Negative: The NFL made an exhaustive study during the 1978 exhibition games, selecting 166 plays in seven nationally televised games that looked favorable for review on instant replay. It found that four percent of them might have reversals of the original decision. After deliberation, the owners decided that instant replay in this area wasn't feasible now. Coach Don Shula simply opted for a 23-year-old with a strong leg (he had a 58-yard field goal at Oklahoma) over a 35-year-old who has been one of the NFL's great booters but has some range limitations. The rookie can also punt in the clutch. But you Schamann has had early season jitters and missed some boots for extra points, after setting an NCAA record 125 straight. Shula probably has some second thoughts. Gai
