add very pleased with the rapid response The facts are there. and service received from the town

Talking with some friends in this area, I find that my name was used when the petition was circulated saying when I had a fire in my home that I was satisfied and pleased with the response from the Eighth District firehouse

Friends and neighbors, all I had were two firemen, one on the engine and a volunteer in a pickup truck, to answer my fire call. I was never so disappointed in my whole life. I used my own fans to blow smoke out of my own house. At the time I spoke to the chief of the Town Fire Department about better fire protection and he told me at that time that plans were in the works to someday build a firehouse in this area and man it with paid

Do you people realize that the response will be much quicker, and that within a short period of time a firehouse will be a must in the Buckland area? This firehouse has been advised by the New England Fire Underwriters and not the Town of Manchester for many years.

Friends, I firmly believe that a paid fire department is the best for the Buckland area people, just as a town police force, the town educational system, the refuse collection system, and the town highway department do their many chores for the whole town.

The sanitary sewer system totally takes care of all the sewers in the town, including the Eighth District. The water department will soon take over serving the Eighth District with water at a great saving to the people in that area.

So my question is this, what service does the Eighth District provide? I would answer at best a mediocre volunteer fire department. I am sure what is best for all the people in Manchester is a united fanchester. Let's do away with the Eighth District, I say let's consolidate for a better Manchester.

My friends, may I bring up one more tem. If the Town of Manchester should ight this matter through the courts, let it be known that Buckland area people who sign a petition would have to stand the forces reached the outpost which is now tantly faded into relative obscurity, and it Time Magazine has even treated its ourt costs, not the Eighth District. CANCER...Don't Depend On U.S. For Help!!

Statistics show that from 1940 to 1973 more people are lying of cancer per 100,000 per year. Put another way 25,000 more Americans now die of Cancer EACH year who would be alive if the RATE of deaths per capita had staved the same as it was in 1940! Take a closer lool when experts state that cancer deaths are on th decrease. The real fact of the matter is that the mortality rate for several SELECTED TYPES of cancer did decrease from 1940 to late 1960's. But the OVER-ALL RATE PICTURE has increased.

National Cancer Institute recently estimated that 75% of all cancers is ENVIRONMENTALLY induced by such exposures as cigarettes, chemicals in foods, pesticides, preservatives, drugs, industrial air, car exhaust, work place pollution and

Many of these agents are stored in the body from 10 to 20 years before the cancer growth is triggered off. A latency period exists that fools you and you find it difficult to determine the casual relationship. In other words...90% of cancer research dollars are really being spent for attempted cures of diseases caused by yester The South Windsor Chapter of days exposures, while neglecting today's exposures, Students interested in hearing (AFS) will sponsor a spaghetti which left unchecked, will result in more cancer in the future. Simply put...we are going in circles!! The academic community is finding out that chemotherapy desserts, Sept. 26 from 5:30 to 7 p.m. at South Windsor High and radiation treatment, although is some help for the short term needs, are not the answer for the long term cancer control. They are realizing that there must be an The American Abroad Program offers a local student the opportunity to live in a Abroad returned who spent the immunological defect that is preventing the body from fighting the spread of cancer.

High cancer rates have been found in clusters around industralized centers of the United States: The National Cancer Advisory Board noted in March of 1975 that: "Only 10% of the National Cancer Program budget is being used for the study of environmental carcinogenicity, particularly were it concerns chemical carcinogens. In spite of the world wide recognition of their importance it would seem that the problem has

been accorded a low priority in the National Cancer Program." The literature has shown that Vitamin C and Vitamin E offer some protection from radiation pollution and prevent the formation of nitrosamines in the stomach, only if taken immediately before eating food containing nitrites nad nitrates. Perhaps the basic clinical research will attack the real problem sooner or later. Meanwhile read your labels on foods and maintain a nutritionally good diet.

"If tainly a nice one to have, and we, as a staff, felt very good you know that, then you just run to about coming out on top. After playing well last week and losing we felt that as a team we needed a victory now in daylight, wherever you find it." Much of the talk in the Oakland order to be sharp to enter league competition. locker room was the establishment of Defensively, we played a fine game. We had excellent a running game that had been suspect

field position throughout and although we allowed one long march, we were able to cinch up our straps and play hard defense when we needed it at the goal line. John Madden, playing at a middle guard, and Dave Derewianka, at cornerback, gave us a tremendous game. John alone caused fits in South Windsor's backfield and accounted for losses time and again and Dave showed tremendous improvement over last week's performance in coming up to develop the play on the corner. We also got another good game from our defensive ends, Bob Hawkes and Rick Walsh, as they applied a pass rush and prevented South

Windsor's backs from running the ends. As I have mentioned field position now for the past two weeks, I must certainly praise the young man who allowed our defense to take over each time with such outstanding field placement. Ed White had what was certainly his most spectacular day of punting. With kicks averaging 51 yards, he had a field day the likes of which every punter dreams. When our offense was unable to penetrate, toward the goal as occurred frequently, Ed boomed kicks deep toward the goal line and kept the Bobcats in the hole.

Other than that our offense was rather lackluster. We were unable to muster any resemblance of a consistant drive Quarterback Wayne Ostrout connected on two scoring passes, one to White and another on an outstanding catch by Steve Dawson, and also did a commendable job of keeping the ball on his rollouts to gain valuable yardage. So totally, we felt to have played a game far from perfect and still win over a good South Windsor club was an accomplishment in itself.

Saturday we begin our CCIL encounters and start it all off against Simsbury. Simsbury, new to our league this year, is perennially a top notch club and this year should be no exception. They are coming back from a mediocre season with a lot of veterans led by halfback Bill Garrity and quarterback Scott Morrison. The key to this game will be how well our defensive unit, and particularly our secondary, can contain Simsbury's Wing-T attack. Simsbury will bring into town the first team that will not outweigh us, and also a number of players who play both offense and defense. So on that account, I look for a good game.

> By John LaFontana EAST CATHOLIC

It was a very disappointing Saturday for us last week against Northwest Catholic. After riding high all week after beating Manchester, it was a great letdown to be

beaten, especially 20-0. The reason for our defeat was a sputtering offense and a defense that spent so much time in the game that it was a tribute to them that Northwest didn't score more points and run up more than the 260 yards that they did. Any time you hold a Wishbone option team to 260 yards in total offense, your defense has done a pretty good job. The main problem of our offense bogging down was the

fact that we simply ran out of running backs, due to injuries and the secondary cause was simply poor execution and missed assignments. We will have to do some reshuffling for this Saturday's

DEAR ARRY: I read in your column where someone said gentlemen used to prefer blondes, but today it seems that ntlemen prefer gentlemen. And you said, "No. I think most gentlemen still prefer blondes, brunettes and Abby, I am greatly disappointed in you. Don't you realize that you have a lot of black readers who don't happen to be

DEAR LOLLIE: The letter to which you refer appeared in Ann Landers' column, not mine. And Lollie, dear, please don't be too hard on my twin sister because I have seen black women with beautiful red and even blonde hair. Of course, it's not their natural color, but then, neither is mine.

ndes, redheads or brunettes?

DEAR ABBY: I hear so much criticism of young couples who live together first and then have lovely church weddings, I hope you'll be fair and let an opposing point of After living together for five years, Bill and I were

married last June. We had 65 guests at a lovely church wedding, followed by a garden reception in the back yard of our home. (We paid for everything ourselves.) We both wore white to symbolize the purity of our first and only marriage. We waited for five years to be sure that what God had joined together no man could tear asunder. Standing on that altar in the presence of God, our families and friends was a spiritual experience we shall cherish all our lives as the ultimate commitment. Everyone present said it was the most meaningful and beautiful wedding they had ever attended.

Some would say that Bill and I had lived in "sin." We think it's a greater sin for married couples to live together in a loveless union, while committing adultery with others. DEAR ABBY: I have a problem that I am sure is shared by thousands. In fact, I have been on both sides recently.

Democratic hopeful visits Herald

To former Georgia Gov. Jimmy Carter, a Democratic presidential hopeful assassination attempts are a fact of political life. However, said Carter in a visit today to The Manchester Herald, if he were in President Ford's shoes, he'd spend more time in Washington minding the store. Shown here with Herald political writer Sol R. Cohen, Carter averages six days a week campaigning and already has visited 43 scates since he lett the governor's office in January. He told Cohen he opposes the prohibition of citizens to own guns, favors the registration of handguns and is for prohibiting ownership of guns by people who have been involved in any sort of a crime using a weapon. Carter spent a whirlwind eight hours in Connecticut, stopping in Vernon and Hartford, in addition to Manchester - where he formally opened Jimmy Carter for President Headquarters at 164 E.
