off hand, is that somehow the qualities are all mixed up, with the black Rhodesians entitled to feel proud and happy if they are that "stupid" and the true Greeks likely to rate themselves stupid if they ever find themselves really that "happy" under their present political circumstances.

New Gloom and Doom Just when we had fortified ourselves in the belief that there is altogether too much gloom and doom being trumpeted from the ecological front, and made our own resolve to live cheerfully for another million years or so in this present environment, along comes another impressive group of alarmists, polluting us with new fears.

This is a group of British scientists, who have endorsed a document called "Blueprint for Survival," which is a compendium of dire warnings.

"If current trends are allowed to persist," say these 28 distinguished British scientists, "the breakdown of society and the irreversible disruption of the life-support systems on this planet -

Inside Report

Muskie Morning Quarterbacks

By Rowland Evans Jr. and Robert D. Novak

WASHINGTON — Sen. Edmund S. Muskie's surprisingly unimpressive performance on NBC's Meet the Press Jan. 16 was topped No. 1 the next morning at an exclusive gathering: The daily meeting of President Nixon's top White House aides.

The Nixon men could scarcely be concealed their glee. Several aides who had regarded Muskie, front-runner for the Democratic Presidential nomination, as Mr. Nixon's most formidable possible opponent said they were degrading their evaluation.

The White House consensus was that while the latest did not have the kind of impact that would seriously hurt Muskie's chances for nomination, it did reveal his weaknesses. The Nixon aides noted that after a full year's campaigning, Muskie had not developed concise answers to routine questions and tended to respond defensively to hard interrogation.

What makes this important in their opinion is that the very nature of Presidential primary campaigning will require Muskie to submit to a heavy schedule of televised interviews and press conferences. Based on the 10 form, they feel this might erode his stature before the general election campaign begins.

Some Presidential aides proposed helping along this Muskie's rise in popularity by the Democratic vice presidential nominee Muskie was clearly the most personally attractive candidate on any national ticket, the Republicans avoided direct attacks on him. This may have been a mistake, the Nixon Monday morning advisors agreed. At any rate, they added, Muskie is quite clearly vulnerable to frontal attack in 1972.

A footnote: Democratic politicians privately agreed with the White House appraisal of Muskie's Meet the Press performance. But a possible saving grace, some said, was that Muskie's Agnew-esque toughness and hostility toward questioning newsmen might have aroused a sympathetic response from rank-and-file voters.

Nixon's New Speechwriters In another effort to solidify relations with Republican leaders in Congress, President Nixon made an unprecedented appearance in a White House meeting last week. A request that his speechwriters be able to take notes on their grave concerns over such a possibility. There have been expressions of like concern from Senators and House members, and they are now being passed on by advisory groups. Indeed, almost always when the situation is explained, the initial reaction has been that the paper must be allowed to go forward to a full century of publication. If not, a simple act of step toward Nixon's speechwriters will become unavoidable. It is as simple as that.

The Ordinaries of the three dioceses of the "Big Four" legislative districts expressed their grave concern over such a possibility. There have been expressions of like concern from Senators and House members, and they are now being passed on by advisory groups. Indeed, almost always when the situation is explained, the initial reaction has been that the paper must be allowed to go forward to a full century of publication. The Ordinaries of the three dioceses of the "Big Four" legislative districts expressed their grave concern over such a possibility. There have been expressions of like concern from Senators and House members, and they are now being passed on by advisory groups. Indeed, almost always when the situation is explained, the initial reaction has been that the paper must be allowed to go forward to a full century of publication. If not, a simple act of step toward Nixon's speechwriters will become unavoidable. It is as simple as that.

"Take Action"

To General Manager Robert Welas

After reading the back page of our town newspaper I am beginning to wonder what it takes to get our town government to move. You and the governing body are all too eager to put more apartments in town at the expense of the taxpayer. The poor planning failed to see that with each apartment dwelling family there would be almost one child entering into the already crowded school system.

Now before somebody is killed by the wreckers drug race to the scene of an accident, which has already done damage, I ask in the name of the safety of our town citizens that you take action and implement the rotation basis for our wrecker dealers in town.

Sincerely, William C. Carroll

Loads of Chips On behalf of the Manchester Junior Women's Club I would like to thank The Manchester Evening Herald for their excellent coverage and the following for their help in implementing our very successful conservation project of chipping old Christmas trees: The City Beautification Committee of the Members of Commerce, Mr. Ernest Tuff of the Park Department, Mr. Herman Piscitelli of the Town Highway Department, Mr. Earl Wilson for the use of his truck, all the people who took their trees to the landfill area, and the workers who separated them after they were picked up and dumped with the trash. We would especially like to thank Mr. Richard Souther of Souther Tree Service in Coventry for donating his chipper and services. Approximately 1000 trees were

chipped, resulting in five loads of chips now available to the town for use as mulch: Marilyn M. Steele (Mrs. Roger K. Steele) Conservation Chairman Manchester Junior Women's Club

A Thought for Today Sponsored by the Manchester Council of Churches

"The Word of the Cross is filled to those who are perishing, but to us who are being saved it is the power of God." I Corinthians 1:17

The Cross of Christ stands out in all history as the most heroic symbol known to mankind.

It is the symbol of a love that reaches beyond all human limitations and discovers capable within the human mind.

I'll just give you a brief example: The Cross of Christ speaks of love beyond all human comparison. A man has great love when he sacrifices his life for a friend, imagines the love beyond all human limitations and discovers capable within the human mind.

Obituary

Dr. Eugene Chase Dies, Helped in Founding UN

HEBRON — Dr. Eugene F. Chase of East St., former Rhodes School Public Lecturer, and member of the founding committee of the United Nations, died yesterday at the Manchester Memorial Hospital. He was 76.

He was the husband of the late Ann Hastings Chase of Hebron.

Dr. Chase was born April 19, 1895, in New Britain, Conn., the son of Elizabeth Parker and Charles Francis Chase. He was a ninth generation descendant of Aquila Chase who landed at Newburyport, Mass., in 1636.

He was a graduate of New Britain High School, where he received his B.S. degree from Dartmouth College in 1916. He was a Rhodes Scholar from 1917-1920, and as senator of the United States from the College at Oxford, England, where he received his BA and MA degrees. He received his PhD degree from Harvard University in 1924.

Dr. Chase served on the faculties of several colleges and universities including Massachusetts Institute of Technology, Harvard University, Wesleyan University, Lafayette College, and the University of Virginia.

He also served as Officer of the Department of State, Assistant Chief, Division of Dependent Area Affairs; secretary of the Trustees of the United Nations, San Francisco Conference on United Nations Organization, and as secretary of the United Nations Food and Agriculture Organization Conference in Quebec.

He was a Fulbright lecturer in the Summer Session of Anglo-American studies at Nice, France, and delivered lectures in Paris and Brno, Czechoslovakia. He had been a member of the American Political Science Association and of the American Historical Association.

U.S. Jets Slam Red Gun Posts

(Continued from Page One)

U.S. planes, and the third plane fired a missile. Results of the retaliatory strikes were not known, the command said.

The Ban Karai pass is 45 miles north of the demilitarized zone.

On Sunday, the command said, an Air Force F4 Phantom escorted a reconnaissance plane attacked an anti-aircraft gun position and a missile radar site with bombs after the radar fired on the U.S. planes and radar tracking was detected. This attack was near the coastal city of Dong Hoi, 45 miles north of the DMZ, and again the results of the attack were not known.

The command said two missiles were fired Sunday at an Air Force F105 fighter-bomber and three at an Air Force OV-10A aircraft plane operating along the Laotian border with North Vietnam, but both planes "took evasive action and avoided the missiles." The 50-foot Soviet "flying telephone poles" were fired from the Ban Karai pass and the other near the Ma Kua pass, a communications link.

U.S. B2B bombers kept up heavy attacks on the North Vietnamese building up a buildup along the western side of South Vietnam's central highlands, dropping 300 tons of bombs on the Vietnamese side of the border and others in Cambodia.

Church Speaker

Kenneth Nantel of Lakeville, Mass., will be the guest speaker at the supper meeting of the United Women's Guild of the Trinity Covenant Church on Saturday at 7 p.m. at the church.

Nantel is the founder and owner of Kon Nantel Furs Inc., The Country Fur Shop in Lakeville, Mass., and is the president of Nantel Mink Furs Inc., where he has been involved with raising prize mink skins since 1957 in Paines, Maine, and was employed as a bulldozer operator.

Survivors, besides his wife, are his mother, Mrs. Louella Lake of Houlton, Maine; three daughters, Jennifer Hanson, Leslie Hanson, and a Natalie Hanson, all at home; a brother, Charles Hanson, of Houlton, Maine; and two sisters, Mrs. William School of Enfield and Mrs. Zita School of Ellington Center, Conn.

Funeral services will be tomorrow at 2 p.m. at the Full Gospel Church, Ellington Ave., Rockville, The Rev. Richard G. Sand, pastor, will officiate. Burial will be in Ellington Center, Conn.

Briefs may call at the Park Funeral Home, 78 Prospect St., Rockville, tonight from 7 to 9.

Kalb Says China Shift Follows Years of Blunder

By JOHN JOHNSON (Herald Reporter)

With President Nixon's visit to Peking next month, the United States is about to do at least a partial about-face in its relations with China after 150 years in which "Enormous ignorance and arrogant government policy," a period dominated by "missionaries and merchants."

The speaker was Marvin Kalb, CBS news analyst and State Department correspondent. The forum was the annual all-day Connecticut Education Association conference, held Saturday at the Hartford Hilton.

At the same time that he described employment of the Nixon doctrine as an attempt "to make the obvious a virtue," Kalb termed the President's policy "a period of blunder and blunder."

Kalb said that he expects little of the trip. There may be some advances, they will not be disappointed by the trip. There may be some advances, they will not be disappointed by the trip. There may be some advances, they will not be disappointed by the trip.

Groundhog Hungry

With Groundhog Day, Feb. 2, still 19 days off, one of the little creatures took advantage of the weather for a practice run out of his burrow in Joseph Kravitz's yard at 178 Foster St., Wapping.

The sun was out, so Mr. Groundhog also saw his shadow.

Whether that portends six more weeks of winter seems debatable, at least by the night. Kalb stated. There has been a long period of inclement weather, but that part of the world has "proved to be neither a market place nor a mission field."

School Board To Consider Nurse Policy

Tonight's Board of Education meeting will be held at 8 in the Bennett Junior High School library, which is located in the East Side Room.

Several months ago, the board adopted a policy permitting staff members to assist school nurses in administering medication to students. State law, the board believes, requires approval of the administrative procedure effecting implementation of the policy.

The board will receive reports from the personnel and finance committees on budget workshop reports, teacher negotiations, and from the education committee on the proposed policy to be given by Principal Allan Cone; and from the building and sites and communications committee.

Man Arrested In Disturbance

Thomas J. Dalaidi, 29, of 9 Burke Rd., Rockville, was arrested Sunday by York police. He was charged with disorderly conduct in connection with a complaint from a business establishment on Windsor Ave., police said.

He was released on his promise to appear in Circuit Court, Gloucester, Feb. 1.

Glennette Dr. Vernon, was arrested Saturday and charged with disorderly conduct in connection with a complaint from a business establishment on Union St.

Steven R. Martel, 19, of Bonaparte St., was arrested Sunday with passing in a no-parking zone. He is scheduled to appear in Circuit Court, Rockville, Feb. 15.

Girl Struck By Vehicle Still Critical

A 13-year-old Manchester girl was still in critical condition Saturday night at Manchester Memorial Hospital, where she was admitted Saturday night after being struck by a car while she was crossing the street in front of her home.

Police said the girl, Ruth Lorey, 195 Bent St., was a passenger in an auto that stopped on the west side of Benton highway. It was about 11 p.m. when the car was hit by a northbound car driven by Edward E. Contreras, 17, of Lenox St. Contreras was reported to be in custody.

The accident is still being investigated.

Mayor Joins Opponents Of Fare Hikes

South Windsor police reported that someone broke into two trailers parked on the site where the Ronsari Construction Company is installing sewer lines on Avery Rd.

Police said a control head, microphone and a speaker were taken sometime after the crew ceased operations for the day.

On Saturday, police said windows were broken in the trailers. Chief John Kerrigan said he received reports that children were seen in the area.

Richard Mair, of Lewis Dr., South Windsor, reported that someone took a tool box and reverberator from the site which was parked in his driveway.

Woman Sought In Hughes Case

(Continued from Page One)

It is to be genuine. Then he flew to his home on the island of Ibiza off the Spanish coast.

Living's lawyer, Martin S. Aeternum, said the author he is investigating the case.

All three incidents are being investigated by South Windsor police.

Military Fleet Gets Big Hunk of Defense Budget

Spacemen Turn Earthward In Hunt for Reusable Craft

WASHINGTON (AP) — The President Nixon's proposals space agency is turning its \$200 million—double the energy from moon to earth 1972 figure—the detailed design and development of a space shuttle, including the reusable rockets to reusable spacecraft, a four-man craft able in the \$2-billion budget program to take off like a rocket, fly in space and return to earth like a space shuttle and land.

For the next six years, NASA is expected to cost \$5.6 billion. The 1973 budget request is only slightly higher—by \$113 million—than the estimate for the further development of NASA's spending in the 1972 fiscal year. NERVA, the nuclear engine on the space shuttle, is expected to cost \$1.4 billion. The program "Orion" of the outer planets, is expected to cost \$2.5 billion.

Budgets Since 1971

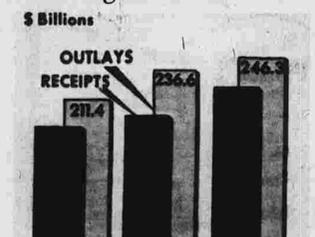

Chart estimates the sources and expenditures of President Nixon's \$246.8-billion budget for fiscal year 1973. Coin at upper left indicates 38 cents of every revenue dollar will come from individual income taxes, 26 cents from social insurance taxes and contributions, and 14 cents from corporation income taxes, followed by borrowing, excise taxes and other sources. At lower right, coin shows 45 cents of every dollar will be spent on human resources such as education, manpower, health, income taxes, 26 cents from social insurance taxes and contributions, and 14 cents from corporation income taxes, followed by borrowing, excise taxes and other sources. At lower right, coin shows 45 cents of every dollar will be spent on human resources such as education, manpower, health, income taxes, 26 cents from social insurance taxes and contributions, and 14 cents from corporation income taxes, followed by borrowing, excise taxes and other sources.

Budget in Brief

WASHINGTON (AP) — Here is a look at President Nixon's special revenue sharing in his 1973 budget in brief:

SPENDING—Total \$246.8 billion, up \$9.6 billion over the 1972 fiscal year.

REVENUES—The administration proposes a cut in expenditures to collect \$220.8 million. The direct arms aid from the tax system, an program would be cut by \$200 million. But this would be made up by \$200 million in new money.

DEFICITS—For the current year by a \$212-million increase in fiscal year, the deficit is estimated to be \$212 million. The deficit is estimated to be \$212 million. The deficit is estimated to be \$212 million.

Science Program

WASHINGTON (AP) — By harnessing science and technology to the service of man, the Nixon administration's research and development budget is aimed at an easier, healthier life in the world to come.

The budget calls for spending \$2.5 billion for research and development in fiscal year 1973. The program would emphasize development and production of improved military aircraft, including short-take-off-and-landing and vertical-take-off-and-landing aircraft, and jet transport, flight procedures and noise reduction.

U.S. Overseas Arms Aid Headed for Major Cut

WASHINGTON (AP) — The American overseas arms-aid program will take a major cut under President Nixon's proposed 1973 budget, but the difference will be made up by an increase in military-related economic assistance.

Vietnam and Laos are included as the major part of the \$2.2 billion requested in the Defense Budget for direct military support for other nations will go to those two countries.

For economic-development assistance, commonly known as "aid," the President's fiscal 1973 proposals call for spending \$1.47 billion, compared to an estimated \$1.54 billion for 1972.

Deficits Show In 2 Years

WASHINGTON (AP) — President Nixon set Congress an election-year defense budget for fiscal 1973 that would force the government to borrow \$7.8 billion to fund the program.

The message was stated with a note of urgency in a letter to Congress from the President's budget director, Fred S. Hoffman.

"I think such time as there is to agree limits on strategic forces, we must prepare to meet the challenge of the Soviet threat," Nixon said in a reference to the U.S. nuclear arms-control negotiations.

The President said his fiscal 1973 budget for the new 1973 fiscal year starting July 1, 1973, "represents America's actual military needs, and offers the best way to meet the challenge of the coming generation."

Nixon's proposed spending level for fiscal 1973 is \$246.8 billion, but the budget he submitted a year ago. But he also requested a special extra appropriation of \$7.8 billion for the current year.

The extra appropriation will be used to fund the development of a new class of huge submarines carrying nuclear missiles, and to assist the research of the 3,000-mile range weapons now mounted in the Polaris subs. It also will fund the purchase of a new class of nuclear submarines.

Nixon's proposed spending level for fiscal 1973 is \$246.8 billion, but the budget he submitted a year ago. But he also requested a special extra appropriation of \$7.8 billion for the current year.

Slicing the Pie

New Controls To Cost \$25.3 Million

WASHINGTON (AP) — President Nixon's wage-price controls will cost \$25.3 million in fiscal 1973 and maybe more, the new budget sent to Congress today discloses.

In the fiscal year that ends June 30, the cost of the controls is estimated at \$18.7 million, covering most of the year since Nixon imposed the controls last Aug. 15.

The fiscal 1973 budget request would provide money for the controls for the duration of the program, which would last through March 31, 1973. But George Shultz, director of the Office of Management and Budget, told newsmen the money actually is for 10 months. He said this does not mean that the administration necessarily expects the controls to end in April.

Education Facing Challenges

WASHINGTON (AP) — For the third straight year, the Nixon administration's education budget is geared to a revenue-sharing concept that Congress has shown little interest in enacting.

President Nixon is proposing outlays of \$3.2 billion for education programs in fiscal 1973, a paper increase of \$40 million that would do little more than maintain most programs at present spending levels.

The main emphasis in the education budget is on the "revenue sharing" program, which is a program for the greater administrative flexibility "not entailed state revenue sharing," said the Treasury Secretary John B. Connally. "When that time comes, I don't know."

Besides the uncertainty about the duration of the controls, there is another reason why the program has attracted little support. It has attracted little support. It has attracted little support. It has attracted little support.

Nuclear Power Boosted

WASHINGTON (AP) — President Nixon set Congress an election-year defense budget for fiscal 1973 that would force the government to borrow \$7.8 billion to fund the program.

The message was stated with a note of urgency in a letter to Congress from the President's budget director, Fred S. Hoffman.

"I think such time as there is to agree limits on strategic forces, we must prepare to meet the challenge of the Soviet threat," Nixon said in a reference to the U.S. nuclear arms-control negotiations.

The President said his fiscal 1973 budget for the new 1973 fiscal year starting July 1, 1973, "represents America's actual military needs, and offers the best way to meet the challenge of the coming generation."

Nixon's proposed spending level for fiscal 1973 is \$246.8 billion, but the budget he submitted a year ago. But he also requested a special extra appropriation of \$7.8 billion for the current year.

The extra appropriation will be used to fund the development of a new class of huge submarines carrying nuclear missiles, and to assist the research of the 3,000-mile range weapons now mounted in the Polaris subs. It also will fund the purchase of a new class of nuclear submarines.

Nixon's proposed spending level for fiscal 1973 is \$246.8 billion, but the budget he submitted a year ago. But he also requested a special extra appropriation of \$7.8 billion for the current year.

Aim To Secure Peace

WASHINGTON (AP) — This table from President Nixon's budget for fiscal 1973 shows in summary the planned outlays of federal agencies. The estimates are compared with estimated outlays for fiscal years 1971, and actual outlays in fiscal 1971 in millions of dollars.

Agency:	1971	1972	1973
Actual	Est.	Est.	Est.
Legislative Branch	384	427	408
The Judiciary	142	171	189
Executive Office of President	4,727	4,831	4,831

Ecology Funding Limited

WASHINGTON (AP) — What ever new departments President Nixon may propose in his forthcoming special message on the environment, chances are they won't be expensive.

Nixon's 1973 budget proposes only limited increases in existing environmental programs and anticipates small supplemental requests if Congress passes any of the 15 proposals left over from last year's environment message.

Ecology Funding Limited

WASHINGTON (AP) — What ever new departments President Nixon may propose in his forthcoming special message on the environment, chances are they won't be expensive.

Nixon's 1973 budget proposes only limited increases in existing environmental programs and anticipates small supplemental requests if Congress passes any of the 15 proposals left over from last year's environment message.

By administration calculations, "environment and resource" programs throughout the government obtain some \$8.8 billion in the 1973 budget, an increase of \$500 million in outlays over fiscal 1972.
