1989 Buick Wildcat. Auto, AC, Tilt, Radio. \$18,999. 647-0667.

Eighth District votes tonight on agreement with town

By Alex Girelli
Manchester Herald

The agreement would fix the boundaries of the district for both fire protection service and sewer service and would also involve state legislation that would provide consolidation of the district with the town unless the district voters consented to consolidation.

The district directors have already approved the agreement. The directors of the town have approved in principle and plan to take a formal vote after tonight's vote by the district electorate. The voters hold the district's legislative powers.

Certain other conditions will have to be met before the agreement can become final. One of them is action by the General Assembly to fix boundaries and to limit consolidation provisions.

One of the questions the voters face tonight is a broad one. It will ask if the voters approve the agreement. The other four questions are more specific.

One will ask if the voters approve establishing fire boundaries along lines drawn on a map that is part of the agreement.

Another will ask if they approve establishing sewer boundaries on lines drawn in another map included in the agreement.

One will ask if the voters want to buy the town fire station for \$750,000 of that sum coming from the town under the agreement.

The final question will ask if the district voters will authorize the district directors to sell land it bought on Tolland Turnpike as a firehouse site.

If the district approves the agreement, it will not need to build a firehouse.

Part of the agreement provides that the town and the district will combine adjacent properties they own and offer them for sale as one parcel. Since the town acquired its property from the state for highway use originally, it will have to get state permission to keep the property from being sold for other purposes.

Feud grows over plans for nightclub

By Nancy Concelman
Manchester Herald

The landlord of the proposed Hanky Panky's nightclub and restaurant on Main Street said downtown merchant George Marlow's criticism of the club is like the "pot calling the kettle black."

Kenneth C. Burkamp, owner of the Manchester Mall at 811 Main St., said the number of police calls to Marlow's apartment building at 869 Main St. indicate that he may be renting to some of the same type of people that Marlow has said Hanky Panky's would attract.

Police records show that in 1988, police responded to 67 calls at 869 Main St. in 1988, 1989, 900-400 in School Cafeteria, 50 cents.

Police could not determine Monday how many of those calls resulted in arrests.

Police also had 11 noise complaints, two drug-related calls, and nine disputes, disturbances or fights. Among the more serious calls were reports of possession of cocaine and opium, assault with a dangerous weapon, risk of injury to a minor, and a drug overdose reported Feb. 11 last year.

There were also 11 medical-assist calls and seven reported motor vehicle violations, records show. In addition, there were calls for attempt to locate,

Welding might have sparked fire

By Nancy Concelman
Manchester Herald

A two-alarm fire that burned for more than seven hours Monday at a 260 Tolland Turnpike trucking and recycling firm may have been caused by employees welding in a room filled with bales of paper and cardboard, fire officials said today.

The fire at a building that houses Recycled Fibers of Connecticut, Admiral Trucking Co. and Anco Trucking Co. is still under investigation, but is believed to have been accidental, Deputy Chief Peter Beckwith of the Town of Manchester Fire Department said today.

Beckwith said the investigation so far also indicates that some employees may have been smoking in the room.

Despite damage to the building and some equipment inside, Angelo Squillante, principal officer of Admiral, said Monday the business would open today.

The fire "won't affect it at all," Squillante said.

At the recycling center, cardboard, paper, wood and other recycled materials from commercial customers are hand-sorted and paper is collected in wheeled baskets for hauling.

The fire was reported at 10:44 a.m. and declared under control.

Tank woes threaten early shuttle return

By Howard Benedict
The Associated Press

CAPE CANAVERAL, Fla. — A puzzling pressure reading on a hydrogen tank forced Discovery's five astronauts to turn off computers and other systems to conserve power today and raised the possibility of an early return to Earth.

Mission Control emphasized the trouble posed no threat to the flight from five to four days, forcing a return on Friday.

The crew members went about their scientific experiments as usual after the "powerizing," talking pictures of environmentally damaged areas of the Earth such as the rain forests of Brazil and the Mexican coastline.

The order came three hours after the crewmen were awa-

Committee to push Bolton charter changes

By Andrew Davis
Manchester Herald

The changes proposed include a shift to a Board of Selectmen-town manager government and eliminating the Board of Finance. Residents will vote on the charter in the May 1 town election.

An organizational meeting of the committee will be held within a week, Lessor said. First Selectman Sandra W. Pierce and Board of Finance members are being planned to help spread the word, Lessor and Manning said.

Manning agreed with Lessor that a committee is needed because residents are confused about the charter.

"I don't think the people yet understand," he said. "I think people know what a town manager is, but they don't understand yet the need for a full-time Board of Finance in town hall."

Board of Finance member Robert L. Campbell, who is against the charter, has said he will issue a response to the charter commission's recommendations by mid-April, but could not be reached for comment today.

Breathing Aid — Tom Rufini of the Town of Manchester Fire Department puts on breathing apparatus before fighting a blaze in a building at 260 Tolland Turnpike Monday. A fire official estimated that 100 tanks of air were used.

Welding — Firefighters examine the fire of a recycling and trucking firm at 260 Tolland Turnpike. Inside the building, bales of paper and cardboard burned for an hour Monday before the fire was declared under control. Equipment and part of the roof were damaged in the fire, which was ruled accidental, fire officials said.

The East-of-the-River Diabetes Club will meet tonight at 7:30 in the H. Louise Ruddell Auditorium of Manchester Memorial Hospital. "New Aids and Equipment for the Person with Diabetes," will be presented by Cindy Dukiewicz, sales representative for Kazarian Pharmacy in Hartford. Laurie Newberg, sales representative for Derata Corp., will speak on the advanced needle-free insulin injection system. Meetings are free and open to anyone interested in diabetes. For more information, call 633-2419.

Softball team still needed

The Manchester Recreation Department has an opening for a team in the "A" Division of their municipal softball program. Any team interested should contact Carl Silver, at the Recreation Department, 647-3084.

Pratt club meeting slated

The Pratt & Whitney Aircraft Club Retiree's Group will meet Wednesday at 10 a.m. at Pratt & Whitney Aircraft Club, 200 Clement Road, East Hartford.

Educators club to meet

Members of Alpha Delta Kappa, an international honorary sorority for women educators will meet at the home of Carol Clifford in Manchester Thursday at 7:30 p.m. Members of Gamma Chapter and Alpha Chapter are welcome. For information, call Dorothy Carlson, 644-8183.

Delta Chapter to meet

The regular meeting of Delta Chapter, Royal Arch Masons, will be held in the Masonic Temple, 25 Center St., Wednesday at 7:30 p.m. The Past Master Degree will be conferred on several candidates. Refreshments will be served following the meeting.

Women host 'Mens Night'

The Manchester Junior Women's Club will hold its annual Men's Night at Manchester Community College's Culinary Dining Room Thursday. Dinner is scheduled from 6 to 7 p.m. and will be followed by Tom Lewis who will speak on the Cheney Railroad. A short business meeting will be held.

Church society to meet

The Girl's Friendly Society sponsored by St. Mary's Episcopal Church will meet Friday at 1:30 p.m. in the Guild Room of the Church.

Hebron hosts craft show

The Hebron Elementary School P.T.O. will present "A Collection of Country Crafts," Saturday from 10 a.m. to 4 p.m. at Hebron Elementary School, Route 85, Hebron. Admission of \$1 and children under 12 are free. Twenty-eight crafters will offer a wide range of crafts including antique reproductions, quilts, hand-woven colonial baskets, pottery, wooden folk art, old-fashioned herbs, porcelain dolls, reproduction furniture and much more. A raffie table will be offered with various items that were donated by the crafters. All proceeds will help support cultural programs at Hebron Elementary School and the Douglas Library in Hebron.

Guitarist set to perform

James Dean, guitarist, will be appearing at the Patriot's Park Lodge Coffee House at Lake Street in Coventry Saturday, from 8 to 10 p.m. Admission is \$2 at the door. Refreshments will be available. James Dean plays a variety of folk, blues and contemporary guitar. For more information, call 742-6412.

Current Quotations

"There are many large and bad smelling scandals," — Constantine Mitsotakis, leader of Greece's opposition party New Democracy, on allegations that Premier Andreas Papandreu and senior Cabinet ministers received millions of dollars in payoffs in a case involving a Greek banker.

"We're trying to figure out how you got James Brown out on parole so that you...," Discovery commander Mike Coats after Mission Control in Houston woke the astronaut this morning with the shouts of James Brown's "I Got You (I Feel Good)." Brown is serving a six-year sentence in South Carolina for charges stemming from a two-state chase.

Lottery

Winning numbers drawn Monday in lotteries around New England:

Coventry Youth Advisory Committee, Town Office Building, 7:30 p.m.

Democratic Town Committee, Town Office Building, 8 p.m.

Thoughts

"Sons are a heritage from the Lord, children a reward from him." Psalm 127:3

Children are a gift from God. Verse 5 of Psalm 127 says that a man is blessed if he has many children. This is not a blessing in today's society when considering overpopulation, food shortages, and the homeless. No matter what people might say, God is still blessing families with children. They have worth beyond all measure.

As parents discipline their children, they are to do so carefully and gently, not to anger them. We are all added to read accounts of child abuse. We need to avoid becoming angry as we discipline. Anger can easily lead to physical or emotional abuse.

The Bible has words of instructions to parents. Ephesians 6:4 says, "Fathers, do not exasperate your children." When disciplining children, we must use great compassion, understanding the difference between child behavior and rebellion, and using corrective measures which do not destroy a child's spirit. It is a responsibility which can not be taken lightly without thought and prayer.

God has established a chain-of-command: first through fathers, then mothers, and finally to the children. Discipline is designed to be an act of God carried out by parents. It is not designed to control children according to the whims and wishes of parents.

As parents discipline their children, they should always consider the biblical guidelines. Children are a heritage from God, a gift to parents. By exercising this God-given responsibility, parents will be leaving a legacy to their children. Please handle your children with prayer and care.

LOCAL & STATE

HIGH-WIRE REPAIRS — Kirby Wilkinson of Stonington and Scott Shane of East Hartford replace wires for Northeast Utilities Monday on South Main Street near Spring Street. They work for Lewis H. Worrard of New York, a subcontractor.

Tolland wants Willington pupils, too

By Andrew Davis
Manchester Herald

The Tolland Board of Education has a plan to woo Willington high school students to its town — and away from Bolton.

Joseph T. Montava, Tolland's school superintendent, said the school board approved the plan Monday to bring the students to Tolland High School. The plan will be presented to Willington Wednesday.

Willington, which does not have a high school, is considering whether to send its students to Bolton High School, Windham High School, E.O. Smith School in Mansfield or Tolland High School in the 1990-91 school year. A Willington school board committee is scheduled to report to the school board in May.

Willington now sends students to Bolton, E.O. Smith and Windham. Recently, the Willington Board of Education voted not to send 42 incoming freshmen to Bolton for the next school year, the last year of a five-year contract. The Bolton Board of Education voted last week to request a meeting with Willington to try to reverse the decision.

Willington now sends 105 students to Bolton High School, paying \$4.82 per student in a contract which bases costs on a per-pupil average. Willington also pays \$3,500 per pupil for 20 students at E.O. Smith, and \$3,783 per pupil to send 85 students to Windham High.

Tolland will recommend to the committee that Willington send either 30 students a year for four years or an entire high school class for three years beginning in 1990, said

Montava. He said Tolland could accept the students because Tolland High School's enrollment is predicted to drop from 274 students in the 1990-91 school year to 517 students two years later.

Preliminary estimates show it will cost Willington about \$3,700 per student, Montava said.

Bolton made its presentation to the Willington committee in February. School Superintendent Richard E. Packman, who could not be reached for comment today, has said the loss of the Willington students would have a negative impact on the Bolton school system because of the revenues and because Willington students are involved in many extracurricular activities.

The Willington committee is scheduled to visit Bolton High School this week.

Moderates offer tax-package alternative

HARTFORD (AP) — Another state tax proposal is being offered that includes a state income tax, but the latest suggestion is not coming from liberals but from the chairman of the House of Representatives' Moderate Caucus.

Rep. Richard T. Mulready, D-West Hartford, proposed a package Monday that would

create a state income tax, while also setting constitutional limits on spending, reducing the sales and corporate earnings taxes, and eliminating more than 10 other existing levies.

The plan, which would raise up to \$2.5 billion more than is projected to be collected under the current tax structure, would

be used to: pay for \$500 million to \$600 million in state spending; increase aid to towns and cities by \$1 billion; and add about \$1 billion to the "Rainy Day" fund budget reserve.

Mulready said he would poll caucus members Wednesday, but the proposal has already drawn mixed reviews.

House Speaker Richard J. Battucci said any plan that includes an income tax would make it through the House this year.

House Minority Leader Robert G. Jaekle, R-Stratford, said he opposed an income tax in general and the rates envisioned by Mulready were too high.

AIDS network offers phone information

By Maureen Leovitt
Manchester Herald

Residents from the Manchester area who need information about where to go for AIDS testing or basic facts on AIDS can now call a regional information line based in Manchester for answers.

About 25 people recently completed a training program to operate the information system, according to Kathleen Tummlillo, a registered nurse who is the coordinator for Manchester Area Network on AIDS.

The network is a volunteer organization made up of about 60

people from churches, businesses, Manchester Memorial Hospital and health agencies. It has four committees — policy, volunteers, education and policy — designed to handle the needs of people infected with the HIV virus and to help the community cope with the health crisis.

The phone number for the information line is 646-6260. It will be manned Monday through Friday from 5 to 9 p.m. Confidentiality is assured.

The information line is one of several projects that the volunteer committee has worked to

establish this year. Tummlillo said. The committee has also started a support group and has tested positive for the AIDS virus.

The support group would put individuals with the virus in touch with people and agencies that can help them, Tummlillo said.

The buddy system involves volunteers "adopting" individuals stricken with the virus to spend time with them. The help includes running errands and providing transportation, Tummlillo said.

She said the network is seeking

more volunteers, as well as individuals who need the services.

Members of the volunteer committee will also be available to give talks to small groups about AIDS and the community attitudes about the disease.

In addition, the education committee will be presenting "AIDS Scope," an education package for the business community for the end of April. Tummlillo said.

The network decided to direct its efforts at area businesses, where a large number of people can be reached, she said. The package includes a videotape titled "AIDS in the Workplace."

AIDS, or Acquired Immune Deficiency Syndrome, has no cure. It is caused by an HIV virus, which infects and damages cells of the immune system, leaving the victim unable to fight off infectious diseases.

The disease is spread primarily through sexual contact or the sharing of needles used to inject illegal drugs.

The network plans a breakfast in the spring with members of the business community to explain the package.

There seems to be no pool of services for the youth," Post said. He said funds do exist to provide transportation for groups like the disabled and elderly.

Once the study was completed, Post said Meeri was instrumental in securing the funding in the last General Assembly session.

YMCA gets minibus Wednesday

By Maureen Leovitt
Manchester Herald

Beginning Wednesday, the YMCA on North Main Street will have a new minibus to transport town youth to activities at the center, thanks to a \$25,000 grant from the state Department of Transportation.

Funds for the van were secured with the help of state Sen. Michael Meiti, D-Glastonbury.

The van — a 1988 handicapped-accessible, 15-passenger Ford Minibus — will be delivered to the center, thanks to a \$25,000 grant from the Howard Smith Bus Co., of Plainville.

Presently, the YMCA owns the bus, and will be the sole user for this program year, which ends in August, said Cathy Hopperstad, co-director of the Nutmeg Branch of the YMCA. Other organizations may be able to use the minibus in the future.

Stoner, Post and Meiti for securing the funding for the bus. Stoner recently became the director of the YMCA Hartford branch.

Crossroads of New Hope Ministries plans to use the bus in the future, Hopperstad said. If they can afford to train a number of people to drive the van.

"More it's used the better off the investment will be," Hopperstad said.

The YMCA will use the van to pick up children involved in before-and-after school day care program, to transport kindergarten children to the center after the morning session, and to pick up children for the summer day camp program, Hopperstad said.

The YMCA pays to have the Manchester Bus Company transport the pupils to the center at a cost of about \$11,000 a year. The cost is not subsidized by the Board of Education.

Manchester Bus Company would still be needed to transport kindergartners, because there

are two routes. But Hopperstad said she is optimistic the van will help to decrease the costs of using the bus company.

Two new staff members have been trained to drive the bus, and are awaiting their licenses. In the future, the center might consider hiring a full-time driver, Hopperstad said.

John C. Post, an analyst with the town Department of Human Services said a community transportation task force was formed about four years ago to assess the number of community services in town and if transportation was available.

"There seems to be no pool of services for the youth," Post said. He said funds do exist to provide transportation for groups like the disabled and elderly.

Once the study was completed, Post said Meeri was instrumental in securing the funding in the last General Assembly session.

DiRosa agrees to get estimates on building work

By Nancy Concelmon
Manchester Herald

The town should follow its architect-selection process to get cost estimates on renovating the Municipal Building and Lincoln Center and building a new police station, even though the process could delay the projects for a year, Mayor Peter P. DiRosa said today.

Republican directors wrote a letter to Town Manager Robert B. Weiss Monday saying they oppose hiring an architect without going through the process.

But DiRosa said today he hadn't discussed the issue with the citizens' committee, the leader for the board. He said he decided the selection process was the proper way to go.

"Everybody seems to be expressing concern about how business is conducted," he said.

DiRosa plans to make his suggestion tomorrow at a meeting between the directors' space subcommittee and the Municipal Space Needs Study Committee, made up of citizens.

If a concrete proposal for expanding municipal and police space is not ready by August, voters probably won't see a referendum question on the November ballot, DiRosa said.

DiRosa said he didn't know how long the selection process normally takes. "It's not quick," he said.

Members of the Board of Directors voted unanimously last Tuesday to appropriate \$30,000 to hire an architect to draw up plans for an expanded and renovated Municipal Building and a new police station, as recommended by the citizens' committee.

DiRosa said at the directors' meeting Tuesday that rising costs and the immediate need for more

space require action by voters within the year. The town would not be able to afford the necessary changes if it waits too long, DiRosa said.

Weiss recommended that the town hire the Lawrence Associates to get the cost estimates because that architectural firm had drawn plans for a new \$13 million municipal building and \$8.5 million expanded police station last year. The town spent more than \$30,000 for those proposals.

The directors decided not to hold a referendum on Lawrence's plans and appointed the citizens' committee to recommend options. The citizens' committee estimated the cost of expansion and renovation of municipal space at \$11.5 million. A new police station in a different part of town would cost less than \$8 million, the committee said.

In the letter to Weiss, the Republicans said that although Lawrence has enough information from previous research to speed the process along.

But Weisbever agreed with the citizens' committee's recommendation that the town hire an architect with experience in renovating vintage buildings.

Lawrence does not have that expertise, the letter to Weiss said.

Weiss argued that Lawrence has enough information from previous research to speed the process along.

But Weisbever agreed with the citizens' committee's recommendation that the town hire an architect with experience in renovating vintage buildings.

Lawrence does not have that expertise, the letter to Weiss said.

Three poisoning victims are reported improved

By Nancy Concelmon
Manchester Herald

A Maryland couple and their 11-month-old daughter were reported in satisfactory condition today at Norwalk Hospital after they suffered carbon monoxide poisoning in a natural gas accident at a Glenwood Street house Sunday, officials said.

Alfred Lepter, 32, his wife, Shelly, 24, and daughter, Amy, were transferred Sunday from Manchester Memorial Hospital to Norwalk Hospital, where they are being treated in a hyperbaric chamber.

The hyperbaric chamber provides pure oxygen at high levels of pressure to draw carbon monoxide out of the bloodstream. Carbon monoxide is a colorless, odorless gas that is extremely toxic and can be fatal.

The family, from Kennedyville, Md., were visiting the home of Alfred's grandmother, Katherine Bussalaka, 80, of 49 Glenwood St., over the weekend when they became sick, police said.

Saturday, the Lepters went to Manchester Memorial Hospital suffering from flu-like symptoms, and were sent home to rest, police said.

Bussalaka's son, William Bussalaka and his wife, Inge, were visiting the home Sunday morning for breakfast when they noticed something was wrong with the Lepters.

Police and fire officials were alerted by officials at Manchester Memorial Hospital Sunday to check the home when they determined the Lepters were suffering from carbon monoxide poisoning.

Katherine Bussalaka was treated at Manchester Memorial Hospital for symptoms related to carbon monoxide poisoning and released, said Andrew A. Beck, director of public relations.

Gregory Chimney Services of Manchester later removed eight gallons of soot and deteriorated bricks from the chimney, Bussalaka said.

The younger Bussalaks did not require treatment, Beck said.

LOCAL & STATE

Court upholds tax authority

HARTFORD (AP) — The state Supreme Court has upheld the authority of the state tax department to tax computer terminals and other equipment purchased by companies running Connecticut's lotteries and off-track betting systems.

The companies, American Totalisator Co., DTP Royalty Inc. and G-Tech Corp., had argued that the equipment was purchased for resale to the state and therefore should not be subject to the sales tax.

The high court on Monday rejected that claim, stating that the "true object" of the contract to run the games and the primary object of the equipment was to implement the wagering systems the companies had agreed to provide to the state, not to resell the equipment to the state.

While upholding the authority of the state to tax the equipment, the Supreme Court rejected the state's argument that the companies should have been forced to pay interest on the taxes not paid.

Livery service sought

The state Department of Transportation will hold a public hearing Wednesday concerning a possible livery service based in South Windsor.

Anthony R. Corso of South Windsor is seeking approval to operate one vehicle in general livery service to all points in the state. This will be Corso's first livery service.

The hearing will be held at 10 a.m. in the hearing room of the Bureau of Public Transportation, 375 Willard Ave., Newington.

Video testimony ruled valid

HARTFORD (AP) — The Connecticut Supreme Court, affirming the validity of videotaped testimony from minors who had been sexually assaulted, has upheld the convictions of two men who had challenged the need to have the victims testify via videotape.

The rulings Monday in the cases of Charles Jarzdek and William M. Spigaro come a week after a similar challenge in another case. Jarzdek had claimed that the state had not met its burden that videotaped testimony was the only way to ensure truthful testimony from his alleged victim, his 5-year-old daughter, and to ensure that she would not be intimidated by his presence during that testimony.

The Supreme Court affirmed the lower court's conclusion that "it is highly probable that if this child were called upon to testify, whether on videotape or in court, in the presence of her father, she would be seriously traumatized and also that she would be so intimidated or coerced by the physical presence of her father that the trustworthiness of her testimony would be seriously called in question."

Student art on display

The works of five Manchester Community College students are among those on display at the Artworks Gallery in Hartford until April 1.

The gallery, in conjunction with Youth Art Month, is featuring paintings, sculptures, drawings and other works by students from kindergarten to college level.

Works were chosen by eight of the gallery's member teachers, including Robert Manning, head of the art department at MCC. Manning chose pieces from Eric Greenstein, Cynthia Lepak, Diane Coate, Jason Wallengren and Alison H. Bayler.

The gallery, located at 100 Allyn St., is open Wednesday through Saturday from 11 a.m. to 5 p.m. or by appointment.

Plant detects radioactivity

NEW HAVEN (AP) — A tiny amount of radioactive material detected inside a large load of Yale hospital trash provides proof of what the radiation screening system at Bridgeport's new waste-to-energy plant is capable of, state officials say.

After the radioactive material triggered an alarm at the plant last Thursday, the trash was returned to a hospital loading dock, where radiation control specialists pinpointed the source and removed it from the garbage.

Evening teachers needed

Manchester Adult Evening School is planning courses for fall 1989 and spring 1990 and is seeking teachers for courses.

New instructors are needed in bridge, photography, computer programs (IBM), beginning typing, accounting, culinary courses, self-development and other suggestions.

For information, call Mr. Lewis at 647-3398 or Mr. Reading at 646-4896.

Baby abandoned in Bristol

BRISTOL (AP) — Police were looking for the mother of a baby boy found abandoned and wrapped in a green plastic garbage bag in the breezeway of a Bristol home.

The child, found Monday morning, was taken to Bristol Hospital by ambulance, where he was listed in good condition late Monday, hospital officials said.

Police received a 911 call at 11:17 a.m. from a 30-year-old woman who said she had discovered a baby in a garbage bag in the breezeway of her house.

Call Tucker, the hospital's public relations director, said the baby weighed 8 pounds, 6 ounces and was between 1- and 7-hours-old at the time he was discovered.

Tucker said that one person who had heard about the child called the hospital seeking to adopt the baby.

Panel urged to approve death penalty bill

HARTFORD (AP) — Elissa Schütz recalled feeling that she wanted to kill the person who shot her sister to death more than a decade ago. But she later came to the conclusion that no one has the right to kill anyone.

Schütz, Albany, N.Y., testified Monday before the General Assembly's Judiciary Committee, which once again is debating a bill designed to make the death penalty easier to impose.

"Victims' family members are not well served by the death penalty," she said. "It does not encourage or help the healing process."

Her testimony was countered by Chief State's Attorney John J. Kelly, who said the current law is unworkable because if a jury finds a single mitigating factor in the defendant's background such as a troubled childhood, the death penalty cannot be imposed.

"Any competent defense lawyer is going to be able to present to a jury at least one aspect of his client's life that constitutes a mitigating factor," Kelly said.

Under the bill before the committee, a jury would be able to weigh mitigating factors against aggravating factors. If during the hearing factors outweighed any mitigating factors, the death penalty could be imposed.

Similar bills have failed in recent years.

Connecticut has only one person on death row, Michael Ross, convicted of six murders in eastern Connecticut. His case is still on appeal.

In an emotional address to the committee, State's Attorney C. Robert Satti, who prosecuted Ross, said Connecticut has "the most restrictive death penalty law that exists" and urged the committee to approve the measure.

Claudia Wasson, the mother of Milford Police Officer Daniel Wasson who was killed in 1987, said being under the influence of drugs or alcohol should not be permitted to be used by the defense as a mitigating factor.

She also said she favored the death penalty because it acts as a deterrent to others.

West Haven Police Detective Keith Sweeney, who was shot and seriously wounded following a chase along the Connecticut Turnpike in 1988, was one of numerous police officers urging the committee to approve the bill.

"I beg you," he said, "please protect the protection of the law. The law now allows the death penalty for eight kinds of murder, including murder for hire, murder of a police officer and murder of more than one person."

Connecticut has not executed anyone since 1960 when convicted murderer Joseph "Mac Dog" Taborsky was put to death.

AGAINST DEATH PENALTY — Elissa Schütz, of New York, holds a picture of her sister who was murdered 10 years ago. Schütz, who heads a group of relatives of murder victims who oppose the death penalty, testified in Hartford Monday.

Boaters blast state's proposal to charge rent on tidal lands

HARTFORD (AP) — Environmentalists and state officials squared off again Monday as boaters and their supporters at a public hearing to discuss the state's plan to start charging rent for boaters who dock on publicly owned tidal property.

"When somebody puts a dock up and takes up 100 feet of the Sound ... that means part of the public space has been taken up," state Department of Environmental Protection Commissioner Leslie Carothers said Monday.

Under the proposed bill, now before the Environment Committee, the DEP would set rates and collect rent on all structures built over state-owned tidal wetlands, including marinas, dock communities and fishing piers.

Another critic, Branford First Selectman Judy E. Gott, told the committee specifically marina operators and boat owners who seasonally keep their boats in the water, while it ignores commercial traffic, lobstermen, shellfish beds, "the yacht club told the committee."

"The average boater is not the wealthy executive," Gott said. "We feel the bill is inequitable in intent since it is aimed at only one portion of the boating community."

Terry Backer, a fisherman active in environmental affairs, also spoke in favor of the bill, but cautioned that it may set the stage for leasing of natural shellfish beds, thus eliminating public fisheries. He also complained that state-leased shellfish beds would be exempted, but town-leased beds would not.

Anticipating questions about the legality of the proposal, DEP Commissioner Leslie Carothers, whose office wrote the bill, said the plan "is consistent with our long history of state and federal case law ... and with the efforts of a number of other states who share our interest in protecting the public that which has always been theirs."

Similar leasing systems are in place in Florida, New Jersey, Maine, Michigan and California, and generate from \$38,000 to \$8 million per year.

The bill drew support from several environmental groups, including the Connecticut Audubon Society, the Connecticut chapter of the Sierra Club, and the Connecticut Public Interest Research Group.

Our coastline is a magnificent, unique resource, and those who would pay these fees are those who are enjoying and benefiting from this resource the most," David Sutherland, director of environmental affairs for the Connecticut Audubon Society, told the committee.

Because New York members of the committee were named only recently, the full committee has not met, and the two states' efforts to clean up the sound remain separate.

"Long Island Sound is not dead yet," said Sen. John Atkin, D-Norwalk. "It is still a relatively healthy body of water. But if we don't do something now, it will become a worse and worse body of water."

Effort lodged to clean sound

HARTFORD (AP) — After a summer marked by beach closings and reports of medical waste washing ashore, a group of Connecticut environmental officials and politicians have started what they hope will be a partnership with New York to fight pollution in the sound.

Since 1985, members of Congress from districts bordering the sound have worked together on the Congressional Long Island Sound Caucus.

A meeting Monday was the first for the Connecticut delegation to the recently formed agency Tass said Monday that Afghan regime forces had repulsed about 14,000 insurgents and 3,000 "Pakistani advisers" after a week of heavy fighting.

They claimed to have captured about 700 regime troops, most of them from Samarkhel.

Ghaous Amer of the Afghan News Agency, an organ of hardline guerrilla leader Gulbuddin Hekmatyar, today described a lull in fighting the previous 24 hours as a change of tactics.

"The mujahedeen are now switching to increase the siege of the city to avoid further bloodshed."

It was not clear whether the insurgents were preparing an immediate second attack.

Correspondents and other eyewitnesses arriving in Pakistan have described intense aerial shelling of mujahedeen positions between Jalalabad and the border, 33 miles to the east.

They estimated hundreds of insurgents and fleeing civilians were killed but had no precise figures.

The capture of Jalalabad, a city of about 200,000, would be a crucial moral victory for the guerrillas, who are fighting to establish an Islamic republic of Afghanistan.

The fight for the capital of Nangarhar province has sent thousands of Afghans fleeing over the border to Pakistan and the filled hospitals in this country with hundreds of wounded.

Hekmatyar, foreign minister in an interim government established by Pakistan-based guerrillas, said Monday that the insurgents are capable at any time of taking Jalalabad.

He said a qualified organization would be selected to estimate the amount of Afghanistan's losses as a result of the Soviet military intervention and how much Moscow should pay in reparations.

Washington (AP) — Defense Secretary-designate Dick Cheney's voting record on military issues took the Republican line, showing strong support for former President Reagan's record peacetime Pentagon buildup.

But the pragmatic lawmaker from Wyoming may not be that predictable as head of the Pentagon.

The Senate Armed Services Committee began hearings today on President Bush's nomination with lawmakers expressing hope that the process can be wrapped up by week's end, when the Senate breaks for a two-week recess.

"The more rapidly we get through this the better," said Sen. Tim Wirth, D-Colo., a member of the committee. "I would hope we could be done by the end of this week."

Bush announced Friday that Cheney would be his nominee for the Pentagon post, one day after the Senate rejected John Tower, a former Texas senator, by a 53-47 vote.

The vote capped a bitter, partisan debate in the Senate where lawmakers expressed concerns over allegations of excessive printing and womanizing against Tower and his work as a paid defense consultant after government service.

Cheney lacks Tower's defense experience, but his background as former President Ford's White House chief of staff for 14 months and reputation as a compromiser places him in good standing.

"I think Dick Cheney knows what one needs to know when one takes over that post," said Senate Democratic Whip Alan Cranston of California. "He will learn a lot more detail now. He is well aware of the broad concepts and as chief of staff at the White House he had to know a great deal about national defense matters."

Cheney is a member of the House Select Committee on Intelligence and the ranking Republican on the panel's program and budget authorization subcommittee.

The sixteen congressmen has supported the MX missile; funding for Reagan's Strategic Defense Initiative, commonly known as Star Wars; production of new chemical weapons; and passage of the Intermediate-Range Nuclear Forces treaty, the U.S.-Soviet pact eliminating medium- and short-range missiles.

But his comments in May 1984 raise questions about whether Cheney will support the MX, which is favored by national security adviser Brent Scowcroft, over the single-warhead Midgetman, which Democrats in Congress have backed.

"I, too, think we should pursue the concept of small, mobile, single-warhead missiles" like the Midgetman, Cheney said. "But I am a skeptic because I question whether or not this House will ever be prepared to vote to deploy the Midgetman."

We may well learn, in the course of this, a lot of things that will be useful for that six-month report," he said. "One of the things we'll be doing over the course of the six months is to look at efforts being tried all over the country, including ours, to see what kind of promise they hold."

NATION & WORLD

CASUALTY — An Afghan guerrilla looks out for attacking government aircraft as he crouches over the body of a communist government soldier killed during fighting near the eastern city of Jalalabad, Afghanistan. He is one of many victims of the battle for the city.

Afghan rebels seek war reparations

ISLAMABAD, Pakistan (AP) — Afghan guerrillas claim to have captured part of the key eastern city of Jalalabad, but the government says the insurgents were routed in their first major offensive since the Soviet pullout.

Government and rebel troops have clashed at Jalalabad since March 6 in the first major test of communist defenses.

Since 1985, members of Congress from districts bordering the sound have worked together on the Congressional Long Island Sound Caucus.

A meeting Monday was the first for the Connecticut delegation to the recently formed agency Tass said Monday that Afghan regime forces had repulsed about 14,000 insurgents and 3,000 "Pakistani advisers" after a week of heavy fighting.

They claimed to have captured about 700 regime troops, most of them from Samarkhel.

New drug control chief targets 'glaring' problem in capital area

WASHINGTON (AP) — On his first day as the nation's first director of national drug control policy, William J. Bennett looked aim at an immediate and glaring problem: Washington D.C.

The vast majority of the slayings that have made the District of Columbia the nation's murder capital have been drug related, this year, there already have been 167 homicides.

"There's not only a real significance, but a symbolic significance, to that," Bennett said Monday, just hours after being sworn into office at the White House by Supreme Court Justice Antonin Scalia. "Fifteen minutes away from the seat of the world's freest government, you've got this kind of thing going on."

Bennett told reporters that in the next few weeks, he may declare Washington a "high intensity drug trafficking area," which would allow him to allocate federal personnel and cash to combat the problem. He said he hadn't decided whether he would call for law enforcement help from any specific agencies, such as the Drug Enforcement Administration, the FBI or the military.

"This would be an interesting test case, a very hard test case," Bennett said. "We would be talking about moving the federal bureaucracy, which has its own reputation, and the D.C. bureaucracy, which is not without a reputation, moving two bureaucracies at once."

However, he said, "It's not a test case to see whether the bureaucracy will respond. It's first and foremost a test to see whether we can be helpful to a very distressing and ugly situation that cries out for help."

The rapid movement on the issue came as a surprise, since Bennett had declined during his confirmation hearings two weeks ago to give senators specifics on what he planned to do. He asked them to wait until he conducted a complete analysis of the situation as well as the dozens of government agencies involved in the drug war and finished his national drug control strategy, a plan required within 180 days of taking office.

But Bennett said Monday that it was appropriate for him to act on Washington's problems before analyzing the whole government and its budget.

"We may well learn, in the course of this, a lot of things that will be useful for that six-month report," he said. "One of the things we'll be doing over the course of the six months is to look at efforts being tried all over the country, including ours, to see what kind of promise they hold."

Pact averts trial in landmark case against Teamsters

NEW YORK (AP) — Three court-appointed watchdogs will oversee the entire Teamsters union for three years as part of an unprecedented agreement that the government says will wrest the nation's largest union from Mafia domination.

The tentative settlement remained subject to approval by U.S. District Judge David N. Edelstein, who deferred action until today, saying the 30-page document was very complicated.

The accord was announced Monday just hours before the start of a trial on a federal civil racketeering lawsuit to oust the union's allegedly mob-influenced executive board.

Attorney General Dick Thornburgh detailed the terms of the agreement in Washington, saying it will give the government "the tools to clean up this union and return control to rank and file union members."

Rudolph W. Giuliani, who filed the lawsuit in June when he was U.S. attorney, said the agreement "achieved all the major objectives that the government wanted."

"It should be considered a breakthrough," he said. Beginning in 1991, the union's highest leaders for the first time in Teamsters' history will be elected directly by the members in secret ballot votes.

Currently, delegates to the national convention pick the executive board members by roll-call vote.

Also under the settlement, the judge will appoint three overseers for three years, with the joint approval of both sides. One would investigate and prosecute alleged union corruption, one would administer disciplinary action and the third would oversee elections.

"All Teamsters international union officers will be directed to resign and there will be no all-powerful trustees running the union on a day-to-day basis. The lawsuit claimed the Teamsters' leadership has a pattern of racketeering" and a "campaign of fear" that included 20 murders, dozens of bombings, beatings, bribes, extortion and theft.

In exchange, prosecutors dropped their bid to seize control of the 1.6 million member union through a court-appointed trustee. The settlement also allows all 11 Teamsters who remained as defendants, including international President William J. McCarthy, plus three other officials who settled last week to remain on the board.

The pact between the current union leadership and the Justice Department gives neither side complete control, although both sides tried to put the best face on the compromise agreement.

"The members are assured there is a mechanism in place to remove those persons alleged to be conducting improper activities," said James T. Grady, Teamsters' general counsel. "The goals of a clean and democratic union are consistent with the goals of the current leadership."

Thornburgh said the settlement "eliminates 30 years of efforts" by the Justice Department "to remove the influence of organized crime within the Teamsters union."

Using federal racketeering laws, prosecutors sought a court-appointed trustee or committee to run the Teamsters and impose a series of reforms. It was the first time the government had tried to seize control of an entire union.

Thornburgh said the settlement contained "roughly the same kind of remedy that was sought" in the lawsuit.

Board Grady noted that none of the union's ruling executive overseers for three years, with the joint approval of both sides. One would investigate and prosecute alleged union corruption, one would administer disciplinary action and the third would oversee elections.

"All Teamsters international union officers will be directed to resign and there will be no all-powerful trustees running the union on a day-to-day basis. The lawsuit claimed the Teamsters' leadership has a pattern of racketeering" and a "campaign of fear" that included 20 murders, dozens of bombings, beatings, bribes, extortion and theft.

"The members are assured there is a mechanism in place to remove those persons alleged to be conducting improper activities," said James T. Grady, Teamsters' general counsel. "The goals of a clean and democratic union are consistent with the goals of the current leadership."

Thornburgh said the settlement "eliminates 30 years of efforts" by the Justice Department "to remove the influence of organized crime within the Teamsters union."

OPINION

Vote tonight determines 8th's future

Voters of the Eighth Utilities District owe it to themselves to attend the district meeting tonight and cast informed votes on the question of whether the district should enter into an agreement with the town over fire and sewer jurisdiction.

The question profoundly affects the future of the district. The decision should not be left to a handful of voters, particularly in a political body that prides itself on direct democracy, on responsiveness to the public will, and on a high degree of citizen participation.

Negotiators for the district have worked very hard over a two-year period to develop a set of accommodations designed to eliminate causes of conflict and confusion between the town and the district and at the same time preserve and protect the future viability of the district.

District officials held two meetings recently at which they explained the agreement. Not more than 20 district residents came to the meetings.

District voters rejected one agreement in an election in November 1987. But in that case, there was considerable division among district leaders over the merits of that agreement and there was a heavy vote. The mandate was clear.

The situation is different now. There is no discernible division among leaders who concern themselves deeply with the district's welfare, and there is no general election to attract voters.

If there is a negative vote tonight, the agreement will be defeated and the town and district will be back to square one, with continued dispute and litigation almost inevitable.

A vote in favor of the agreement would be the best outcome. If the agreement is defeated, it should be a wide representation of district voters who make the fateful decision.

The meeting will be held at 7:30 p.m. at Robertson School, 45 North School St.

Letters to the editor

The Manchester Herald welcomes original letters to the editor. Letters should be brief and to the point. They should be typed or neatly handwritten, and, for ease in editing, should be double-spaced. Letters must be signed with name, address and daytime telephone number (for verification). The Herald reserves the right to edit letters in the interests of brevity, clarity and taste. Address letters to Open Forum, Manchester Herald, P.O. Box 591, Manchester 06040.

Save Oak Grove from a firehouse

I am very disappointed to discover that anyone would betray that trust and responsibility. A few years ago, a concerted effort by many of us in town raised enough money to repair and preserve the Oak Grove Nature Center's covered bridge. That response should have sent a strong signal to officials as to how our citizens feel about this precious resource. I believe it was a tribute to our sense of values, and I was proud of Manchester for it.

I hope enough people will once again speak up and send a message to our officials that we expect them to protect and preserve the Oak Grove Nature Center in its entirety. In a world of high-powered politics, it is an opportunity to make an important contribution to one of the really worthwhile things of our town.

And the beauty of it, the sheer amazement of it all, is that it lies right here in our very midst, nearly hidden, tucked away like the treasure it is! We in Manchester are stewards of a special gift, a nature preserve with a covered bridge, pond, streams, meadow, woods and shaded walks, alive with birds, deer, fish and ducks! I have always admired our town directors for recognizing the value of such a preserve and have taken for granted their trustworthiness in protecting it as the irreplaceable asset that it is.

Democratic strategy in dispute

PHILADELPHIA — Jesse Jackson was not among allies — anything but. So when they lectured him on political science, he lectured right back. In the resulting standoff, the edge belonged to Jackson, the twice anointed future candidate for the White House.

"The issue is not just who leads but who needs it," the black leader from Chicago told establishment Democrats, who know well that they badly need him to stand a chance of regaining the presidency in 1992.

It was all quite polite, but the lines were clear at the Democratic Leadership Council conference this past weekend. Centrist and conservative Democrats organized the council four years ago, after the landslide defeat of Walter F. Mondale's ticket, in an effort to turn the party toward what they consider the voter mainstream.

Jackson does not accept their map of the mainstream. He has been elected by the council to be its president. He has been elected by the council to be its president. He has been elected by the council to be its president.

He suggested there was more to be learned about the next presidential election on the Eastern Airlines picket line than in a seminar at a Philadelphia hotel.

Jackson told the council that white airline pilots who make \$140,000 a year are on his side now because he would be their savior. "I am one of the net gain in white supporters," he told the conference of Democratic workers and officeholders. "I understand how to get white votes."

Jackson and the Democratic Leadership Council stand on opposite sides in the argument over a route back from five defeats in the past six presidential elections.

Ethics panelists not pure

WASHINGTON — When the House ethics committee finishes taking Speaker Jim Wright, D-Texas, to the woodshed, it should consider turning the piddle on itself.

Campaign and financial records reveal that many ethics committee members are not exactly as pure as the driven snow. One bought a new car with campaign funds. Another used the money for baby sitters. All but a few took honoraria from groups with direct interests in issues before the lawmakers.

Wright was scrutinized by the committee for, among other things, allegedly interfering with federal efforts to shut down Texas savings and loans and directing a staffer to write his book, "Reflections of a Public Man."

Our reporters Stewart Harris and Jim Schmidt checked the records of the ethics committee members to see if they, too, could stand up to scrutiny. Many cannot. What happened that day? Where are you, Mike? Why must we all part so? Why won't he be here

But in discussing the Chicago race, Jackson said he had supported Daley twice in other elections, and "he's not endorsed me once."

"You should support people who support you," Jackson said, noting that some of those who criticize him now have refused to support black nominees in the past. "What is sacred are relationships. What is sacred is the primary."

That's a line that may be replayed in presidential primaries are again the issue.

Coal and oil concerns noticed that the House ethics committee is not pure. Ethics Committee members Charles Pashayan, R-Calif., and Larry Craig, R-Idaho, are also on the list.

Science has shown that the ozone layer screens out ultraviolet rays that cause skin cancer, blindness and severe eye cataracts. Also, the ozone layer breaks up soot and dirt in the air to help keep our air cleaner.

Sixth-graders at Bowers concerned about ozone layer

Editor's note: Sixth-graders at Bowers School have written letters to the editor as part of a special project for Ozone Awareness Week.

Besides the letters, class activities have included a poster-coloring contest, a student teaching, a skit, and visits to the state Capitol and last week's meeting of the town Board of Directors.

Some of the pupils' letters are published below. More will be published later this week.

I am very concerned about the ozone layer and it being destroyed. I think the public should be aware of the ozone deteriorating. If the public gets involved with helping this problem, other states and countries will soon follow.

My sixth-grade class at Bowers School is very interested and we hope to help the town and state fight this problem.

In places like Antarctica and Australia holes are developing in the ozone layer. These holes can cause blindness and severe skin cancer and burns.

Five years ago skin cancer was rare. Now it is common. This is because of the holes in the ozone layer. These holes are caused by CFCs (chlorofluorocarbons) and halons are breaking down the ozone layer, which is what we have to stop. Some things that use CFCs and halons are aerosol cans, Styrofoam, refrigerators, air conditioners, etc.

I think we should make a substitute for the products that contain these harmful chemicals. There are many more. And remember: The quicker we react to this issue the better our future will be.

People are harming the ozone layer and don't know it. They don't know that if more ultraviolet rays were to hit the earth it could cause blindness, eye cataracts, severe skin cancer, burns and damage to the immune system.

It is important to cut back on the use of CFCs and halons because they destroy the ozone layer. The ozone layer blocks ultraviolet rays from the sun that can cause blindness and severe eye cataracts and damage to the immune system.

Scientists now think that 5 percent less ozone in the earth's atmosphere would allow 25 percent more ultraviolet radiation to reach the earth. There are already holes in the ozone layer over Australia and Antarctica.

An international treaty was recently signed by 48 nations and put in effect Jan. 1. The treaty will cut back on the making and use of CFCs. Most nations must cut back on their use of chlorofluorocarbons by 20 percent by 1994, and 50 percent by 1999 (total 50 percent cutback).

So please stop using products that contain CFCs, because I want my children and everybody's children to have a healthy life.

I am concerned with the ozone problem. Ozone is a natural gas that's being destroyed by CFCs (chlorofluorocarbons) and halons. They're found in aerosol cans, refrigerators and Styrofoam. It takes two years before the CFCs and halons reach the atmosphere.

Ozone protects us from ultraviolet rays. Ultraviolet rays cause skin cancer, blindness, eye cataracts, and severe eye cataracts. Five years ago people got cancer at age 40, and now people are getting it at age 20. The ozone is mostly found in the upper regions of the atmosphere. Right now there are holes in the ozone layer over Antarctica and Australia.

I think his subject is important because if the ozone is destroyed then we will be, too.

The ozone layer is being destroyed by chemicals called CFCs. It takes two years for CFCs to get to the ozone layer. The ozone layer is located in the upper regions of the atmosphere. Right now there are holes in the ozone layer over Antarctica and Australia.

I think his subject is important because if the ozone is destroyed then we will be, too.

The ozone layer screens harmful ultraviolet rays, so if too many ultraviolet rays come down to us, it could cause skin cancer, blindness and severe burns. There are already several holes in the ozone layer over Antarctica and Australia.

I think we should all cut back on the use of CFCs or we could be severely harmed by the ultraviolet rays.

Most nations should cut back on the use of CFCs in Styrofoam, aerosol cans and refrigerators. Also, factories should decrease the use of CFCs. Save the ozone layer!

The ozone layer is a very important issue. Ozone is a natural gas present in the upper atmosphere that partially blocks the earth's surface. When ultraviolet rays hit the earth's surface, it can cause blindness and severe skin cancer and burns.

Five years ago skin cancer was rare. Now it is common. This is because of the holes in the ozone layer. These holes are caused by CFCs (chlorofluorocarbons) and halons are breaking down the ozone layer, which is what we have to stop. blindness, burns and skin cancer. The ozone layer shields us to 99 percent of the harmful ultraviolet rays.

Scientists think that 5 percent less ozone in the earth's atmosphere would allow 25 percent more ultraviolet radiation to reach us. There are already holes in the ozone layer over Antarctica and Australia.

Most nations should cut back on the use of CFCs in Styrofoam, aerosol cans and refrigerators. Also, factories should decrease the use of CFCs. Save the ozone layer!

The ozone layer is a layer of gas, much like oxygen, that protects us from harmful (if not deadly) ultraviolet rays cast at us by the sun. The layer either absorbs or reflects the ultraviolet rays. This makes it a very important resource. This resource is slowly deteriorating because of the constant releasing of CFCs, or chlorofluorocarbons (which are found in car air conditioners, Styrofoam and refrigerators, air conditioners, etc.)

I think we should make a substitute for the products that contain these harmful chemicals. There are many more. And remember: The quicker we react to this issue the better our future will be.

skin cancer, blindness, severe burns and death. I think we should boycott some of these industries or at least cut down on the use of these products. I'm only 11 years old and I don't want the world to be annihilated before I'm 20. If we do something now my generation and the ones after can have a better life.

Rebecca Keeney

Our sixth-grade class is working on the problem with the ozone layer. The ozone is breaking down because of CFCs which are in Styrofoam, aerosol cans and refrigerators.

Ozone is a natural gas in the atmosphere that partially blocks the earth's surface. When not enough ultraviolet rays are blocked, people get skin cancer and damage to immune system.

I think we should make a substitute for the products that contain these harmful chemicals. There are many more. And remember: The quicker we react to this issue the better our future will be.

People are harming the ozone layer and don't know it. They don't know that if more ultraviolet rays were to hit the earth it could cause blindness, eye cataracts, severe skin cancer, burns and damage to the immune system.

Anyone can say it looks like a great day when they wake up in the morning, but if we don't discontinue the use of Styrofoam, aerosol cans, air conditioners and refrigerators we won't be able to wake up in the morning and say what a great day it is.

You see, Styrofoam, aerosol cans, air conditioners and refrigerators have CFCs (chlorofluorocarbons) and halons which are chemicals that break down the ozone layer. The ozone layer is a gas that protects us from too much ultraviolet light hitting the earth's surface. Ultraviolet light five years ago could cause severe skin cancer to people who were 40 years old. Nowadays, people who are 20 years old can get diseases from the direct increase in the ultraviolet light.

So next time you say it looks like a great day, stop using CFCs and halons and make it better!

LOCAL & STATE

Chamber to hear Murphy

George E. Murphy, the town's parks superintendent, will speak on Tuesday at 8 p.m. at the Greater Manchester Chamber of Commerce, 20 Hartford Road. The talk, free to the public, is being sponsored by the Manchester Land Conservation Trust Inc. Murphy has been studying some of the 130 acres in Manchester and Vernon that is held by the land trust. Murphy has been advising the town on how to use land for 10 years. In 1978, he suggested selling timber from 3,200 acres of watershed land and since then the town's timber projects have produced about \$350,000. Malcolm Barlow, land trust president, said the town has many older forest areas that may be ready for timber contracts. Sales could help the trust pay for its dam repair project at the Risley Reservoir.

Agency owner sent to jail

HARTFORD (AP) — The owner of a Meriden insurance agency who pleaded guilty to making a false statement on his tax returns has been sentenced to four months in prison and a \$5,000 fine. U.S. Attorney Stanley A. Twardy Jr. said.

Paul D. Kreminski, 46, of Meriden, admitted during his plea that as a result of placing his insurance business in a tax shelter, he falsely reported on his 1982 personal tax return a taxable income of \$15,711, when his actual income was \$4,239. Twardy said Monday. Kreminski was sentenced to two years imprisonment, suspended after four months, three years probation and a \$5,000 committed fine, which must be paid before he is released from custody.

On March 6, James Florence, of Manchester, an employee of Kreminski's, was sentenced to two months imprisonment and a \$2,500 fine for his role in the tax shelter, Twardy said.

Head Start accepts signups

Applications are being taken for the 1989-90 Head Start program for children of low-income families in towns served by the Windham Area Community Action Program. Head Start is a development program open to children ages 3 and 4 that includes education, health and nutrition, social service and parent involvement.

To qualify, families must be receiving public assistance or meet federal low-income guidelines. Handicapped children or those with special needs are eligible regardless of income.

Children attend Head Start for a minimum of 3 1/2 hours a day for 128 or 160 days a year. The program is free and transportation is provided to and from school for students and parents. Children are served breakfast and lunch.

Students win first ruling

RIDGEFIELD (AP) — A student literary magazine has won a preliminary injunction barring the Board of Education from enforcing a policy that gives it editorial control over the publication, the students' lawyer says.

In granting the injunction sought by representatives of Lodestar, Ridgefield High School's literary magazine, U.S. Magistrate Arthur H. Latimer said Friday there were legitimate questions about the constitutionality of the school board policy.

"This is a clear loss for the school board," said William Laviano, the attorney for Lodestar. "I think Latimer is indicating that there is a serious possibility that the policy is not under the purview" of a 1988 U.S. Supreme Court ruling that found that public high school students, in school publications, do not have the same free-speech rights as adults.

Latimer found that the school board's policy, which allows it to exclude contributors who aren't current students or faculty members, may currently violate the ruling. He said the Supreme Court decision.

Meet the candidates

BOLTON — The Bolton Women's Club will sponsor a "meet the candidates" night April 10 at 7:30 p.m. at the Community Hall.

Candidates have been invited to share their views and qualifications in preparation for the May 1 town election.

Substance abuse hearings

The State Planning Committee of the Connecticut Alcohol and Drug Abuse Commission has scheduled public hearings throughout the state to solicit input from citizens in setting priorities for the fiscal year 1989-91 budget.

A hearing has been scheduled for 3 to 6 p.m. March 30 at the commission office, 999 Asylum Ave., Hartford.

Other hearing dates are: Wednesday, 4 to 7 p.m., Bridgeport City Hall; Thursday, 4 to 7 p.m., Windham Town Hall; March 22, 4 to 6:30 p.m., South Central Community College, New Haven; and March 29, 4 to 7 p.m., Waterbury City Hall.

WIC could be restored

HARTFORD (AP) — Funds for a state program that provides free milk and other staples to 46,000 low-income people in Connecticut could be restored as early as next month, according to a state official.

Local directors of the Women, Infants and Children supplemental food program were told earlier this month they have fewer coupons good for milk, juice and peanut butter to women with children 1 to 5 years old.

The women receive coupons that they exchange in supermarkets for staples such as baby formula, cheese, cereal and juice.

The cuts, which affected more than 21,000 children, were needed, because without them, the state would spend \$1.2 million over its \$21.8 million food grant this year, state officials said.

Fire

From page 1

in just under an hour, but some of the 150 bales of paper and cardboard in the building continued to burn, Beckwith said. Firefighters used loading equipment to move the bales out and a backhoe to break them apart while dousing them with water, he said.

But to get into the building with the loaders, firefighters had to stop the hoses and drain them until they were flat so the equipment could be rolled over them, even though the fire was still burning, he said.

"It was a very large logistical problem," he said. Also, a truck was parked outside in the area where the burning bales were to be pushed. With six fire engines parked next to the building, there was barely room for the truck, Beckwith said.

"The heat of the fire caused some major concern to start with because it's a truss-type roof," Beckwith said. "The metal loses strength at about 400 degrees. I lost some steel up at the top."

Also damaged were three trucks, a payloader, a paper baler and parts for the trucks that were inside the building, he said.

There was no sprinkler system in the building, Beckwith said. Chief Building Inspector Leo Beval said today sprinklers were not required for the building when it was built before that requirement was included in regulations.

"If the structure is rebuilt, sprinklers might be required," he said.

Tanks containing oxygen and propane were in a part of the building that was not affected by the fire, Beckwith said. Chief Building Inspector Leo Beval said today sprinklers were not required for the building when it was built before that requirement was included in regulations.

"It's a great start to a long launch season," said launch director Bob Sieck.

Discovery's liftoff Monday at 9:57 a.m. EST was an hour and 50 minutes later than planned because of early morning fog that obscured the launch pad.

The five astronauts rode Discovery into orbit Monday on the 28th space shuttle flight and the third since the Challenger explosion killed seven astronauts more than three years ago.

The blazing liftoff marked a successful beginning to NASA's plan for seven shuttle missions this year as it moves toward a post-Challenger recovery goal of safe, once-a-month launches by 1992.

"It's a great start to a long launch season," said launch director Bob Sieck.

UConn is not excited by bid

There wasn't much surprise in Sunday afternoon's announcement of the 64-team NCAA Tournament. It didn't include the University of Connecticut.

With a 16-12 record, including a 6-10 mark in the Big East Conference, the Huskies were "on the bubble."

The bubble burst Sunday afternoon. The Huskies drew an invitation from the National Invitation Tournament, a tournament it won a year ago in sterling fashion. But the NIT isn't the same.

The Huskies had aimed for the NCAA Tournament this year. But UConn Coach Jim Calhoun said his club is glad to be in a postseason tournament. "I'd like to be in the NCAA, but this is the postseason and I want to be in the postseason every year."

You know this is lip service. The Huskies drew an invitation to the NIT this time with the same attitude they had a year ago. This is not the place they want to be; this is a disappointment.

A year ago, the Huskies were anxious to prove they were better than their record indicated. This year, they have virtually nothing to shoot for. A second NIT championship would be nice, but it wouldn't bring the same response as a year ago.

So what went wrong this year? A lot. It started off badly in the preseason with the injuries to Phil Gamble and Murray Williams. Gamble suffered a broken right wrist — his shooting hand — and then had arthroscopic knee surgery.

And this season can be written off as a lost one for Williams. The 6-7 sophomore started the year with a stress fracture in his foot, and that plagued him from day one. He never got into the season mentally. After such promise in the NIT a year ago, Williams has slipped a peg or two in Calhoun's book. What's needed for '89-'90 is to bring the former Torrington star's fragile confidence level back from ground level.

The Huskies' biggest weakness throughout the year, however, caught up with them in their Big East Conference Tournament clash with Seton Hall. Call them the "Gang That Couldn't Shoot Straight."

UConn, the second worst shooting team in the Big East, was a miserable 28 percent from the floor in its loss to the Pirates. You're not going to beat too many pickup teams with shooting like that.

The Huskies begin their defense of the NIT title Wednesday night when they hit the road to meet North Carolina-Charlotte at the new Charlotte Coliseum. The 49ers sport a 17-11 mark, against Connecticut's 16-12 ledger. A home game may follow if UConn prevails, and a second NIT championship would be appreciated.

But this season, perhaps one of inflated expectations for Connecticut, hasn't gone as many had envisioned.

There were two special spectators at Saturday night's Coventry Ellington Class S quarterfinal at South Windsor High School. One was Jack Phelan, University of Hartford head coach. The other was Vernon Howie Dickenman, University of Connecticut assistant coach.

The center of their attention, obviously, was Coventry's Jack Ayer.

Phelan's interest is genuine. As for UConn, Calhoun said recently he thought Ayer could play Division I ball, but probably not in the Big East Conference.

It's curious Dickenman would be there, considering UConn needs to sign a couple of recruits in the signing period that begins April 12. You wouldn't expect Dickenman to spend a night watching someone Connecticut already has its'nt going after.

Curious, indeed.

Len Auster is sports editor of the Manchester Herald.

Celtics' bench produces as they climb over .500

By Mark Seavy
The Associated Press

HARTFORD — Boston Celtics Coach Jim Rodgers has been playing recently.

Reggie Lewis scored 23 points and seven other players finished in double figures as the Celtics defeated the New Jersey Nets 114-91 Monday night to move over the .500 mark for the first time since Dec. 18.

The Celtics, now 31-30, went to the bench Monday for a combination that Rodgers has been playing recently.

Reserves Joe Kleine, Ed Pinckney, and Kevin Upham, inserted into the lineup late in the first quarter, led a surge that saw the Celtics take a 17-point lead with 10:30 left in the first half.

Kleine and Pinckney, whom the Celtics acquired from Sacramento in a trade last month, and Upham, who was signed to a 10-day contract from Albany of the Continental Basketball Association, combined for 10 points in a seven-minute stretch in the first half.

"I thought it was important that we use a lot of combinations," Rodgers said. "We had a positive response from the bench."

Upham, who had played three seasons in the CBA and was released by the Miami Heat in January after a 10-game hitch, said he's trying to make the best of a good situation.

"I believe in one minute, I want to do the best I possibly can, and I'll play 20 minutes I want to play the best I possibly can," said Upham, who scored 8 points and had six assists.

The Celtics pushed their lead to 21 points, 105-84, with three minutes left on the strength of Lewis' 14 second-half points.

Dennis Johnson added 14 points for the Celtics primarily on outside jump shots while Mike McGee led the Nets with 23 points.

The Nets, who shot 36 percent from the field, trailed 66-39 at halftime before scoring 18 straight points in the third quarter to close within 60-68 when John Bagley sank a 20-foot jump shot at the 1:54 mark.

The Nets' poor shooting was not lost on Coach Willis Reed. "We had good shots but didn't make them," Reed said. "We had open shots but no one could put them down."

LAKE CHARLES, La. (AP) — Despite a 16-13 record this season, the McNeese State Cowboys deserve to be in the NCAA tournament just as much as any of the other 64 teams in the field, Coach Steve Welch says.

"It's a tremendous challenge for us," Welch said Monday. "We will try to use the same tactics that we used to win the Southland Conference tournament. It's just a bigger hill to climb."

McNeese plays in its first NCAA tournament game over Thursday against fourth-ranked Illinois in an opening-round contest at Indianapolis.

Illinois was selected Sunday as the top seed in the Midwest regional. The other No. 1 seeds were third-ranked Georgetown in the East, second-ranked Oklahoma in the Southeast and top-ranked Arizona in the West.

Georgetown, the Big East champion, opens Friday against Princeton at Providence. Later that day, Oklahoma will play East Tennessee State in Nashville, and top-ranked Arizona will be in Boise.

Idaho on Thursday against Robert Morris. Welch has seen his share of trouble since taking the helm at McNeese State last year.

He inherited a program on probation and docked two scholarships because of recruiting violations by his predecessor, Glenn Duhan. That probation ran its course and expired last month.

McNeese was 7-22 last year, its first under Welch. "Our first five players are comparable to a lot of players, if we work hard. But we don't have the depth that other teams have, partly because we're only working with 13 scholarships now," he said.

The lack of depth was never more apparent than in the 12-game period during which point guard Terry Griggley was sidelined with pulled abdominal muscles. The Cowboys lost seven of those games, six of them consecutively.

With Griggley out, opponents were able to turn games into scoring contests, and that's not the Cowboys' preferred style.

Siena not on the spot in tourney

By Ed Schuyler Jr.
The Associated Press

The pressing question in college basketball is, could the Siena Saints be on the spot when they make their first appearance ever in the NCAA Tournament?

A measles outbreak at Siena's Loudonville, N.Y. campus led health authorities to declare a quarantine, which forced the Saints to play nine straight games, dating back to Feb. 6, without any fans in the stands.

The quarantine ended Saturday, and there will be fans present when Siena plays 12th-ranked Stanford on Thursday in the East regional's first round at Greensboro, N.C.

"They'll be stage-struck," joked athletic director William Kirach.

Only the players, coaches, game officials and the sports writers were on hand for Siena's previous nine games, including three in the North Atlantic Conference Tournament at the 16,000-seat Hartford Civic Center. What self-respecting megalomaniac would have anything to do with a referee or a sports writer?

Some 300-400 Siena fans were expected to make the trip Greensboro. "Everybody is very excited," John D'Argenio, sports information director, said. "This is our first one (NCAA Tournament)."

Siena is more than a cute story. The school founded in 1871 by the Franciscan Friars has a 24-4 record, which includes a win over Pittsburgh of the Big East. And don't discount that nickname — Saints.

Before the season, Siena dropped the name Indians, as many schools, including Stanford, have done out of respect for American Indians. Siena was officially named the Saints before the NAC tournament final against Boston University on Saturday.

With Siena trailing 67-66, Tom Huertler took a jump shot, which hit nothing, but the ball landed in teammate Steve McCoy's hands. McCoy put the ball in the basket just before the buzzer for 68-67 victory.

There was a nickname contest. "More than 150 names were suggested. The list was pared down to 10 and then four names were given to the president (Father Hugh Hines)," D'Argenio said. Some of the names were Friars and Spirit, Capitols and Seneca.

After the measles outbreak, such names as Green Valley and Rash were suggested, but the contest was already over.

The only Siena player to get measles was freshman guard Mike Brown. He did not miss any games because only two were canceled and two others were rescheduled while he had measles.

Siena's quarantine was over in time for its championship victory over Boston University, but fans were kept away because a quarantine was still in effect at the University of Albany, the state capitol.

Siena is seeded 14th in the 16-team East Regional, 15th in the Pacific-10 Conference runner-up, is seeded third.

So what? It's a time for us, a pressure-free time," Siena coach Mike Deane said. "We'll play for the upset, we're going to play loose. This is the big show for us."

Come to think of it, the measles might have given an edge to Siena. No matter what a team's prior accomplishments have been, in the NCAA Tournament everybody is starting from scratch.

LAKE CHARLES, La. (AP) — Despite a 16-13 record this season, the McNeese State Cowboys deserve to be in the NCAA tournament just as much as any of the other 64 teams in the field, Coach Steve Welch says.

Elliott lone repeater on AP All-America team

By The Associated Press

Sean Elliott didn't have to be told he had made The Associated Press All-America team. But he was happy to find out. "It's a real good feeling. Going into the (NCAA) tournament, it's a real emotional boost," the Arizona senior said. "By this time, there's something that tells you, you almost know you're going to be on the team."

Elliott, the only repeater on the first team announced Monday, was joined by seniors Danny Ferry of Duke, Stacey King of Oklahoma, Sherman Douglas of Syracuse, and freshman Chris Jackson of Louisiana State.

"This is a tribute to our team and its position," said Elliott, who added that this year he is "a lot stronger and a lot smarter on the court, and 100 percent better on defense."

The voting was done by the same national panel of sports writers and broadcasters who selects the weekly Top Twenty. Each voter selected three teams with points distributed on a 5-3-1 basis.

The second team was comprised of seniors Larry Rupp of Louisville, Glen Rice of Michigan, Mookie Blaylock of Okla-

McNeese

From page 11

"We've been dubbed a blue collar team," Welch said. "If we don't work, we don't win."

Before Griggley's injury, McNeese almost always played man-to-man defense and worked patiently for the good shot. Even though he returned to health before the Southeastern Conference tournament, McNeese has gone almost exclusively to a zone or a triangle-and-two.

Offensively, Griggley keeps the Cowboys patient and tries to work the ball inside to Anthony Pullard, 6-foot-10, or Mark Thompson, 6-9, who play the double post. If that's not working, the next men kick it out to 6-4 guard Michael Cutright, the team's leading scorer.

Cutright averaged 20.1 points, Pullard 17.4 and Thompson 11.7. Griggley is an excellent athlete who started for Florida State's football team as a defensive back as a freshman in 1984. However, shoulder and knee injuries cut his football career short, and he was transferred to McNeese.

McNeese has won five straight since his return, closing out the regular season with victories over South Houston State, Southwest Texas and Stephen F. Austin, then beating Northeast Louisiana and North Texas in the tournament.

Arizona State offered Keady a reported \$300,000 annually to take over its beleaguered basketball program, which has had three coaches and no winning season since 1982.

"It was just a quick-hitter," Keady said of the visit. "I went out, and I listened some more. They've got some impressive facilities, that's for sure, and I was impressed with their support systems, academics, weightlifting, these types of things, people that would sell season tickets in blocks, getting students back out to the game. I think they're starting to understand what it takes."

"And we liked the weather. Who wouldn't? But that's not what we're going for," Keady said. "We know this is a tremendous job here, and I wouldn't ever give it up unless I thought it was going to be better here."

"But it's a gamble. We're aware of all the negatives; but sometimes a guy needs a new challenge to get him going."

"We've been working nine years to get this program where we want it," Keady said. "We know this is a tremendous job here, and I wouldn't ever give it up unless I thought it was going to be better here."

Cavaliers no longer the best as their offense crumbles

By Bill Barnard

The Associated Press

The Cleveland Cavaliers' offense collapsed, and so did their standing in the team with the NBA's first round.

Utah set a team record by leading the Cavaliers to 27 points in the first half Monday night and went on to win 98-83, dropping Cleveland 300 behind Detroit for the best record in the NBA.

Whalers host Islanders

HARTFORD — The Hartford Whalers (31-25), who lost ground last weekend in their battle for third place in the Adams Division with the Buffalo Sabres, will host the New York Islanders (24-31) tonight at 7:30 Sports Channel, WTIC in the first of three consecutive home dates at the Civic Center.

The Sabres (22-37) took three of four possible points over the weekend to move four points in front of the Whalers. Hartford has played one less game than Buffalo.

Left wing Sylvain Turgeon, who has missed 36 games with a separated shoulder, is expected back in the Whaler lineup for tonight's game.

Hartford is 3-1 in its last 12 games, the tie being 3-3 with Philadelphia last Sunday night. The Whalers host the Sabres Thursday night before entertaining the Washington Capitals Saturday night.

Tarpley to be released

DALLAS (AP) — Roy Tarpley, suspended Jan. 29 by NBA drug counselors for violating the league's substance abuse policy, will be released from a California rehabilitation center sometime this week, the Dallas Mavericks announced Monday.

Tarpley will return to Dallas after nine weeks at the center but will remain on the NBA's suspended list for an indefinite period and will not play for practice.

The 24-year-old power forward, voted the NBA's best sixth man last season, must first complete his therapy and after-care program to the satisfaction of counselors and physicians of the Adult Substance Abuse Program treatment center in Van Nuys, Calif.

"Roy's return to Dallas is strictly an extension of his treatment and a continuation of the therapy that he received at the ASAP Center," said Dr. Dave Lewis of the ASAP Center. "There is no timetable for his return to active playing status."

Issajenko blows steroid whistle

TORONTO — Canada's top female sprinter says she began using steroids in 1979 and contends Ben Johnson once carried performance-enhancing substances to her in the Caribbean.

Angela Taylor Issajenko, the first athlete to appear before the track and field hearings called by the Canadian commission on drugs and athletics, also said she received steroids from American shot-put champion Brian Oldfield in 1981.

Her testimony Monday confirmed much of what Charlie Francis, her coach as well as Johnson's, revealed in an often-sensational, eight-day appearance before the federal inquiry. The commission was formed after Johnson was stripped of his 100-meter gold medal at the Seoul Olympics for a positive steroid test.

Issajenko said that Francis was correct in saying that Dr. George "Jamie" Astaphan took over as the physician for his athletes in 1984.

The doctor and Johnson, who has denied he ever knowingly used illegal drugs to enhance his performance, will be among some witnesses still to appear before the hearing in late weeks and months.

Issajenko noted that the athletes did not see Astaphan simply for steroids. "He was in our opinion the best sports medicine doctor there was," she said.

Baseball

Scott Lusser, now who Orel Hersher was, now the feeling is mutual.

Lusser, a minor leaguer who has appeared in 39 games over parts of two seasons with Detroit, came into Monday's exhibition game 1-for-11 (0.091). But the rookie outfielder drove in five runs with two homers as the Tigers pounded World Series hero Hersher for 10 runs — nine earned — in five innings and beat the Los Angeles Dodgers 11-3.

Lusser, who allowed 10 hits, walked three and struck out one, was the only pitcher who knew all about the man on the mound.

"I wouldn't matter if he'd thrown the ball up underhand," Lusser said. "I'm going to remember this day a long, long time. Maybe forever."

Hersher had an explanation for his horrendous outing after giving up only one run and seven hits in seven previous innings this spring.

"What can I say? I just threw the ball and they hit it," he said. "I was just out there throwing, really. I'm not trying to discredit the Tigers; they're a good-hitting team, but I wasn't really pitching. I was just getting my work in."

Lusser said he first took steroids in 1979 "to give me the extra edge I needed to be a professional." He said he used them for the rest of his career.

Rangers end their power outage

By Ken Ruppoldt

The Associated Press

NEW YORK — There's apparently nothing wrong with the New York Ranger power play that a little confidence won't cure.

The Rangers got plenty of it Monday night en route to a 4-3 victory over the Calgary Flames. "Beating Calgary was a big lift for us," Rangers coach Michel Bergeron said after his team broke a five-game losing streak and broke out of a power-play slump as well. "We had to stop the losing streak and beating Calgary made it all that much better."

The loss stopped the Flames from tying the Montreal Canadiens for the No. 1 record in the NHL. The Canadiens, 5-3 losers to the New York Islanders in the only other NHL game Monday night, remained two points ahead of the Flames in the overall race with 103.

In beating the Flames for the first time in three games this season, the Rangers climbed on their five power-play chances. That was good news — considering the Rangers are ranked 20th in the league in the power play, and had only converted two of 19 previous chances.

"We just tried to relax tonight," said Tomas Sandstrom, who scored two goals, including the game-winner with 4:59 remaining. "Once we got the first power play, it helped our confidence and took some of the pressure off."

Sandstrom got the first one for the Rangers, who had a two-man advantage because of a high-sticking penalty to Brad McCrimmon. The Calgary defenseman was handed a game misconduct when he drew blood with his stick from Rangers rookie Darren Turcotte.

Intentional or not, it cost the Flames the Rangers quickly capitalized when Sandstrom scored at 17:03, 33 seconds after the penalty. McCrimmon, who scored again for the Rangers, was still on the ice when Sandstrom scored at 5:50 of the second period on a power play after Calgary's first goal. But John Ogrudnik blocked the shot.

SPORTS IN BRIEF

Dedication set March 23

Manchester High will dedicate its new fitness center to its former athletic director, the late Dick Cobb, on Thursday, March 23 at 3 p.m. Dedication ceremonies will take place at Clarke Arena.

Anyone wishing to attend should call Mike Simmons at the athletic office at 647-3553.

Card show on Sunday

EAST HARTFORD — A baseball card show, with the theme a tribute to the 1961 New York Yankees, will be held Sunday at the Elks Club on Roberts Street from 10 a.m. to 4 p.m.

Former Yankees Luis Arroyo and Jim Coates will be special guests and will sign autographs from 11 a.m. to 3 p.m. Forty dealers from throughout the Northeast will display and sell their items.

UCConn game on Channel 8

The University of Connecticut basketball game in the National Invitation Tournament against North Carolina-Charlotte Wednesday night will be televised by WTNH-TV, Channel 8, at 7:30. Sports director Bob Pirozzi and former Fairfield head coach Terry O'Connor will handle the broadcasting duties.

Back sprain idles Winfield

FORT LAUDERDALE, Fla. (AP) — Right fielder Dave Winfield of the New York Yankees will be idled for the next four to five days by a lower back sprain, the American League team announced Monday.

Winfield, 37, has been restricted in his activities by the back injury since Feb. 28 and has yet to appear in an exhibition game. Team orthopedist Dr. Dan Kanell, who gave Winfield a neurological and physical exam Monday, declined to estimate when the 12-time All-Star might be ready to play.

Winfield is not scheduled to accompany the team on a four-day trip that begins Wednesday. He appeared briefly at Fort Lauderdale Stadium Monday, but would not comment on his condition.

Bob Donnewald fired

NORMAL, Ill. (AP) — Bob Donnewald, who led Illinois state to six NCAA and NIT tournament appearances in 11 seasons, was fired Monday as basketball coach of the Redbirds.

"We are at a point in our basketball program where a need for a change in leadership became apparent," Athletic Director Ron Wellman said in a four-paragraph statement. The Redbirds were 12-17 during the 1988-89 season, the worst during Donnewald's tenure.

Handley takes the lead

TOLEDO, Ohio (AP) — Bob Handley of Pompano Beach, Fla., took the first-round lead Monday night in the \$280,000 Trustcorp Professional Bowlers Association National Championship.

Handley, a four-time titlist who has not won since 1987, scattered 1,868 pins for his eight games.

Part-time Tom Mastonele of New Orleans, who has won a PBA tour event, spilled 1,445 to occupy second place.

The field of 360 faces will have 16 more qualifying games in this, the second-richest event on the Pro Bowlers Tour. Wednesday night, the field is cut to 80, all of whom will earn paychecks, and on Thursday it is pared to 24 for match play.

The top prize is \$54,000, second to the \$100,000 winner's share for the Seagram's Classics Open.

Chargers sign pair

SAN DIEGO (AP) — Former Atlanta quarterback David Archer and offensive lineman Brett Miller, who was left off the Falcons' 37-man protected list, were signed Monday to free agent contracts by the San Diego Chargers.

Archer played for Atlanta from 1984 through 1987, completing 331 of 647 passes for 4,275 yards and 18 touchdowns.

The 6-foot-7, 300-pound Miller is a six-year veteran who appeared in 15 games for the Falcons last season, starting four.

Donaldson over for year

DALLAS (AP) — Dallas Mavericks center James Donaldson underwent knee surgery to repair a ruptured tendon Monday and doctors said he will begin his rehabilitation program immediately.

"The surgery went as expected," Dr. J. Pat Evans, the Mavericks team physician, said, adding the operation took nearly two hours. "He will wear a brace for a minimum of two months and then he'll begin more intensive rehab," Evans said.

Thomas player of week

NEW YORK (AP) — Isaiah Thomas, who averaged 28.2 points and 9.3 assists in helping the Detroit Pistons win four of their games Monday, was named NBA Player of the Week for the period ending March 12.

Thomas shot on John Stockton of Utah, who averaged 20.5 points and 16.0 assists as the Jazz posted a 2-0 record.

Cecchini ousts Jo Durie

BOCA RATON, Fla. (AP) — Ninth-seeded Sandra Cecchini of Italy rallied to beat Britain's Jo Durie 3-6, 7-6 (7-5), 6-2 in Monday's first round of the \$300,000 Virginia Slims of Florida.

Elna Reinach of South Africa, Etsuko Inoue of Japan and Catherine Suire of France also advanced to become second-round opponents of the eight tournament favorites, who received first-round byes.

FOCUS/Advice

Why friend should keep her mouth shut

DEAR READERS: While "Feeling Rotten" was the houseguest of her best friend, who had a live-in lover. "F.R." was awakened in the middle of the night by the lover, who wanted sex. He got it, and that's why "Feeling Rotten" is feeling rotten. She asked, "Should I tell my best friend?" In yesterday's column were letters saying, "Yes, tell."

Dear Abby
Abigail Van Buren

Today, we have the "don't tell." Read on:

DEAR ABBY: "Feeling Rotten" should keep her mouth shut. When I was young, I found out that my best friend's fiancée was cheating on her (not with me). I did what I thought was right - I told her. She confronted him, and he denied everything. She chose to believe him. That ended our friendship. By the way, she married him, and they are now happily married grandparents. Maybe I should have minded my own business.

DEAR ABBY: When my husband was in Vietnam, the husbands of two

of my best friends propositioned me. I turned them down and never said a word to their wives or anybody else. We are still good friends. What would have been gained by telling? I didn't lie - I just kept my mouth shut.

DEAR ABBY: I have been on both sides of this situation, and I know from experience it's best to keep quiet. A few years ago, I visited my best friend and her husband in Hawaii. I was not married at the time. One night after a party cruise, unusual circumstances brought her husband and me alone together on a beautiful beach under a full moon. It was indescribably romantic. It happened.

DEAR ABBY: I had a problem similar to "Feeling Rotten's": My best friend, who also had a live-in boyfriend, had a party at their house. I

got a little intoxicated, and they let me sleep in their spare room so I wouldn't have to drive home. Well, at 7 a.m., I was awakened by the boyfriend as he started to climb into my bed. I told him to get out or I would scream! He left and I quietly dressed and drove home.

I never said a word to anyone about this, and now I'm glad I didn't because they've been happily married for 15 years and have three wonderful kids. He thanked me several times for keeping quiet.

MUM'S THE WORD IN MINNEAPOLIS

DEAR ABBY: "Feeling Rotten" has no right to cleanse her conscience in the tears of her best friend. My advice: Don't compound the mess by confessing. You will only make your friend feel angry, bitter and depressed, which will give you even more to feel guilty about. There's a good chance that she knows him for what he is but loves him anyway. If you tell her what happened, she might think you came on to him, or he might even tell her that you did it in order to protect himself. You've done enough harm already. Keep your zip zipped.

THE VOICE OF EXPERIENCE

DEAR ABBY: Regarding "Feeling Rotten," who steps with her best friend's live-in boyfriend and is now wondering if she should confess to her friend and risk losing her friendship: Give me a break! If she had really been a friend, she would have kicked that two-timing laser out of her bedroom. To have "let him" - regardless of how hard up and lonely she was - was inexcusable. If she has an ounce of decency in her, she will stay out of this friend's life, and keep her mouth shut.

MAZOOK IN NOE VALLEY

DEAR ABBY: I had a problem similar to "Feeling Rotten's": My best friend, who also had a live-in boyfriend, had a party at their house. I

HONORED - George Mandel Mantello displays New York City's Eleanor Roosevelt Human Rights Award after a ceremony Monday at City Hall. Mantello, who was presented the award by Mayor Edward Koch, was the first person to spread word of the mass extermination of the Jews during World War II.

WIT OF THE WORLD

Peter Gott, M.D.

Swallowing air causes bloating

DEAR DR. GOTT: My mother's stomach swells up noticeably after eating raw foods. What causes this?

DEAR READER: Bloating after meals is usually due to air-swallowing. People who eat a lot of roughage or who wear dentures and fail to chew their food thoroughly tend inadvertently to swallow air when eating. This harmless annoyance can be corrected by avoiding air-swallowing and not gulping food and taking more care in swallowing. Sometimes, upper gastrointestinal ailments, such as peptic ulcer, gall bladder disease and hiatal hernia, can contribute to bloating because of improper digestion. Therefore, I believe your mother should see a doctor for a diagnosis.

DEAR DR. GOTT: Three years ago I went on a long car trip. At the end, I noticed a pain in my hand. It got worse and now it's incredibly painful. It's in the middle of my left buttock. I've been on Percodan for three years. I've had shots, X-rays, acupuncture and chiropractic treatment.

DEAR READER: There are several possible causes for intractable rear-end pain following injury or prolonged sitting, rectal or anal infection, hip arthritis, sciatica and coccydynia, to mention a few.

I assume from your comments that these possibilities have been investigated by appropriate medical practitioners. Coccydynia (chronic pain in or near the tailbone) is poorly understood phenomenon of unknown cause. It can be a real problem because it is difficult to diagnose and treatment with drugs and injections is usually ineffective. Sometimes muscle-relaxing tranquilizers help the pain. Sciatica, buttock pain from a pinched nerve in the back, is treatable under medical supervision.

DEAR DR. GOTT: Please tell me about basal cell carcinomas.

DEAR READER: This is a type of skin cancer that appears as a small, shiny patch and progresses to a larger lesion with crusting, scabbing and bleeding. Basal cell carcinomas rarely metastasize (spread to distant parts of the body) but they can cause trouble by burrowing and invading underlying tissue. They are malignant but not highly so. Effective treatment always involves surgical excision, with or without X-ray therapy. Anti-cancer creams, such as topical fluorouracil, should never be used in treating basal cell carcinomas because the malignant cells can spread extensively within the skin beneath the creams.

ANSWER: If the apostrophe is used, it should come after the s, indicating that more than one President is being honored. When we used to celebrate George Washington's Birthday, that holiday would have been "President's Day."

Computer owners offered remedies for incompatibility

By Lorry Bloko
The Associated Press

Personal computer owners who want to share text or data files often learn that the First Law of File Transfer is "You Can't Get There From Here."

That's because the personal computing market has almost as many operating systems as toads have warts - and with the same ugly result. Operating systems govern how a computer looks at the outside world instead of sitting there consuming electricity.

But just for quick openers, any large group of computer hobbyists is likely to include those with Apple II, MS-DOS, Commodore 64, Commodore Amiga, Macintosh, Atari ST and Tandem Color Computer users. And you might have some CP/M, or TIS-DOS machines kicking about. Without help, none will be able to share files, which means the office work done on the home Apple or Commodore won't fly on the office IBM-PC.

All of which makes about as much sense as having six or seven non-compatible telephone sys-

tems in one country, but that's the way it is. There are, however, ways to get some things around the system-incompatibility roadblocks.

The March issue of COMPUTE! Magazine (COMPUTER Publications, \$2.95) has a first-rate overview of some hardware and software available to solve the transfer problem.

In general, files can be traded in three ways:

■ Hooking two machines together with a cable and some software.

■ Running software that makes one kind of machine behave like another, a sort of computer-hypnosis that can have a Mac reading and writing MS-DOS files.

■ Add-on hardware that packs another kind of PC on a board, plus the smarts to allow the board to share some of the system's resources (disk drives and peripherals).

such with the prime system in a sort of computer-induced schizophrenia.

There's a cost for all this, ranging from \$50 to more than \$600. If you find yourself tempted to spend \$600 or so on a board that will let you transfer files from a Mac to read MS-DOS files from the computer at work, consider a cheap PC-clone instead.

And if your need to transfer files, particularly text files, is a one-monthly thing, don't forget the various telecommunications services. If both machines are equipped with modems, the few minutes of connection time it takes to pump a text file in from one machine and retrieve it from another can often be the low-cost and least-hassle method of file transfer. The big computers at the service are taking care of the conversion, and the telephone company is providing the cable.

Choose a range with care

By the Editors of Consumer Reports

If you're looking for a new range, it's easy to be confused. There are hundreds of different models on the market. And though you might think you only need to find a range that bakes and broils well, there are other factors you should consider, such as cleanliness, convenience and reliability.

Should you choose a gas or an electric model? That's usually determined by the utility connections available. Each has its advantages.

Gas ranges offer finer cooktop control than electric ranges, and the cooktop can work even in a power outage. When Consumer Reports' appliance engineers recently tested 10 ranges, the gas models held a steadier oven temperature than the electric. As a group, the electric ranges, however, broiled better over a large area and self-cleaned more thoroughly. In general, electric ranges have been more reliable than gas ranges.

While the standard cooktop element in an electric range has been the coil, a new feature - the solid disk element - is gaining in popularity. The disks take longer to heat up than coils but allow finer control.

Our Language

Bombard attacks or assails vigorously. It's related to the shorter bomb; for a more explosive verb than bomb, try bombard.

A sea eagle with long wings is the erie. Sometimes the bird is spelled ern, but I think the sea eagles earn that final e.

QUESTION: I've seen President's Day on one calendar and Presidents' Day on another. Which is it?

ANSWER: If the apostrophe is used, it should come after the s, indicating that more than one President is being honored. When we used to celebrate George Washington's Birthday, that holiday would have been "President's Day."

Consumer Reports

control over temperature, especially at low settings.

The advent of electric igniters over pilot lights on gas ranges save you money on your gas bill. The broiler's location has changed, too. Where once it was tucked below the oven, it now can be found at waist height on many models. Electronic controls are becoming more popular as well. They enable you to present self-cleaning and baking times and sometimes to set oven temperature by using push buttons and a digital display.

Features that ease cleaning can make a difference. Look for: A control panel made of glass, which stands up to scrubbing better than painted metal.

Vertical knobs, they catch less flying food than horizontal ones.

A backguard without seams: It will eliminate a crease where dirt and grease can accumulate.

A cooktop that pops up: It will allow easier cleaning underneath. A removable one lets you wash it at the sink. An uncluttered area underneath the cooktop also eases cleaning.

Porcelain drip bowls are easier to clean than shiny metal ones, but the metal ones may speed up cooking.

Models to consider are any of the four electric or six gas ranges recently tested by Consumer Reports' engineers. These 10 (or their predecessors) were top-rated when evaluated in 1987, and still make good choices.

Among the electric, the engineers favored the Frigidaire RSE37BA, \$412. It excelled at baking and broiling and easily held a large stockpot on a rear burner. Its self-cleaning performance was above average. The Frigidaire RSE37BA, however, has a higher frequency of repair record than most others.

Among the gas models, the General Electric JCB26GEJ, \$589, was an excellent baker and did a fine job at broiling. So did the O'Keefe & Merritt 30798B, \$627, and the Tappan 30398B, \$550, but their repair records were less than stellar. Both also require a service representative to change the cooktop light.

The Tappan brand has the added recommendation of a low Repair Index. There wasn't enough data to create an index for GE or O'Keefe & Merritt gas models, but since Tappan also makes them, their repair record should be similar.

PEOPLE

Moore gives up role

LONDON (AP) - Longtime James Bond actor Roger Moore says he's giving up the lead role in a new Andrew Lloyd Webber musical because he can't sing well enough.

"I now do not think that the musical stage is for me," Moore said Monday.

The actor who played secret agent 007 in six Bond films had been rehearsing for six weeks. The musical, "Aspects of Love," is scheduled to open in a month and is already sold out until Christmas.

Bergen's change of heart

NEW YORK (AP) - Actress Candice Bergen says that before her daughter's birth, she thought she would have a baby only if it "were more like a chimpanzee."

But then suddenly Chloe was born... I was so overwhelmed and ecstatic to have this baby," the 43-year-old actress said in an interview in April's Redbook.

"I never used to like babies. I had absolutely no confidence that I had any maternal instincts whatsoever. I'd always think, 'Well, if a baby were more like a chimpanzee, I'd have one,'" said Bergen.

Comic to reprise role

LOS ANGELES (AP) - Academy Award nominee John Cleese will reprise his role as a snobby British psychiatrist on NBC's hit comedy, "Cheers," while in town for the Oscar presentations.

The former Monty Python "Minister of Funny Walks" will film the episode March 21, eight days before the Oscars. Cleese is nominated for his screenplay for the movie "A Fish Called Wanda."

In the "Cheers" program scheduled to be broadcast April 13, he plays Dr. Simon Finch-Royce, a specialist in marital and family counseling.

Two seasons ago, his character recommended that Sam the bartender, played by Ted Danson, and Diane, portrayed by Shelley Long, should go through with their then-pending marriage.

Brady becomes advocate

WASHINGTON (AP) - Former White House press secretary James S. Brady says he's ready to become an advocate for the disabled now that he's overcome a head wound suffered in the 1981 assassination attempt on then-President Reagan.

Brady, 48, who retired from the White House recently, said Monday he accepted an unpaid position as vice chairman of the National Organization on Disability, a private, non-profit group.

"Now that I'm one of the 37 million people with disabilities, I know what it's like: the daily frustration and problems," he said at a news conference.

"My family and I have been fortunate over the past eight years to have the support of friends, family and people from all across the country. That support system has been invaluable to me in my recovery."
