## Next to gas drying, you're the best energy saver around.

If you want to become a smart energy consumer, why not start right in your own home. Take your clothes dryer, for instance. To help conserve valuable energy, never dry a few things at a time Instead, make sure you wait until you have a full load. And if you're thinking of replacing your old dryer, here's another energy saving reminder... be sure to stay with gas.

A modern gas dryer features automatic pilotless ignition. That means it uses gas only when you turn it on.

Which saves you a lot of energy. And because gas dryers help clothes come out virtually wrinkle free and ready to fold or hang up. you'll do less ironing and use less electricity.

> So make natural gas part of your very own energy conservation program. See your gas appliance dealer or CNG today.

Runaway Daughter Has Happy Return DEAR READERS: With Thanksgiving behind us, I

am mindful of my many blessings, not the least of which is the privilege of writing this column. Almos

daily I receive some heartwarming letters. I want to

share this one from my files to publicize again one of the most gratifying operations in existence: DEAR ABBY: Our problem daughter, not quite 17, ran away from home 14 months ago. She had been giving us a ough time for about a year - skipping school, staying out late and lying to us constantly. After a noisy scene, she stormed out of the house with only the clothes on her back. We didn't have a clue as to where she went.

Only a parent who has lived through this kind of nightmare can realize what we went through. After a year of heartaches and sleepless nights, we were told by the police to give up and assume she was dead. But parents never give up We continued to search and hope and pray that she'd

Well, our prayers were answered when, out of the blue, we received a telephone call from someone who said he was a volunteer with Operation Peace of Mind in Houston. (W. live in Michigan.) We were told that our daughter had read of the toll-free number in "Dear Abby" and she wanted to let us know that she was well and happy in Fort Lauderdale, The volunteer said our daughter would call them again on the following morning in case we had a message for her. We told him we would welcome a collect call from her. Sure enough, she called us the next day! She sounded wonderful and said she was working and going to night school to finish her education. This story has a happy ending. Our daughter is coming for Christmas! Abby, will you please publish that toll free number again so other runaway kids can establish communications with their families? Our daughter said that she had seen your

column with the number posted near telephones where runaways hung out. We will never be able to thank you enough for giving us the happiest holiday we've ever had' GRATEFUL IN MICHIGAN

DEAR GRATEFUL: With pleasure. Runaways, call this toll-free number: 1-800-231-6946. An operator will take your call and telephone your parents anywhere in the United States with a message from you. There will be no lecturing or re-criminations. Your call will not be traced. And only one question will be asked: "Do you need anything f you do, you will be told where you can get it, free. I repeat, no attempt will be made to contact you o ring you back home - regardless of your age. If you are a runaway, I beg you to forget the past and send a message to your parents now. They will alcep better tonight and so will you. And you will all have the best Christmas you've had in years. God

P.S. Operation Peace of Mind was established eight years ago by a handful of public-spirited volunteers with the support of the governor of Texas. To date it has placed approximately 300,000 calls from runaways, assuring their families that they are OK.
