CELTICS BUZZ HORNETS

NBA Roundup

BOSTON (AP) — Danny Ainge scored 25 points, leading six Boston scorers in double figures, as the Celtics rolled to a 115-92 victory over Charlotte Friday night, handing the fledgling Hornets their 10th consecutive road loss.
The Celtics, beaten in two previous starts at Boston Garden, improved their home record to 11-6 with big scoring outbursts in the first and fourth periods.
Reggie Lewis, starting in place of injured Larry Bird, had 18 points, Kevin McHale 16, Robert Parish 12 and Jim Paxson and Brian Shaw 10 apiece for Boston.
Kelly Tripucka led the Hornets with 25 points. Rex Chapman and Robert Reid added 13 apiece.
The Celtics opened a 19-point advantage en route to a 33-16 first-period lead, then survived a 36-point second quarter by the Hornets for a 58-52 halftime lead.
The Hornets, 1-14 on the road and 8-22 overall in their first NBA season, closed to within 77-73 late in the third period, but the Celtics settled down and took an 82-75 lead into the final quarter.
Boston then went on an 11-3 surge and breezed the rest of the way while scoring 33 points in the final 12 minutes.

ON THE DRIVE — Boston's Reggie Lewis, right, drives for the basket past Charlotte's Kelly Tripucka, center, as the Celtics' Robert Parish looks on during their game Friday night at Boston Garden. The Celtics won, 115-92.

INDIANAPOLIS (AP) — Chuck Person scored 28 points Friday night, including 14 in a game-breaking third quarter, as the Indiana Pacers crushed the Los Angeles Clippers 123-88 and gave Dick Versace a victory in his NBA coaching debut.
It was only the seventh victory in 30 games this season and the biggest winning margin in more than seven years for the Pacers, who on Thursday announced the hiring of Versace, a former Detroit assistant, to succeed interim coach George Irvine.
Indiana scored the first six points of the game and never trailed the Clippers, whose No. 1 draft pick, Danny Manning, was placed on injured reserve earlier in the day with a damaged knee ligament suffered Wednesday.
The Pacers held a 10-point halftime lead, then blew out Los Angeles in the third quarter, steadily building the lead. A 3-point, half-court shot at the buzzer by rookie guard Everette Stephens gave Indiana a 94-87 lead after three quarters, then another 3-point basket by John Long pushed the Pacers lead to 101-89 early in the fourth quarter.
Indiana's biggest lead was 41 points, 123-82, and the final margin was the Pacers' largest since a 36-point victory over Utah in December 1981.
Wayman Tisdale had 22 points and Herb Williams grabbed a career-high 19 rebounds as the Pacers beat the Clippers 74-53 off the boards.
Rookie guard Gary Grant led the Clippers with 19 points and Benoit Benjamin had 14.
The Clippers, losing their fourth straight game, made only one serious challenge in the first half after the Pacers took a 13-2 lead. A basket by Benjamin and two by Grant cut Indiana's lead to 19-16, but a basket by Person and two free throws by Williams started a 13-4 Indiana streak.
See CELTICS, page 47

Stephens rookie of the year

CINCINNATI (AP) — John Stephens, the New England Patriots running back who won The Associated Press Offensive Rookie of the Year earlier this month, took NFL Rookie of the Year honors on Friday.
Stephens became the first Patriots rookie to rush for more than 1,000 yards when he compiled 1,168 this season, second in the AFC and fifth in the league. He is the third winner of the award and first offensive player to get it.
Previous winners were linebackers John Oferdahl of Miami and Shane Conlan of Buffalo.
Stephens won \$25,000, which was designated for presentation to the Roxbury Comprehensive Community Health Center in Boston. The donation will be used to help facilitate the Adolescent Life Option Program and the center.
"I've been blessed to make it to the NFL," Stephens said. "I want to share it with someone. I think the kids at the center can relate to the things I'm telling them. I didn't have anything handed to me on a silver platter and, once they know that, they understand how hard you have to work."
Stephens has been involved in programs that counsel youths on teenage pregnancy and drugs. He previously donated \$1,000 to the center after being named Patriots Rookie of the Year.
"If someone else is there to help you, to say 'I'll say no if you do,' it has to help," Stephens said. "I tell them I'll feel the same way you feel now. I let them know I experienced the same things."
Hall of Famer Gale Sayers presented the award.

Top court to review abortions

WASHINGTON (AP) — The Supreme Court, acting in an appeal urging reversal of its landmark 1973 decision that legalized abortion nationwide, today agreed to review a Missouri law regulating abortions.
The justices said they will study a federal appeals court ruling that struck down key provisions of the state law.
Even before today's action in the appeal filed by Missouri officials, the case had become the most-watched battleground in the continuing political war over abortion. Justice Department lawyers also are urging the high court to use the case as a means of undoing its 1973 ruling, called Roe vs. Wade.
But nothing in the brief order issued today suggested that the justices will reconsider Roe vs. Wade.
The court's eventual decision, expected by July, could resolve the Missouri controversy without significantly changing the 1973 decision or other past rulings on abortion.
The 8th U.S. Circuit Court of Appeals last July 13 struck down, among other aspects of the Missouri abortion law, these five provisions:
■ A ban on using public hospitals or other government-run facilities for abortions not necessary to save a woman's life.
■ A ban prohibiting any public employee from performing or assisting an abortion.
■ A ban on using taxpayer money for "encouraging or counseling" women to have abortions.
■ A requirement that doctors planning to abort a fetus believed to be older than 19 weeks test for weight and lung capacity to determine whether the fetus is capable of surviving outside the womb.
■ A declaration that "the life of each human being begins at conception."

LEAD TESTING — Michael Todd, a chemist at the town's water treatment plant off Spring Street, tests water for lead content in a machine called the Parkin-Elmer 3030 Atomic Absorption Spectrophotometer. The federal Environmental Protection Agency is considering new standards for lead.

14 homes would fail limits proposed for lead in water

Editor's note: This is the first in a three-part series on lead levels in town water and how residents can protect themselves from this health threat.
By Andrew Yurkovsky and Nancy Concelman Manchester Herald
Tests on 104 homes in Manchester for water lead levels show that 14 — or 13.5 percent — would exceed new standards proposed by the federal Environmental Protection Agency.
Of the homes tested since June 1988, six are over the current minimum, including a house built in the 1940s that had a first-draw sample containing 300 micrograms of lead per liter of water, said Laura A. Eddy, laboratory director of the town Water Division. The minimum standard now allows for 50 micrograms per liter.
The EPA, prompted by a growing concern over the effects of lead poisoning, is considering changing the minimum standard to 10 micrograms per liter in the first sample of water drawn each day. The proposed change, which would be acted on early this year by the EPA, has communities scurrying to determine the effects of a new standard.
Lead poisoning can retard mental development and in extreme cases cause death.
Although samples taken after letting the water run showed that nearly all of the local homes tested so far would be in compliance with the proposed regulation, "Ten of the taps is pretty tough," Eddy said.
Of the homes tested so far, about 49 have lead service pipes or pipes of made of unknown materials, Eddy said. Lead in drinking water comes primarily from pipes containing lead and from lead solder used in piping.
Homes built shortly before a 1986 ban in the state on the use of lead solder are also in that high-risk category. Lead in drinking water is generally less of a problem in much older homes because much of the lead in the solder has already leached away, officials say.
The majority homes we found appreciable amounts of lead in were built between 1981 and 1985," Eddy said.
Of the 12 homes in that category that were tested, three had over 50 micrograms per liter in first-draw samples, two had over 20 micrograms and three had 10 to 20 micrograms. Of the 104 tested in total, 90 were under 10 micrograms per liter.
Lead poisoning can retard

No tax hike in Reagan's budget plan

WASHINGTON — President Reagan today sent Congress a \$1.13 trillion farewell budget that attacked the biggest economic failure, the federal deficit, by offering up again some of his cherished ideas about reducing the size of government.
The president's ninth and final spending plan — out of balance like all of his others — is largely an academic exercise, certain to be overhauled to reflect the priorities of a Democratic-controlled Congress and an incoming president, George Bush, after his inauguration Jan. 20.
Bush aides said that the president-elect agreed with the general thrust of the Reagan document, especially the absence of any new taxes, but still intended to submit his own recommendations after taking office.
If Reagan's ideas were adopted in their entirety, the deficit would fall to \$2.5 billion in the 1990 fiscal year, the lowest since 1981 when he took office.
This budget shows that a gradual elimination of the deficit is possible without raising taxes, Reagan said in his budget message. "It can be done in a reasonable, responsible way — with discipline and hard work. New taxes are not required."
In his proposals for the fiscal year that starts Oct. 1, 1989, Reagan advocated terminating a total of 82 government programs, slashing spending on farm programs by \$9.7 billion and trimming the growth in Medicare and Medicaid, the giant health programs, by about \$5 billion. The Pentagon's budget, on the other hand, was awarded a big spending increase.
The budget would provide increased spending for two of the government's most pressing new problems, halting outbursts of insolvent savings and loan institutions and cleaning up contaminated nuclear weapons plants. AIDS research and space exploration would also receive increases.
While Reagan was presenting his budget only 11 days before leaving office, many of its broad outlines were expected to be adopted by President-elect Bush, who has said he will unveil his own proposals to a special joint session of Congress soon after taking office.
In two key respects, the two budgets will be alike. Both men pledged to cut the deficit, which is projected to climb this year to \$161.5 billion, without resorting to new taxes and without touching Social Security.
But Bush is expected to seek a smaller increase in defense spending while allocating more money in such areas as child care, cleaning up the environment and housing the homeless.
Skeptical Democrats believe Bush will find it impossible to fulfill all his campaign promises.
See BUDGET, page 10

British jet crashes as both engines fail

KEGWORTH, England (AP) — Both engines on a brand-new Boeing 737 apparently failed before the plane crashed along a highway, killing at least 44 people, officials said today.
Investigators said the chances of double-engine failure were about 10 million to one.
"So far the evidence, although by no means conclusive, is consistent with the right engine having stopped before impact and there are also signs of fire in the left engine," Transport Minister Paul Channon said in an interview on British Broadcasting Corp. television.
Officials raised the number of confirmed dead to 44 late today. Eighty-two people were injured in the crash.
Investigators recovered the flight recorders from the wreckage, hoping they might shed light on what caused the accident.
Firefighters pumped foam onto the crumpled jet to prevent seeping aviation fuel from catching fire.
The Bellast-bound British Midland Airways jet carrying 126 people broke into three pieces on the edge of Britain's main north-south highway, the M1, in central England.

Erlis and Patricia Keeney were 'warm,' 'caring'

By Nancy Concelman Manchester Herald
Ferguson Road, Manchester, were killed on Route 10 when their car collided with a minivan driven by Jason Lipos. 26 of 16 Orchard St., Manchester, Lipos was listed in stable condition this morning at Hartford Hospital. The cause of the accident is still under investigation. Vernon police said today.
Keeney would often call the department or stop by to see how things were going even though he couldn't work, Young said.
"Ernie was the guy who knew the most about the system," Young said. "Ernie was very dedicated. When it was 17 below or 100 degrees, he was working."
Melvin Lobough, an equipment operator with the department, worked with Erlis Keeney for 22 years.
"Ernie was very warm, very caring," said Richard M. Bolduc of Newington. Patricia Keeney's son by an earlier marriage. "They did a lot for a lot of people."
Erlis, 54, and Patricia, 58, of 48

## About Town

### Diabetes Club to meet

The East of the River Diabetes Club will meet Tuesday at 7:30 p.m. in the H. Louise Ruddle Auditorium of Manchester Memorial Hospital. Loren Schneider, M.D., will speak on "The Diabetic Foot." Dr. Schneider received his medical degree from the Illinois College of Podiatric Medicine and had his residency in Corpus Christi, Texas. He is board certified in surgery and has been practicing in Manchester for nine years.

The East of the River Diabetes Club, sponsored by Manchester Memorial Hospital, meets on the second Tuesday of each month at the hospital. Meetings are free and open to the public. For more information, call 648-9458.

### Bolton Booster club meets

The Bolton Booster Club will meet tonight at 7:30 p.m. at Herrick Park. The Booster Club also has a display at the Bentley Memorial Library on Bolton Center Road.

### Depression support offered

Depression Anonymous, a support group for those suffering from depression, meets every Tuesday at 6:30 p.m. in the Love Program Center, Room CL 121a, at Manchester Community College. The group follows a 12-step program modeled after Alcoholics Anonymous.

No dues or fees are required. For more information, call Marie B. at 644-9046.

### DAR slates meeting

The Orford Parish Church of the Daughters of the American Revolution will meet Thursday at 1:30 p.m. at the home of Mrs. Grace Oviette, 166 Kennedy Road. Mrs. Jack Stover will give a talk entitled, "You, Too, Can Learn to Live Your Ancestors' Histories" with Mrs. Chester Oskorn. Mrs. Francis Akin, Mrs. Howard Amos, Mrs. Mark Hill, Mrs. Warren LeFort and Mrs. Harold Mayo.

### Overeaters get help

Overeaters Anonymous meets at the First Baptist Church, 246 Hilltown Road, every Monday, Tuesday, Wednesday, and Friday at 1 p.m. and Thursday from 7 to 8 p.m. The program is free and is open to anyone who wants to stop overeating. For more information, call 524-4544.

### Art exhibit planned

The Fine Arts department of Manchester High School will sponsor a senior art exhibition Tuesday in the Lindgren Gallery at Hill Junior High School. A formal reception, open to the public, will be from 7 to 8:30 p.m. to honor the artists and their families. The show will be on display from Wednesday through Monday, Jan. 30, during school hours.

### Blood donors are needed

There will be an American Red Cross blood drive on Tuesday, Jan. 17 from 1:30 to 6:30 p.m. at the Community House of the Second Congregational Church on Route 44A in Coventry, opposite the Highland Market.

### Public Meetings

Meetings scheduled tonight:  
**Manchester**  
Planning and Zoning Commission, Lincoln Center hearing room, 7 p.m.  
**Andover**  
Wetlands Commission, Town Office Building, 7:30 p.m.  
**Coventry**  
Planning and Zoning Commission, Town Office Building, 7:30 p.m.  
Board of Finance, Town Office Building, 7:30 p.m.  
Drug and Alcohol Committee, Second Congregational Church, 7:30 p.m.

### Lottery

Winning numbers drawn Saturday in lotteries around New England:  
Connecticut daily: 809. Play Four: 3102.  
Massachusetts daily: 4859. Megabucks: 7-10-11-16-19-24.

### Chance of snow

Manchester and vicinity: Tonight, cloudy. A 30 percent chance of snow. Low 20 to 25. Tuesday, cloudy and cold. A 40 percent chance of snow. High in the 20s. Outlook Wednesday, becoming mostly sunny, continued cold. High around 30.  
West Coastal, East Coastal: Tonight, cloudy with a 40 percent chance of snow. Low 20 to 25. Tuesday, cloudy with a 40 percent chance of snow. High around 30. Outlook Wednesday, becoming mostly sunny, continued cold. High in the 30s.  
Northwest Hills: Tonight, cloudy and cold with a 30 percent chance of snow. Low in the teens. Tuesday, cloudy and cold. A 30 percent chance of snow. High in the 20s.

Today's weather picture was drawn by Jessica Fort, 10, a fifth-grader at The Cornerstone Christian School.

### Obituaries

#### Patricia A. Keeney

Patricia A. Keeney and Erilis E. Keeney of Manchester died Friday (Jan. 6, 1989) in Vernon from injuries sustained in an automobile accident. Patricia Keeney was born Dec. 10, 1920, in Van Buren, Maine, and had been a resident of Manchester for 13 years.

She is survived by two sons and a daughter-in-law: Richard M. and Mary Bolduc of Newington and Thomas A. Bolduc of Hartford; a daughter and son-in-law: Deborah and Thomas Standin of New Britain; a brother, Thomas Martin of Alexandria, La.; a sister, Mrs. Loreta Knight of Limestone, Maine; two grandchildren; and several nieces and nephews. She was predeceased by two brothers: Edward Martin and Robert Martin.

Erilis Keeney was born in Manchester on Oct. 2, 1924, and was a lifelong resident. He was employed by the Town of Manchester Water Department for 33 years, and was a former member of the Manchester Lodge of Elks. Besides his stepchildren and grandchildren listed above, he is survived by four sisters, Mrs. Kenneth (Dorothy) Seaton, Mrs. Walter (Thelma) Weir, and Mrs. Frank (Acecynah) Venecianu, all of Manchester, and Mrs. Rudolph (Jane) Hany of Ellington; and several nieces, nephews, grandnieces and grandnephews. He was predeceased by two brothers, Lester O. Keeney and Albert H. Keeney.

The funeral services will be held Tuesday at 10 a.m. at the

#### Harold E. Livingston

Harold E. Livingston, 89, of East Hartford, father of Mrs. Robert (Eleanor) Lassen of Manchester and brother of H. Wallace Livingston of Coventry, died Saturday (Jan. 7, 1989) at an area convalescent home.

Besides his daughter and brother, he is survived by two sons, Harold K. Livingston of South Windsor and Ralph E. Livingston of Vernon; a sister, Mrs. Robert (Marion) Johnson of Hartford; 12 grandchildren; and 11 great-grandchildren.

The private funeral and burial will be held at the convenience of the family. A memorial service will be held Sunday at 2 p.m. in the Talentsville Congregational Church, Main Street and Elm Hill Road, Talentsville. There are no calling hours. The Holmes Funeral Home, 400 Main St., is in charge of arrangements.

Memorial donations may be made to the charity of one's choice.

#### Joseph S. Disipio

Joseph Steven Disipio, infant son of Mrs. Karen (Lips) Disipio of Manchester, died

Thursday (Jan. 5, 1989) at St. Francis Hospital and Medical Center, Hartford.

Besides his parents, he is survived by a sister, Kara Lee Disipio. The funeral will be private. The Farley-Sullivan Funeral Home, 96 Webster St., Hartford, is in charge of arrangements.

Memorial donations may be made to the charity of one's choice.

## Police Roundup

### Student charged with toting gun to school

A Manchester man turned himself in to police Friday night in connection with a gun incident at Manchester High School where he allegedly threatened another student with a .357-magnum pellet gun in November.

Police had issued a warrant Dec. 29 for the arrest of Orville R. Cousins, 18, of 14 Griswold St. He was charged with carrying or brandishing a facemile firearm, police said.

Police were called to the high school Dec. 2 to investigate reports that Cousins had brought a handgun to school with him, police said.

A signed affidavit by the victim states that Cousins took the gun out of his pants pocket during class one day and pointed it at the victim while the two were playing around.

Cousins was subsequently expelled Dec. 19 from school for the remainder of the school year by the Board of Education. Also, in response to the gun incident, school officials instituted a rule which prohibited students from wearing outer clothing such as jackets, hats and hooded sweatshirts in the school. That rule initially was the subject of protests by hundreds of students.

Cousins was released on \$500 bond and is scheduled to appear in Manchester Superior Court Wednesday, police said.

### Fire destroys barn near mall; 2 charged

Two area men were charged early Saturday in connection with a fire that destroyed a barn located just 80 feet from dynamite used to blast earth for the \$70 million mall under construction in Buckland.

Stratford developer John F. Bigley wants to build the luxury condos on 130 acres of land.

Some residents voiced concern that the condominiums would be built near the River. They said they fear the result would be a drop in the water table that could affect their wells. In addition, residents say sewage from the complex might contaminate wells.

To build the project, Bigley needs zoning permits and a wetlands permit to put a crossing over a brook at the site.

Kreisberg said it is unlikely an application presented to the PZC from a local citizens' group calling for a moratorium on such building will affect the project.

The application seeks a six-month moratorium on condominium and apartment complexes.

The structure collapsed and crossed over the brook into a field. A memorial service will be held Sunday at 2 p.m. in the Talentsville Congregational Church, Main Street and Elm Hill Road, Talentsville. There are no calling hours. The Holmes Funeral Home, 400 Main St., is in charge of arrangements.

Memorial donations may be made to the charity of one's choice.

## Thoughts

I am writing this letter mainly to parents. If you are not a parent please read on anyway. You may be one in the future or know someone that is and can help. The children of today are the future of our country tomorrow. When we are old what kind of society have we brought forth? We will be glad or we will be sad? God holds parents directly responsible to train their children up in the right way. Human philosophy claims that we are all basically good. God claims we are all born sinners. Parents need to teach their children right from wrong. If they do not teach then how can they teach their children? You cannot teach something you have never learned yourself. Our prisons are running over. Sexual diseases are more wide spread and deadlier than ever. Our country is at the point of moral decay. God says in his word, "He that sows his seed hates his soil. Without till correction from the child: for if thou beareth him with the rod, he shall not die. Thou shalt beat him with the rod, and shall deliver his soul from hell. Children learn very quickly if they do a good spanking they think very negatively or doing the same act again. The worst child abuse is just not caring. Child neglect."

## Coventry gets plan on condos

By Jacqueline Bennett  
Manchester Herald

COVENTRY — A hearing that has been delayed for one month will be held tonight on a proposed 260-unit condominium complex to be called Cotswold. Jonathan Kreisberg, chairman of the Planning and Zoning Commission, says.

"I doubt we (the commission) will be making a decision on the proposal but I do hope to close the hearing," Kreisberg said Sunday.

The hearing will start at 7:30 at the Town Office Building. The units are planned for a tract off Routes 6 and 44, near the Bolton town line.

The hearing, which was last scheduled for Nov. 28, was delayed because Town Planner Diane Blackman found in reviewing plans that more information was needed from the project developers. The hearing was rescheduled to give the developers time to gather that information, Kreisberg said.

The hearing has been continued twice. At a hearing Oct. 25 about 20 residents opposed the project. They said it would strain town services like fire and police protection and have a negative impact on the environment.

Stratford developer John F. Bigley wants to build the luxury condos on 130 acres of land.

Some residents voiced concern that the condominiums would be built near the River. They said they fear the result would be a drop in the water table that could affect their wells. In addition, residents say sewage from the complex might contaminate wells.

To build the project, Bigley needs zoning permits and a wetlands permit to put a crossing over a brook at the site.

Kreisberg said it is unlikely an application presented to the PZC from a local citizens' group calling for a moratorium on such building will affect the project.

The application seeks a six-month moratorium on condominium and apartment complexes.

## Historic philosopher 'visits' Manchester

By Nancy Pappas  
Manchester Herald

A visitor from a century gone by was in Manchester on Sunday, expanding ideas which sounded radical, even for today.

Back in the late 19th century, Robert W. Ingersoll of Illinois was as well known as Mark Twain on the public speaking circuit. He called for removing large passages from the Bible for ministers to admit that they didn't know much, for millenarians to form a trust for the public good, and for editors and reporters to stick more closely to the truth.

The character of Ingersoll, a lawyer, soldier and controversial humanist author, was presented Sunday morning at the Unitarian-Universalist meetinghouse on West Vernon Street by the Rev. Douglas Peary of South Windsor, an investigator with the National Labor Relations Board and a Unitarian-Universalist minister.

Peary said he has been fascinated by Ingersoll since discovering his works about 12 years ago while attending the Star King Theological Seminary in Berkeley, Calif. "Here was someone whose writings seemed to bring together much of what I believed," said Peary.

Ingersoll, an outspoken humanist, was one of the leaders in a wave of philosophers and social activists who sought to change the character of America.

With Bertram Russell, Ingersoll rallied against organized religion. With Elizabeth Cady Stanton, he stood up for women's rights. Like Thomas Alva Edison, he believed humans should look to the rational sciences for their guidance.

And Edison once remarked that, taken all in all, Ingersoll was "a perfect man."

He called for the abolition of slavery and full equality for black citizens. He looked upon birth control as righteous emancipation for women. Although he fought in the Civil War, he

Rev. Douglas Peary of South Windsor presents his talk on Robert W. Ingersoll Sunday morning at the Unitarian Universalist Society, East in Manchester. Ingersoll was famous in the 19th century for believing in human, rather than divine, powers.

## Connecticut Republicans prepare for inauguration

WASHINGTON (AP) — Hundreds of well-heeled Connecticut Republicans will head south later this month for four days of pomp and celebration surrounding the presidential inauguration.

The Connecticut delegation will attend a Capitol Hill reception that evening hosted by Reps. Nancy L. Johnson of New Britain, John G. Rowland of Waterbury and Christopher Shays of Stamford, and the next night the delegation will have its own inaugural dinner.

The main event, the Inaugural Ball, will be that Friday evening.

## PZC to get request for historic zone

By Nancy Connelton  
Manchester Herald

MacFarlane and Zoning Commission tonight is scheduled to review a request to create a General Historic Zone that would allow a Hartford developer to convert a historic mill off Hilliard Street into residences.

The request for an amendment to zoning regulations was made by Victor MacFarlane of Hartford who plans to buy the Hilliard Mill and turn it into condominiums or apartments. The commission's meeting is scheduled for 7 p.m. in the Lincoln Center hearing room.

Bezini Bros. Old Colony Co., a 57-year-old furniture-making business, is one of four businesses and the mill, Richard and Joseph Bezini own the mill. Richard Bezini said this morning the sale of the building has not been made final.

MacFarlane, president of MacFarlane Properties Corp., has proposed guidelines for developing historic buildings under the Cheney Historic District. The proposed zoning amendment was drafted by MacFarlane's attorney, James J. Sullivan of Manchester.

The proposed amendment is designed to protect and preserve historical and architectural qualities of areas throughout town by governing lot size, lighting, parking and other aspects of development, according to the zoning commission.

Sullivan has said existing Planned Residential Development and Comprehensive Urban Development zones would not allow the Bezini property to be converted to the mill.

Also on tonight's agenda are requests for a site plan modification that would allow the Brophy-Ahern Development Co. of West Haven to add nine apartments to the first floor of the Yarn Mill at 210 Pine St. and six doors on the first floor.

The PZC had limited the amount of space that could be used for retail stores because of insufficient parking. In response to that, Brophy-Ahern has proposed reducing retail space on the first floor from 13,250 square feet to about 10,000 square feet, making the eight proposed stores smaller. The 10,000 square feet would be used for the additional apartments, bringing the total number of units to 139.

However, Lawrence Brophy, a partner in the firm, told the Cheney National Historic District Commission at a meeting Thursday that the developers still hope to convince the PZC to allow more space for retail uses.

The firm is also seeking approval to add six doors to the 11 already approved on the south side of the building's first floor, even though the additional doors have already been built.

The issue of the color of the doors, which have been painted white, may also come before the PZC. The Cheney Commission Thursday approved the additional six doors but was divided over whether the doors should be painted "historic green" to match trim on windows and doors on other buildings in the district.

The developers had planned to paint the doors green under the original plans, but only the trim is green. Lawrence Brophy argued that store doors should be left white to distinguish the stores from other uses in the building.

The commission is also scheduled to review special exception and erosion control permit requests from the Purdy Corp. of 586 Hilliard St., which plans to add 100,000 square feet to its existing building and 70 to 75 parking spaces.

## Writing test results baffle school official

By Maureen Leavitt  
Manchester Herald

A Manchester school official is puzzled as to why the percentage of students meeting state proficiency requirements dropped as much as six points on the writing section of the state mastery test last year even though students are involved in a national writing project.

"I can't fathom really why we're down," said Alan Chesterton, assistant school superintendent. "We've put a lot of emphasis in writing. The interesting thing is, children are writing more and they're doing a good job by our standards," Chesterton added today.

Overall, Chesterton said he is pleased with the test scores which measure students' mastery of skills in the areas of math, writing and reading for fourth-, sixth- and eighth graders. Results released last week show scores in reading and math either remained the same or increased for all three grades. Chesterton said.

Meanwhile, he said he is awaiting results from other towns. He is hoping to see if scores from different communities to see if writing scores were down elsewhere.

"We're going to do some more digging into it," he said.

Sixth-grade writing scores showed the biggest drop, with 80 percent of Manchester students scoring above the state minimum, down from 88 percent in 1987, Chesterton said.

Writing scores also dropped among fourth-grade students from 83 percent in 1987 to 80 percent above the minimum remedial level. In the eighth grade, scores dropped only a point, from 85 to 84 percent.

Chesterton said Manchester elementary schools have been involved in a national writing project for the last two years. Elementary teachers are being instructed by the University of Connecticut. Elementary students are writing first drafts, rewriting and editing, Chesterton said.

"This is our second year into it, so maybe the payoff comes in another year," Chesterton said.

In reading, 78 percent of fourth-graders scored above the standard, which remained the same from 1987. Sixth-graders had the highest increase with 85 percent of them scoring above the remedial standard, up 6 percentage points from last year. Eighth-grade scores were also up, by 3 points, with 83 percent of the students scoring above state standards.

In math, 92 percent of fourth-graders scored above the standard, up 1 point from last year. Sixth-graders improved by 1 point also, from 84 to 85 percent, and eighth-graders had the highest increase, with 89 percent of the students scoring above the remedial level, up 5 points from last year.

The mastery tests were mandated by the state in 1984. Previously, a proficiency test was administered to ninth-graders only.

Results are broken down school-by-school to be competitive in the job market, consider part-time, day or evening courses at Manchester Community College.

"Our district should be pleased with the scores," Chesterton said. "Our big thing is if we can make slow, steady progress. And for the most part, we've done that."

## We're There for You at Manchester Community College

# LOCAL & STATE

## College appoints Carter

Alfred Lee Carter of Trenton, N.J., has been appointed director of the Division of Social Science and Human Services at Manchester Community College.

Carter holds a bachelor's degree in social science from Elizabeth City State University, Elizabeth City, N.C. He received his master's degree in urban environmental studies from Rensselaer Polytechnic Institute in Troy, N.Y. He was employed at Mercer County Community College in New Jersey since 1974 as an assistant professor of sociology, an academic and systems administrator, chairman of the Mathematics and Physics Division, and as assistant dean of academic affairs.

## Town stings liquor outlets

HAMDEN (AP) — Police say this city's bar and package store owners can expect more "sting" operations like the one that resulted in the arrests of 28 bartenders and package store clerks.

The clerks and bartenders were arrested after allegedly selling liquor to a 20-year-old undercover police officer on Friday night.

The undercover policeman, who is a year younger than the legal drinking age, bought a six-pack of beer at 16 of the 21 package stores he visited and mixed drinks at 13 of 16 bars.

At half the business, the officer was allowed to buy alcohol, even though he produced a driver's license stamped with the letter Y, indicating a person under 21, police said.

## Civilians may watch police

NEW MILFORD (AP) — The Town Council is considering creating a civilian review board to handle residents' complaints against the police department — a move the town's chief says isn't necessary.

"We have a very professional internal affairs process that works successfully," Police Chief James Sweeney said. "It's worked very successfully for the eight months I've been here."

Mayor Stuart Halpine said, however, residents should have other means besides the police department to file a complaint. The department has an internal affairs division that investigates citizen complaints.

The move to form the board comes after a complaint of police brutality was filed with the department in August. The officers involved in the case were later cleared of any wrongdoing.

## DMR moves to Willimantic

A new administrative office for Region 3 of the Department of Mental Retardation opened Nov. 21 at 670 Main St., Willimantic.

The new office, which houses 75 staff members, will allow program staff to be near families living in the central part of the region, which includes Manchester, Saterella offices for some case managers and clinical support staff will remain at the John C. Dempsey Center, Putnam, and in Vermont in the future.

Two privately operated community living arrangements also opened in November. Community Associates of Connecticut opened its second home on South Road in Bolton, Sunrise Street in Columbia.

The new facilities have provided community living opportunities for two people from Mansfield Training School, two from the Meadows Convalescent Home and one from Southbury Training School.

## Beer cans in death car

FARMINGTON (AP) — State police said several beer cans were found inside a car that crashed into a tractor-trailer truck on Interstate 84, leaving three young Bristol men dead and a fourth hospitalized in critical condition.

State police spokesman Sgt. Scott O'Mara said Saturday that the Friday night accident is still being investigated. He said police are awaiting test results on the victims' blood-alcohol levels from the state medical examiner to determine if alcohol was a factor in the crash.

The four men, all in their early 20s, were on their way home from an evening of watching Jai Alai in Hartford.

Killed were the driver of the car, Mark Brzezinski, 23, and passengers David Barlucca, 24, and Stephen McCormick, 24. A third passenger, Steven Mele, 24, was injured in the accident and was in critical condition Sunday night at New Britain General Hospital.

The truck driver, Raymond Alsdorf, 33, of Watertown, was not injured, police said.

## Funeral director sentenced

NEW HAVEN (AP) — A New Haven funeral director, who associates called characterized as a pillar of the city's black community, has been sentenced to three years in prison for the fatal shooting of his wife last year.

James Perkins, 60, pleaded guilty in October under a plea-bargain agreement that promised he would be sentenced to no more than five years in prison. He was sentenced in New Haven Superior Court on Friday.

Perkins was arrested in connection with the shooting of his wife, Wilhelmina Perkins, 46, on Nov. 15, 1987, in the kitchen of the couple's New Haven home.

Perkins claimed the shooting was an accident, maintaining that a bullet he fired ricocheted off the ceiling and hit his wife.

## Man jailed in '84 killing

WATERBURY (AP) — A 30-year-old Danbury man has been sentenced to life in prison for the 1984 stabbing death of a Seymour teenager.

Superior Court Judge William Laverty sentenced David J. Weinberg on Friday to a maximum sentence because of the Aug. 3, 1984, slaying of 19-year-old Joyce Stochmal. A life sentence under Connecticut law is 60 years.

Weinberg had been free on \$200,000 bond since his conviction in November.

# Public's faith in police fails to wane

MIDDLETOWN (AP) — The city's police chief has been buoyed by a groundswell of public support as he continues an internal probe into corruption within the police department.

Local officials and residents say the problem involves "a few bad apples."

In December, Chief George R. Aylward announced the department was investigating three officers he said had links to suspected drug dealers.

On Tuesday, Sgt. Michael V. Adorno, a 21-year veteran of the police department, was arrested and charged with threatening a fellow officer with his service revolver. An arrest warrant affidavit released Thursday says Adorno also harassed other officers who were involved in investigating drug dealers in the city. The allegations surprised some, but

they have failed to turn public opinion against either Aylward or the department.

"I think it was shocking to Middletown, at least to me," said Diane Gervais, manager of Amato's Toy Store, which has been downtown for almost 50 years.

City officials have voiced their support for the department and the chief. Citizens groups have written in support. And downtown business retailers have voted their confidence.

Gervais and other members of the Middlesex County Chamber of Commerce's central business bureau voted Jan. 5 to support Aylward's efforts to "improve the integrity of the Middletown Police Department and to reestablish the public's confidence in it."

Aylward, who came to Middletown in 1982 from the New York City police

department, says he is lucky.

"People have said I either know what I'm doing or I'm the luckiest guy in the world," Aylward said.

But one of Aylward's few critics, officer David R. Beauchemin, president of the department's labor union, characterized Aylward as "extremely shrewd."

The union leadership criticized Aylward in December for low morale in the department and for refusing to meet with them.

"He took a situation, when he was fighting with the union, and turned it totally around like I've never seen before," Beauchemin said Friday.

"As much as I dislike the guy, you have to admire him."

Aylward said he held back on going public with the internal investigation into police corruption because he was not sure what the response would be by city residents.

# Fire officials seeking clues in fatal blaze

HARTFORD (AP) — Hartford fire officials say they are still searching for the cause a fire that killed an elderly woman who was afraid to jump from the third floor of a burning apartment building.

Seven other people were also injured in the fire, which swept through a three-story wood frame apartment building early Sunday morning. When firefighters arrived shortly after 4 a.m., the blaze was spreading to nearby structures. The fire began in the rear of the building, fire officials said.

As the fire closed in on the third floor, the elderly woman and her daughter, Geraldine Cushman, 49, realized that they would have to jump from the building, said Hartford Police Sgt. Donald Samboccia.

"The daughter said 'we've got to jump,' and the woman said 'I'm not jumping,'" Samboccia said. "It was either jump or perish."

Marjorie Priore, 81, and Cushman jumped from second- and third-floor windows and were caught by Hartford Police Officer Gregory Sargis, tenant Jose Albert and an unidentified man.

Cushman jumped from the third floor and suffering a broken leg when she landed. Samboccia said she was in stable condition at Hartford Hospital, a hospital spokesman said.

Samboccia said the name of the dead woman was not being released pending positive identification.

Sargis and police Officer Joseph Smith were treated at Hartford Hospital and released. Firefighter John Duhamel was treated at St. Francis Hospital and Memorial Hospital and Albert was treated at Mount Sinai Hospital.

The New Britain Avenue building was completely destroyed by the fire, and a wrecking crew was on the scene Sunday afternoon to demolish what remained of it. The fire spread to and destroyed a two-story frame building that had housed legal offices and a small one-story building that housed a video store, Samboccia said.

A fourth building, also damaged, was destroyed by the fire, said fire officials. City arson investigators were searching through the remains of the buildings for clues that might explain how the fire started.

He said about 50 firefighters responded to the blaze.

"I haven't seen as many firefighters in one place in a long time," he said.

# Cadet program aimed to raise minority recruits

NEW HAVEN (AP) — An innovative pilot program that is aimed at increasing the number of minorities and women recruits in the state police force is to be launched in New Haven's high schools.

A state police cadet program will be offered next month to juniors at all six New Haven high schools. After taking four semesters of law-enforcement classes with a certified state police instructor and graduating from high school, the cadet will receive a tuition-free, two-year college education in law enforcement.

The goal is to prepare the students to pass the written tests and other tough requirements necessary to become a state trooper or to join another law-enforcement agency, said U.S. District Judge Robert C. Zampano, who conceived the program.

In this way, Zampano hopes to increase the number of blacks, women, Hispanics and other minority group members in the state police and other law-enforcement agencies.

About 9 percent of the 1,084 sworn personnel in the state police are men who are members of minority groups, about 1 percent of the total are women.

"I think it is a wonderfully imaginative program that just might be the start of a new approach to affirmative action and employment," said David Rosen, an attorney for Men and Women for Justice, a group of black, Hispanic and female state police officers that sued the state police, alleging discrimination.

A year ago, Zampano settled the last remaining issues of the 6-year-old discrimination lawsuit. He issued court orders to implement the settlement and continues to monitor compliance with those orders.

In settling that case, Zampano said, he followed the same philosophy he has followed with other civil-rights litigation he has handled in his 20 years on the federal bench. "Under no circumstances would I alleviate the problem or remedy the problem by lowering the qualifications," Zampano said.

Therefore, to remedy the gross inequities that have existed, he said, the pool of qualified applicants must be enlarged.

"No one, to my knowledge, has said, 'OK, why don't we enlarge the pool and think four years from now?'" Zampano said. Most remedies for discrimination have focused on short-term solutions, he said.

BALANCING ACT — Brian Theriault, 15, of 26 Essex St., balances his hockey sticks on his bicycle en route to Chocky Oak Park Saturday. He was traveling via Main Street to the park to play hockey with some friends.

# Bitter cold pricks conscience about plight of the homeless

HARTFORD (AP) — The bitter, life-threatening cold that afflicted the state last week pricked the conscience about the plight of the homeless, a state official said.

Hartford said the city's eight shelters can't accommodate all the homeless.

"There needs to be more of these (shelters) and I don't think we can do it ourselves," said William Daniels, 34, a part-time organizer who also works for a Norwalk produce company, has been living in the Kwanon shelter in Norwalk for six months. He said he plans to enroll at Southern Connecticut State University in New Haven this month.

"This is only temporary," Daniels said between bites of Chinese food at the shelter on a recent evening.

Paul Iadarola, executive director of the St. Vincent DePaul Society of Waterbury Inc., which operates a 125-bed shelter, said he has at least four residents who have lived in the shelter since it opened in 1984.

"There are people who think that living in a shelter is a normal way of life," he said.

His organization is taking matters into its own hands and creating housing. It plans to build a 16-unit housing project in the city's South End. The two- and three-bedroom units, designed primarily for families, are expected to open in late 1989, Iadarola said.

# Homeless vets offered help

WEST HAVEN (AP) — Doctors at the Veterans Administration Medical Center are trying to break the "downward cycle" of homelessness is part of their mission. They have opened the hospital's doors to homeless veterans in need of medical care.

"Health care and homelessness are often co-problems," said Dr. Robert Rosenbeck, deputy chief of psychiatry at the hospital.

"Many of the homeless are ill. It's very important to find ways in which our medical center can serve them."

Physicians at the hospital estimate that 15 to 20 percent of New Haven's homeless are veterans. They say helping the homeless falls logically within the hospital's mission.

However, the hospital's mandate from the U.S. Veterans Administration is to care for medical needs. The hospital thus can't act simply as a shelter.

While the hospital has temporarily offered its empty beds to homeless veterans, Rosenbeck and other administrators said they are trying to develop a rehabilitation program that would offer medical care and also help ease the homeless into self-sufficiency.

Rehabilitation involves restoring health, cleaning social networks, a job and housing, he said.

Medical Center Director Norman Browne said 35 to 40 beds could be used to care for homeless veterans who have medical needs.

# LOCAL & STATE

## Yule trees to be recycled

The town Parks and Cemetery Division is accepting Christmas trees to be recycled and used for mulch and wood chips on local trails.

Residents are asked to remove nails and metal from trees and pile them next to sandpiles in the Salters Pond parking lot, at the entrance to the gravel pit off Holland Turnpike, on Keeney Street near Primer Road, on Edgerton Street, and at Union Pond-North School Street. Piling trees next to the sandpiles will keep them from blowing around.

Residents are also asked to deposit garbage at these locations.

## Freezing rain closes I-84

STAFFORD SPRINGS (AP) — icy roads and a series of minor accidents forced state police to close a 10-mile stretch of Interstate 84 near the Massachusetts line Sunday, state police said.

State police Dispatcher Nancy A. Pacyna said a light rain gave the westbound lanes of I-84 a slick surface causing numerous accidents, none of which resulted in serious injuries.

Pacyna said state police closed I-84 between exits 71 and 73 from 7:30 to 8:15 p.m. Saturday to clear I-84 of cars involved in accidents and allow state Department of Transportation crews to dump sand on the road.

## MHS teacher in program

Kenneth W. Krivanec, a Manchester High School science teacher, was among 59 New England teachers chosen to participate in the American Astronomical Society's Astronomer for a Day program in Boston.

On Sunday, participating teachers were to get a refresher lesson in astronomy from college instructors and a briefing on Project STAR, located in Cambridge, Mass.

Today, teachers will hear presentations on the latest astronomical research and lectures from American and Soviet scientists.

The program is being held in conjunction with the society's 173rd national meeting.

## Church opens time capsule

ASHFORD (AP) — Members of the Westford Congregational Church got the opportunity to peer into their past when they opened up a 143-year-old time capsule.

The peek came Sunday and involved a time capsule unearthed after the church building burned Nov. 1.

Bundled neatly in a chestnut box encased in soldered tin were newspapers, a poem, a sermon and an Aug. 25, 1845, letter from Pastor Charles Adams that reported the original time capsule, placed a few days earlier in 1845, had been stolen "by several persons of the lesser sort."

Other records inside the capsule noted that the church's first meetinghouse, for about 16 members, was constructed in June 1767, and was twice struck by lightning before it was taken down in 1844.

## Hospital begins expansion

NEW LONDON (AP) — Lawrence and Memorial Hospital has launched a \$54 million expansion and renovation program that will bring a new emergency room, maternity unit and one-day surgery center.

"This represents our commitment to make sure Lawrence and Memorial Hospital will have the facilities it needs for the future," hospital President William T. Christopher told 200 people during groundbreaking ceremonies on Saturday.

The expansion, to take place over the next four years, will add nearly 175,000 square feet of new space to the hospital, and will also bring new intensive care and coronary care units and five new operating rooms.

Joseph F. Cannon, hospital vice president for planning, marketing and business development, said relocation of utility lines will begin as early as Tuesday, and construction crews should begin work within three weeks.

## YMCA death suspicious

HARTFORD (AP) — A 62-year-old man described as a loner was found dead in his room at the YMCA, and police said they were investigating the death as suspicious.

The man was found Friday morning lying face down on the floor of his seventh-story room at the Hartford YMCA. The state medical examiner's office in Farmington said he died of a blow or blows to the head.

Police were trying to reach the man's relatives and did not immediately release his name.

Police described the death as suspicious, but said they are not considering it a homicide.

## Andover needs candidates

ANDOVER — The Democratic Town Committee is seeking Democrats to run for several positions at the Democratic caucus, scheduled for Thursday at 8 p.m. at Andover Elementary School.

Those interested in running for first selectman, selectman, tax collector, town treasurer, planning and zoning commissioner, insurance commissioner, library director and Board of Tax Review should call Barry Wilson at 742-1312 after 6 p.m. or Betty Kowalski at 742-7194 before 6 p.m. Tuesday.

## Pilot not hurt in crash

STRATFORD (AP) — A Stratford man escaped injury when the single-engine plane he was piloting stalled and crashed near Sikorsky Memorial Airport in Bridgeport.

Raymond Demeo, 25, was "very shaken," but uninjured after his rented Cessna 152 crashed on Sullivans Lane about 9:40 a.m. Saturday, said Stratford Police Sgt. Douglas Tles.

Demeo told police that the plane's engine stopped shortly after he took off from the airport and he did not believe he could turn around. He brought the plane down on the south side of Sullivans Lane, clipping a telephone pole with the left wing.

# Stolberg's downfall was 'his own doing'

By Judd Everhart  
The Associated Press

HARTFORD — Former House Majority Leader John G. Groppo, a conservative Winsted Democrat who frequently tangled with Irving J. Stolberg, says there's a simple reason why the liberal Stolberg was ousted as speaker of the House by dissident Democrats.

"It was his own doing," said Groppo, who served a quarter century in the House before his defeat in the 1984 Reagan landslide.

"He promised too many things to too many people," Groppo said, maintaining that Stolberg was unable to deliver on such promises as committee chairmanships and so was forced to create more committees to accommodate people.

"You don't do that," Groppo said. "If you make a commitment and are not able to keep it, that's a no-no in politics."

Other Stolberg detractors used words like nasty, vindictive and ruthless to describe his two terms as speaker. Others said he had amassed too much power and that they wanted to describe his two terms as speaker. Groppo said he had amassed no more than two terms as speaker.

Stolberg, D-New Haven, was denied a second term as speaker in 1987, on Wednesday, the opening day of the 1988 General Assembly session.

The unexpected ouster has thrown the session into chaos. Committees can't meet because Balducci is changing some of the chairman positions that he had appointed in November and December on the assumption that he would be elected speaker again.

Stolberg's assumption was based on a Democratic caucus held in November in which one of the dissenters, Ronald L. Smoko, D-Hamden, dropped a long-planned challenge to Balducci.

DEPOSED — Ousted House Speaker Irving Stolberg, left, walks with Rep. Richard Balducci, center, on his way to the podium in the Hall of the House on Wednesday. Balducci defeated Stolberg in Stolberg's bid for a third term as speaker.

## Rep. Gionfriddo appointed assistant majority leader

MIDDLETOWN (AP) — State Rep. Paul Gionfriddo, D-Middletown, ousted as speaker of the Appropriations Committee, says he has been asked to serve as an assistant majority leader.

Gionfriddo said he had accepted an offer from House Speaker Richard J. Balducci, D-Newington, to serve as one of 12 assistant majority leaders.

Gionfriddo had been set to serve as Appropriations Committee chairman but lost that job after the man who appointed him, Irving J. Stolberg, D-New Haven, was ousted as house speaker.

Balducci announced Friday that he had appointed William R. Dyson, D-New Haven, as the new appropriations chairman.

Gionfriddo said he had mixed feelings about his new position.

"Obviously I wanted to do Appropriations," Gionfriddo said. "I made no secret of that. I was interested in that, but I realize what the reality is. I'm not a speaker."

Gionfriddo said that while the new post frees him from details that are handled by committee chairmen and Jay B. Levin, D-New London, as chairman of Program Review and Investigations.

## Church opens time capsule

ASHFORD (AP) — Members of the Westford Congregational Church got the opportunity to peer into their past when they opened up a 143-year-old time capsule.

The peek came Sunday and involved a time capsule unearthed after the church building burned Nov. 1.

Bundled neatly in a chestnut box encased in soldered tin were newspapers, a poem, a sermon and an Aug. 25, 1845, letter from Pastor Charles Adams that reported the original time capsule, placed a few days earlier in 1845, had been stolen "by several persons of the lesser sort."

## Pilot not hurt in crash

STRATFORD (AP) — A Stratford man escaped injury when the single-engine plane he was piloting stalled and crashed near Sikorsky Memorial Airport in Bridgeport.

Raymond Demeo, 25, was "very shaken," but uninjured after his rented Cessna 152 crashed on Sullivans Lane about 9:40 a.m. Saturday, said Stratford Police Sgt. Douglas Tles.

Demeo told police that the plane's engine stopped shortly after he took off from the airport and he did not believe he could turn around. He brought the plane down on the south side of Sullivans Lane, clipping a telephone pole with the left wing.

## Rep. Gionfriddo appointed assistant majority leader

MIDDLETOWN (AP) — State Rep. Paul Gionfriddo, D-Middletown, ousted as speaker of the Appropriations Committee, says he has been asked to serve as an assistant majority leader.

Gionfriddo said he had accepted an offer from House Speaker Richard J. Balducci, D-Newington, to serve as one of 12 assistant majority leaders.

Gionfriddo had been set to serve as Appropriations Committee chairman but lost that job after the man who appointed him, Irving J. Stolberg, D-New Haven, was ousted as house speaker.

Balducci announced Friday that he had appointed William R. Dyson, D-New Haven, as the new appropriations chairman.

Gionfriddo said he had mixed feelings about his new position.

"Obviously I wanted to do Appropriations," Gionfriddo said. "I made no secret of that. I was interested in that, but I realize what the reality is. I'm not a speaker."

Gionfriddo said that while the new post frees him from details that are handled by committee chairmen and Jay B. Levin, D-New London, as chairman of Program Review and Investigations.

## Church opens time capsule

ASHFORD (AP) — Members of the Westford Congregational Church got the opportunity to peer into their past when they opened up a 143-year-old time capsule.

The peek came Sunday and involved a time capsule unearthed after the church building burned Nov. 1.

Bundled neatly in a chestnut box encased in soldered tin were newspapers, a poem, a sermon and an Aug. 25, 1845, letter from Pastor Charles Adams that reported the original time capsule, placed a few days earlier in 1845, had been stolen "by several persons of the lesser sort."

Other records inside the capsule noted that the church's first meetinghouse, for about 16 members, was constructed in June 1767, and was twice struck by lightning before it was taken down in 1844.

## Hospital begins expansion

NEW LONDON (AP) — Lawrence and Memorial Hospital has launched a \$54 million expansion and renovation program that will bring a new emergency room, maternity unit and one-day surgery center.

"This represents our commitment to make sure Lawrence and Memorial Hospital will have the facilities it needs for the future," hospital President William T. Christopher told 200 people during groundbreaking ceremonies on Saturday.

The expansion, to take place over the next four years, will add nearly 175,000 square feet of new space to the hospital, and will also bring new intensive care and coronary care units and five new operating rooms.

Joseph F. Cannon, hospital vice president for planning, marketing and business development, said relocation of utility lines will begin as early as Tuesday, and construction crews should begin work within three weeks.

## YMCA death suspicious

HARTFORD (AP) — A 62-year-old man described as a loner was found dead in his room at the YMCA, and police said they were investigating the death as suspicious.

The man was found Friday morning lying face down on the floor of his seventh-story room at the Hartford YMCA. The state medical examiner's office in Farmington said he died of a blow or blows to the head.

Police were trying to reach the man's relatives and did not immediately release his name.

Police described the death as suspicious, but said they are not considering it a homicide.

## Andover needs candidates

ANDOVER — The Democratic Town Committee is seeking Democrats to run for several positions at the Democratic caucus, scheduled for Thursday at 8 p.m. at Andover Elementary School.

Those interested in running for first selectman, selectman, tax collector, town treasurer, planning and zoning commissioner, insurance commissioner, library director and Board of Tax Review should call Barry Wilson at 742-1312 after 6 p.m. or Betty Kowalski at 742-7194 before 6 p.m. Tuesday.

## Homeless vets offered help

WEST HAVEN (AP) — Doctors at the Veterans Administration Medical Center are trying to break the "downward cycle" of homelessness is part of their mission. They have opened the hospital's doors to homeless veterans in need of medical care.

"Health care and homelessness are often co-problems," said Dr. Robert Rosenbeck, deputy chief of psychiatry at the hospital.

"Many of the homeless are ill. It's very important to find ways in which our medical center can serve them."

Physicians at the hospital estimate that 15 to 20 percent of New Haven's homeless are veterans. They say helping the homeless falls logically within the hospital's mission.

However, the hospital's mandate from the U.S. Veterans Administration is to care for medical needs. The hospital thus can't act simply as a shelter.

While the hospital has temporarily offered its empty beds to homeless veterans, Rosenbeck and other administrators said they are trying to develop a rehabilitation program that would offer medical care and also help ease the homeless into self-sufficiency.

Rehabilitation involves restoring health, cleaning social networks, a job and housing, he said.

Medical Center Director Norman Browne said 35 to 40 beds could be used to care for homeless veterans who have medical needs.

## Osella's complaint on caucuses goes to FOI hearing on Feb. 6

By Alex Girelli  
Manchester Herald

A hearing has been set for Feb. 6 by the Freedom of Information Commission on a request for a ruling over whether Democratic directors can legally caucus in private with other present.

Republican Town Director Renato Osella, who filed the complaint, said today he received notice Saturday of the hearing date and of the appointment of an FOI staff attorney as an ombudsman in the case.

The ombudsman, Kwaku Hanson, said this morning he has not yet been able to get in touch with Democratic Mayor Peter P. DiRosa Jr., chairman of the Board of Directors, to discuss the matter with him. But he said he would try to do so today.

DiRosa has just returned from a vacation. Osella said that while it may be possible for the ombudsman to

## McCavanagh may get top post

By Alex Girelli  
Manchester Herald

State Rep. James R. McCavanagh, D-Manchester, said today he expects to be named an assistant majority leader in the House of Representatives and to be appointed to the Democratic party's committee to screen bills.

McCavanagh, one of the dissenting Democrats who waged a successful fight to deny Rep. Irving J. Stolberg, D-New Haven, a third term as speaker of the House, said he will be appointed to the Banking Committee as well as the Public Safety and Judiciary committees.

McCavanagh, of the 12th Assembly District, served on the Public Safety and Judiciary committees in the last session of the General Assembly.

He said this morning his

England on Sunday night. The two engines on a British Midland Airways jet that failed before the aircraft crashed in service in England, killing 44 people, were built by a joint venture of Fairfield-based General Electric Co. and a French partner.

British Midland Airways said the engine on fire and attempted an emergency landing. At least 44 people were killed in the crash.

William Tench, retired head of Britain's Air Accident Investigation Board, said the odds against both engines failing on a Boeing 737 were 10 million to one.

"I would look for some inadvertent technical mistake such as something incorrect being done to the engines during turnaround, either inadvertently or deliberately," Tench said.

British Midland said the jet was delivered just 12 weeks ago and had flown less than 500 hours. It grounded its other 737-400 for inspection.

Pilot Kevin Hunt, a 25-year veteran, was among the badly injured. He was killed in the wreckage. The last survivor, a woman, was pulled from a tangle of twisted metal.

Officials raised the number of confirmed dead to 44 late today. Eighty-two people were injured in the crash of the jet.

"So far the evidence, although by no means conclusive, is consistent with the right engine having stopped before impact and there are also signs of fire in the left engine," Transport Minister Paul Channon said in an interview on British Broadcasting Corp. television.

William Tench, retired head of Britain's Air Accident Investigation Board, said the odds against both engines failing on a Boeing 737 were 10 million to one.

"I would look for some inadvertent technical mistake such as something incorrect being done to the engines during turnaround, either inadvertently or deliberately," Tench said.

## Budget

From page 1

for higher spending while relying on a "flexible freeze" on other government programs to eliminate the budget deficit without resorting to new taxes.

"President Reagan's final budget is really irrelevant at this point," Rep. William Gray, D-Pa., former chairman of the House Budget Committee said today on "CBS This Morning."

"It is a farewell gesture that every president is required to do. It only becomes relevant if George Bush today, tomorrow or this week says, 'That's my budget.' I don't expect him to do that."

Reagan will leave office with a budget that proposes collecting \$1.059 trillion in revenues and spending \$1.152 trillion, leaving a budget deficit of \$92.5 billion.

The deficit, if realized, would be the lowest since a \$73.7 billion deficit in 1981, when Reagan's budget was enacted.

Reagan's 1989 budget would be the lowest since a \$73.7 billion deficit in 1981, when Reagan's budget was enacted.

## Lead

From page 1

micrograms and eight were between 10 and 50 micrograms per liter.

The town Water and Sewer Division is in anticipation of the new regulations, has included about \$40,000 for new equipment in the capital budget for the 1989-90 fiscal year to install equipment aimed at reducing the lead levels, according to Robert J. Young, the division superintendent.

Already the town has taken steps to increase awareness about lead in drinking water and to cut down on lead levels. Notices advising customers about the problem were sent out last summer, and the town last year began a program of replacing old service lines containing lead.

The federal EPA proposed the stricter regulations in August. Those regulations, if adopted, would require local water suppliers to reduce the corrosive qualities of water in order to cut down on the amount of lead leached by lead piping and by lead solder.

New equipment the Water Division may buy is designed to increase the alkalinity of water from town wells, Young said.

Water that is more alkaline is less corrosive and therefore less apt to cause lead to leach from plumbing, he said.

Under the proposed new regulations, no more than 5 percent of the homes sampled could have lead levels exceeding 20 micrograms per liter.

Peter C. Karalekas, the chief of the water supply division of the New England Division of the EPA, said that the current standard is a subject of some confusion because of the question of whether the water should be drawn at the supplier's source or at taps in homes.

Under the new regulations, the water utility would have to insure that lead levels in drinking water meet certain stricter limits or show that it had done everything possible to reduce the lead level.

A supplier would have to take water samples from homes where acid leaching would be expected to be the worst, Karalekas said.

Eddy said that the testing to be required by the new regulations would not put a strain on the lab. But she said that it would be difficult to get the water samples from the homes.

Under a requirement of the Clean Drinking Water Act of 1986, the town sent out notices in June to water customers warning them about the danger of lead in drinking water.

Eddy said that in response to the notices was very small. The division has been offering the testing as a public service.

Barring the replacement of home plumbing, flushing of water lines is one way to lower lead levels, Eddy has said.

Eddy said that no lead is used in town water mains, and any lead contained in the water from the source is negligible.

There is lead, however, in some of the service lines connecting water mains to valves at the curb. The division estimates that there are 2,500 such lines which contain lead or lead gossenets that connect the lines to the valves.

There is lead, however, in some of the service lines connecting water mains to valves at the curb. The division estimates that there are 2,500 such lines which contain lead or lead gossenets that connect the lines to the valves.

## Montana operates on Bears

By Dave Corpenner  
The Associated Press

CHICAGO — The wind-chill factor was 26 below zero, but Joe Montana performed with the aplomb of a surgeon operating at room temperature.

The doctor's next house call: Miami.

Montana defied the logic that passing attacks freeze up in cold weather, completing 17 of 27 passes, including touchdowns of 61 and 27 yards to Jerry Rice and 50 yards to John Frank.

Many thought he would spend much of the game lying on his back in the frozen at Soldier Field or be harassed by the Bears' powerful defense into throwing risky wind-blown passes.

Under a requirement of the Clean Drinking Water Act of 1986, the town sent out notices in June to water customers warning them about the danger of lead in drinking water.

Eddy said that in response to the notices was very small. The division has been offering the testing as a public service.

Barring the replacement of home plumbing, flushing of water lines is one way to lower lead levels, Eddy has said.

Eddy said that no lead is used in town water mains, and any lead contained in the water from the source is negligible.

There is lead, however, in some of the service lines connecting water mains to valves at the curb. The division estimates that there are 2,500 such lines which contain lead or lead gossenets that connect the lines to the valves.

## Cincy out of depths in 1 year

By Barry Wilner  
The Associated Press

CINCINNATI — Boomer was bound for a mountaintop, Sam thought he might be better off on the unemployment line and Ickey wasn't even a dancer yet.

It was a year ago when the Cincinnati Bengals occupied the depths of the AFC. They had gone 4-11 and generally missed up their 1987 season with poor play and disastrous decisions.

Today, the Bengals are AFC champions and headed for the Super Bowl for the second time. They got there with a 21-10 victory over the Buffalo Bills built on staunch defense, strong special teams and the Ickey Express.

## Help for retarded kids not close at home

Dear Abby  
Abigail Van Buren

DEAR ABBY: In response to "Judy in West Virginia" who cared for Maria, her 15-year-old blind and retarded child at home, Judy is to be commended for having the child at home. Judy is to be commended for having the child at home. Judy is to be commended for having the child at home.

Judy tries, her closeness to her child as well as the guilt trip imposed by the relatives renders her unable to do these things effectively. The federal government sponsors a program to enable the mentally retarded person to reach his/her maximum potential. The ICF/MR program (Intermediate Care Facility for the Mentally Retarded) is usually a supervised and sometimes managed by the state. There is some govern-

ment subsidy, which varies from state to state. Information is usually available from the regional mental health center. If not, Judy should write to the Department of Health and Human Services in Washington, D.C. Judy has done all she can. Now it's time for her to give that responsibility to the specialists. At first it may be very hard and leave a terrible void, but for the child's sake, it's better at 10, rather than 20 years later when health or other problems occur.

My husband and I placed Sherry, our retarded teen-ager, in such a facility after much deliberation by us and criticism from relatives. I thought I would not survive the experience. I found fault with everything and everyone until I realized that after the initial shock of separation, Sherry was better controlled and believe it or not, happier there than she had been at home. Now, eight years later, I could kick myself for

# PEOPLE

## Prince angers farmers

LONDON (AP) — Prince Charles has angered British farmers by linking intensive farming methods with erosion and the destruction of wildlife. "People are becoming increasingly concerned about the damage to the environment arising from the application by farmers of the principle of the maximization of production," he said in an address to an organic food production conference this weekend. "It is increasingly felt by members of the public that large-scale soil erosion, the destruction of wildlife habitat and the excessive use of chemicals and unnatural substances are unacceptable and cannot continue without ruining the countryside for future generations and probably causing long-term health hazards."

National Farmers' Union President Simon Gourlay said the prince had "gone over the top in sounding the alarm bells and I do not think he's justified in saying there's a buildup of long-term environmental problems."

## Barrymore in handcuffs

Drew Barrymore

NEW YORK (AP) — Thirteen-year-old Drew Barrymore, the lovable little girl in the movie "E.T.," said agents hired by her mother put her in handcuffs to take her back to the hospital after her binge of substance abuse. In September, she said, she took a break from her initial hospital stay for drug and alcohol use to audition for a part in New York, and broke her 88-day string of sobriety when she snorted cocaine in a nightclub restroom. She said she then stole her mother's credit card, flew to Los Angeles, snorting more cocaine, and went on a shopping spree. Her mother hired private agents who handcuffed her and sent her back to the hospital, according to her first-person account in this week's People magazine.

She said she descended into drug and alcohol abuse began with her rise in fame. "From the time I became famous in 'E.T.,' my life got really weird," Miss Barrymore said. Miss Barrymore was released from her second stay at a drug-and-alcohol rehabilitation hospital shortly before Christmas. She said she drank at age 8, smoked marijuana at 10 and snorted cocaine at 12.

## Developing of urban blues

CHICAGO (AP) — Singer Chuck Berry thinks the nondescript terra cotta building at 2129 S. Michigan Ave. should take its rightful place as a historic location in the development of urban blues. "I recorded some of my biggest hits at that address," Berry recalled recently. "I have a lot of memories of it. They were great days of great music." The building once was the mecca for the nation's blues musicians — the home of Chess Records. This week, the Commission on Chicago Landmarks will consider the nomination of the two-story building for city landmark status. During the 1950s and 1960s, passersby might have seen Howlin' Wolf, Bo Diddley, Muddy Waters, the Dells, or the Rev. C.L. Franklin and his daughter, Aretha. Bluesman Willie Dixon said he would like to make the building the national headquarters for his Blues Heaven Foundation, which raises money for music scholarships, and perhaps a blues museum. "It is part of the history of America," Dixon said. "Remember, all rock is the blues by rearrangement. And the blues should have a place, a home, so the world knows where they came from."

## No more devilish shows

LOS ANGELES (AP) — It was confession time for NBC Entertainment President Brandon Tartikoff as he put his hand on a stack of Bibles carried by an actor dressed as a priest. Yes, Tartikoff confessed, it probably was a bad idea to broadcast Gerardo Rivera's special on Satanism, which was picked up by the entertainment division after the news side refused to touch it with a 10-foot pitch fork. "I would not say it was our finest hour," Tartikoff told a gathering of newspaper writers and critics Saturday after staging the stunt with the Bibles, at which he also vowed not to buy a sequel to Vanna White's "Goddess of Love." Tartikoff said special like November's "Devil Worship: Exposing Satan's Underground," which featured gruesome reports of torture, child sexual abuse and baby skinning, are best left to the world of syndication.

## Eight inducted into hall

LOS ANGELES (AP) — Comedians George Burns and Red Skelton, newsmen David Brinkley and producer David Walker were among eight people inducted into the Academy of Television Arts and Sciences' Hall of Fame. Posthumously honored Sunday night were Jack Benny, Burns' wife and partner, Gracie Allen, talk show host David Susskind and newsmen Chet Huntley. Burns, Skelton, Brinkley and Walker attended the black-tie ceremonies along with 700 others, including Bob Hope, Art Buchwald, Johnny Carson, Alex Haley, Bert Lancaster and Gregory Peck. The ceremony at 20th Century Fox studios was taped for a Jan. 23 broadcast by Fox Broadcasting Co. The eight were the 29th through 36th inducted into the academy's 5-year-old Hall of Fame.

# Research required to expand U.S. businesses into Europe

Sylvia Porter

If you are the manager of a business, large or small, and you are planning to expand into Europe in a major way, now is the time to make your move.

In a matter of months, Europe is scheduled to become one single market as all trade barriers among nations are expected to tumble in accordance with the establishment of a single European Community by 1992. The date, no doubt, will change (perhaps several times) and how does the challenge to American businesses will change, too. But if you move in advance, you will have the advantage of already being comfortably established. U.S. companies with European operations will "benefit substantially" as the trade barriers are lowered, says John Rhodes of the British Consulate in New York. Rhodes is director in the U.S. of the Invest in Britain Bureau.

To succeed, American businesses must consider several economic factors in selecting European locations. Which countries are best for you? All of them are vying headily for U.S. investment. Which factors head the list? Rhodes lists the following:

- Economic performance. Locate in a country that shows sustained economic growth, rising manufacturing output and indications that inflation is clearly under control.
- Taxation. Carefully study the country's corporate and personal income tax rates, and examine tax treaties with the U.S. Also, be sure you understand how capital gains and losses are treated.
- Component suppliers and raw materials. How available are the materials you need? What are their costs? Can you import what you need and export what you make with a minimum of regulatory interference?
- Transportation. How quickly and cheaply in the country compared to other European nations?

Rhodes points out that Britain already hosts operations of 96 of the Fortune 100 corporations, as well as 70 percent of the top 500 list. But investment continues to come from medium-sized and smaller U.S. companies looking to increase their penetration of the European market. This trend is sure to gather momentum as we move closer to 1992 and the reality of a single European market.

At the start of 1988, American investment in the United Kingdom totalled nearly \$40 billion, which is more than one-third of total U.S. investment in the European Community. The business environment in Britain has long attracted American companies seeking a profitable overseas base of operations. The U.S. accounts for more than a third of all direct foreign investment in the U.K. and extends across a broad range of industry and businesses.

Conversely, British investments in the U.S. at the start of 1988 standing at \$80 billion, Britain is the biggest foreign investor in the United States. The coming decade will mark a milestone in relationships between the U.S. and European nations. We know this milestone lies ahead, but we still cannot be certain of the direction that many of the changes implicit in the establishment of a European community will take.

The whole world is moving inward and the changes are familiar. But we are part of those changes and we are moving in sympathy with the rest of the world.

# Dr. Gott

Peter Gott, M.D.

## Help to relieve excessive gas

DEAR DR. GOTT: I have problems with gas, despite getting plenty of exercise and watching what I eat. Is there an answer?

Eat slowly and thoroughly chew your food. Be careful not to swallow air. The No. 1 cause of gas. Many people tend to swallow excessive amounts of air during eating or drinking, particularly if they eat too quickly or gulp fluids. Avoid carbonated beverages. Stay away from cabbage, beans and other legumes that you know from experience increase your gas. Avoid chewing gum; it may cause you to swallow air. Do not use foods sweetened with sorbitol, a flavoring agent that causes gas. Try anti-gas compounds. Several brands, containing simethicone, are available without prescription. As a last resort, check with your doctor to make sure that you don't have an intestinal abnormality, such as hiatal hernia, causing your gas.

DEAR DR. GOTT: My grandson has tested positive for Cushing's disease. Can you tell me about this condition?

DEAR READER: Cushing's disease is caused by a tumor in the pituitary gland that stimulates the adrenal glands to produce an excess of natural cortisone. Ordinarily, the pituitary — the body's "master gland" — governs the production of adrenal cortisone by secreting adrenocorticotropic hormone, or ACTH. The supply of ACTH itself depends on a delicate "biofeedback system": When the body's level of cortisone is low, pituitary ACTH stimulates the adrenal glands to produce; when the cortisone level is high, ACTH secretion is reduced. In this way, the body maintains a normal balance of the two hormones.

Certain types of pituitary tumor produce ACTH that is not governed by the level of body cortisone. The growths continue to supply ACTH (thereby stimulating the adrenal glands), even though such stimulation is inappropriate and excessive. This produces an over-abundance of cortisone. The excess causes many symptoms, including a moon-shaped face, muscle weakness, purple streaks on the abdomen, diabetes, brittle bones, emotional disturbances, high blood pressure, kidney stones and susceptibility to infection. The treatment of Cushing's disease almost always involves surgery. This is a delicate procedure during which the surgeon identifies the tumor in the pituitary gland and removes it. Sometimes, when surgery is too risky, X-ray treatment (radiation) is administered to the pituitary. Occasionally, the adrenal glands have to be removed if the pituitary treatment is unsuccessful.

# New curb blocking driveway

Smart Money  
Bruce Williams

DEAR BRUCE: I bought my home three years ago. The sidewalk, though old, was in decent repair and was designed in such a fashion that I could drive my car over it into my driveway if I needed to. I sodded the driveway because I didn't often use it, although on occasion we would park a car on the grass if we had company.

Anyway, I went on vacation for a month and, when I returned, you can imagine my surprise when I found a new sidewalk in front of my home and the curb replaced. Now if I wanted to use my driveway, I couldn't do so. I called the city government, and they had the nerve to tell me that what they did was proper. Not only that, they said, but I would have to pay for the new sidewalk! Can you believe it? The mayor and I have had quite a go-round, so it may not be wise for me to mention the city I'm living in.

## Our Language

Look out for perfidy, which involves treachery or faithlessness. I'd be dismayed if I didn't warn you about perfidy. Foment stir up or promotes trouble. Be prepared for this troublesome verb: In the middle of foment is a bad omen.

QUESTION: I know that ferret out means "hunt for," but can you ferret out the reason it does for me?

ANSWER: The expression comes from the European use of the ferret, a small polecat usually with reddish eyes, to hunt rodents. Ferrets have long been used to drive rats or rabbits from their burrows. As a result, the verb ferret came to light as a synonym for discover or unearth.

## Smart Money

It is very likely that this improvement was discussed in the local press — and advertised in legal notices before the ordinance was adopted. But very few citizens read these. Later, to their dismay, there is, moreover, a price for lack of civic vigilance.

In smaller communities, it is a very wise practice and one that I follow religiously — to read the legal notices every week. You can take the time to attend meetings and voice your protest.

Bruce Williams, America's top radio talk host, is heard each week on NBC stations. Write to Williams in care of the Manchester Herald, P.O. Box 591, Manchester 06040. Letters of general interest will be answered in the column.

BRIDGE

By James Jacoby

Some years ago I was invited to participate in a bridge-tips competition that was open to selected journalists and sponsored by Bols Royal Distilleries. The competition has been held several times since then, with different columnists and writers invited to participate. Although these "tips" can be esoteric, this week we'll look at those from 1988 that had practical value for any player.

Today's declarer ducked the first spade trick but had to take the continuation with his ace. Since he had only eight top tricks, he went to dummy with the ace of clubs and led the jack of hearts. He hoped that East might hold the ace of hearts and decide to play low. That hope was laid to rest

Manchester Herald

Tuesday, Jan. 10, 1989 Manchester, Conn. — A City of Village Charm 30 Cents

Budget plan for schools will be cut

By Andrew J. Davis Manchester Herald School Superintendent James P. Kennedy is proposing a \$40 million budget for the next fiscal year — a nearly 13 percent increase that school board members say must be trimmed. Kennedy presented the budget to board members at a Monday meeting. The board took action on the budget, and will not vote on it until February, he said.

SWEPT AWAY — Howard Smith of Storrs sweeps the sidewalk at Turnpike Plaza West on West Middle

Turnpike this morning. Smith is a maintenance employee for Jarvis Realty.

Directors may slash school plan

By Maureen Levitt and Andrew J. Davis Manchester Herald Four members of the town Board of Directors said today that cuts in School Superintendent James P. Kennedy's \$40 million budget proposal will be necessary because a state budget deficit may eat up local aid. Three other members of the Board of Directors said it was too early to make a determination on the Board of Education budget because the state and town budgets have not been released.

Reagan would cut deposit insurance

By Alex Girelli Manchester Herald WASHINGTON — The Reagan administration today recommended curtailing deposit insurance for bank and savings and loan accounts and said the public will have to bear much of the estimated \$100 billion cost of restoring the S&L industry to health. The White House Council of Economic Advisors, in President Reagan's final economic report, said the recommendation is a "trial balloon."

Local bankers criticize lower limits

By Alex Girelli Manchester Herald Two Manchester bankers today criticized a proposal by the Reagan Administration to lower the \$100,000 federal insurance limit on bank deposits. William Hale, senior vice president of ComFed Savings Bank, headquartered in Lowell, Mass., and with a local office at 107 Main St., called the recommendation a "trial balloon."

New House leaders can now look ahead

By Judd Everhart The Associated Press HARTFORD — Now that they've finished appointing House leaders and committee chairmen, House Speaker Richard J. Balducci and Majority Leader Robert F. Frankel say they're looking ahead, trying to put behind them the bruising battle that ousted Irving J. Stober as speaker.

Testing, caution best protection against lead poisoning dangers

Editor's note: This is the second in a three-part series on lead levels in toys, which are already causing concern that children can protect themselves from this health threat. The Electric Boat Division of General Dynamics Corp. has a contract to build the Navy's first Sealaw submarine, a vessel slated as a faster, quieter and more powerful attack sub expected to give the United States military superiority under the sea long into the 21st century. Story on page 9.
