British Units Open Soerabaja Attack; Full Scale Conflict

Batavia, Java, Nov. 10.—(AP)—British Indian troops, engaging in full scale warfare to disarm resisting Indonesian nationalists, opened an attack on Soerabaja today, British shells and bombs raked the Naval base of 500,000 population. Indonesians were evacuating their families from the city.

Naval Guns Also Fire Indonesian spokesmen said British Naval guns as well as land artillery opened fire at 8 a. m. (p. m. Friday, a. l.) in preparation for the attack by the Fifth Indian Infantry division. British planes, Mosquito bombers and Thunderbolt fighters, strafed and bombed the post office and government buildings in Soerabaja and one Mosquito was forced down when damaged.

The Nationalists said large numbers of native youths assembled in Jogjakarta, 175 miles to the southwest, had decided to proceed to Soerabaja to reinforce their countrymen and were rallying to the cry "Fight for Freedom."

Foreign Minister Soerabardjo of the unrecognized "Indonesian republic" said the telephone lines at Soerabaja had reported that the natives there apparently had decided to carry out a "scorched earth" policy in their fight. This would indicate that the natives had little hope of standing and fighting against the invaders.

Native Resistance Growing British spokesman said the natives were putting up a growing resistance. The Nationalists report that many Indonesians already had been arrested and returned to their various Asiatic governments, but hundreds of others had not yet been apprehended, because "they brought three square meals a day from the Japanese and the nationalists in the Philippines did not have the money to buy food."

Espionage Efforts Poor He continued that American intelligence authorities were flattered during the war by their ability to keep a check on Japanese espionage efforts, which he added "wasn't very good."

The Japanese espionage wasn't organized soon enough and apparently had no long-range plan. It was reported that Japanese espionage parties had been started for Australia, but they were being prepared to be destroyed to amplify the statement.

Admiral Fall To Agree While he spoke before the Senate Military committee yesterday, Senator Hill (D-Ind.) remarked that Admiral Chester W. Nimitz had said some powerful arguments in favor of the Japanese and Admiral Mark Mitscher had credited Navy carrier-based airplanes with winning the Pacific air war.

Admiral Nimitz and Admiral Mitscher are great commanders, but this war was won by years of planning and the statement of Thorpe concluded with a statement that a new list of Japanese war criminals is being prepared and he declined to amplify the statement.

Washington, Nov. 10.—(AP)—Senator Ferguson (D-Mich) disclosed today he has asked counsel for the Senate-House Pearl Harbor Inquiry committee to obtain the official diary of former secretary of War Stimson.

Ferguson told a reporter he wants to read the day-by-day account of Stimson's official acts before he resigns as the former cabinet member on testimony Stimson is expected to give in public hearings.

"I didn't know how I could cross-examine him intelligently without having a chance to see such records in advance," the Michigan senator said.

He asked William D. Mitchell, chief counsel for the War department for the diary two weeks ago, but has not yet received it, Ferguson said.

Hearings To Begin Thursday Senator Lucas (D-Ill.) suggested yesterday that the committee pause to pull all "loose ends" of its investigation together after it has had about a month of public hearings. Hearings begin next Thursday.

Committee Chairman Barkley (D-Ky.) commended the majority then could bring up any matter it thinks has not received sufficient attention.

The suggestion was offered after Ferguson and Ferguson asserted (S. M.) protested against terms of a new executive order signed by President Truman which makes available to the investigating group.

Merger Views Of Eisenhower Will Be Sought

Washington, Nov. 10.—(AP)—General Eisenhower was headed for Detroit today to seek the views of the big three—General Motors, Ford and Chrysler—in support of their demand for a 30 per cent wage rate increase.

CIO United Auto Workers leaders were available in the theater for purchase by the Chinese. Wednesday said he did not know that an Army-Navy liquidation board is depositing surplus goods in China, save for the military supplies bought by the United States Relief and Rehabilitation commission.

Other sources had estimated the supply of surplus planes in the theater as low as 1,000.

To Assist in Reparation The American commander emphasized, however, that the United States would continue to assist in the reparation of Japan from the Chinese theater, but that American forces would remain in the theater as far as the strike of Moore's office Friday ended with "no accomplishment" in the words of the mayor.

Approximately 2,700 workers struck Wednesday, seeking a closed shop, check-off, 30 per cent increase in pay and no seniority for union representatives. In addition, about 600 office workers themselves not on strike, have refused to cross the picket lines since Thursday morning.

Sturm said the union was willing to have certain workers cross the picket line for that purpose by the union but on their regular pay.

Heavy Battle Along Great Chinese Wall; Yanks Will Not Aid

Washington, Nov. 10.—(AP)—Heavy fighting between Chinese Communists and troops of the Central government broke out along the great wall of China north of here last night, bringing artillery and heavy mortars into play in the Chinese city for the first time. New clashes were reported along the main Chinwangtao-Peking railway south of here.

New Bombing of Cannon The booming of cannon in the booming of the heavy weapons can be heard throughout the night from the direction of Shanhaiwan, fortress city which is the eastern anchorage of the great wall, and a key gateway into Manchuria.

Large Forces of Nationalist Troops Landed From American transports here, have been deployed for days before Shanhaiwan where Communist of the Eighth Route Army are in control, as strongly entrenched.

The new clashes along the Chinwangtao-Peking rail line, near south of Peitaiho junction, where the Nationalists have established a station to handle the wounded being brought in. It was reported that the Communists had a guard as a small detachment of American Marines of the First division are believed here.

Three Chinese Found Hanged Three Chinese were found hanged in the Peitaiho railroad yards which are 15 miles south of here. A stable force of Communist troops are camped at the junction as a guard and a small detachment of American Marines of the First division are believed here.

There have been no new incidents involving Marines in the past few days and no Marines have been wounded. The presence of the American troops, however, prevented the Communists from carrying out an intended attack on the village of Chih.

Expect Attlee In Washington Due Today for Historic Conference on Atomic Bomb With Truman

Washington, Nov. 10.—(AP)—Prime Minister Attlee arrived in Washington today for an atomic bomb talks with President Truman and Prime Minister Mackenzie King that may shape the world's future.

The British leader's plane landed at 1:29 p. m. (a. l.) yesterday, flying by the way of Newfoundland.

Washington, Nov. 10.—(AP)—Prime Minister Attlee is due in Washington today for a historic conference with President Truman and Prime Minister Mackenzie King on the atomic bomb.

The talks will begin Sunday aboard the yacht Regatta on the Potomac River. Attlee will take part in the meeting, both a plan. He knew nothing of such a visit.

Mr. Truman said some time ago he would discuss atomic problems with Attlee. Attlee's office said he is preparing for committee consideration a bill specifying that:

Radio stations must clearly identify commentators, including news reports, whether they are reporting news or opinions.

Rep. Ellis R. Patterson (D-Calif.) promptly issued a statement denouncing the bill as unconstitutional attempt to control the airways.

Flaming Death in Army Plane Crash

Moment of death for six Army fliers is caught in this exclusive split second photo made at the instant a P-47 Thunderbolt crashed in a ball of fire at right and just before a B-25 Mitchell bomber, its wings shattered off, hurtled to the ground. Horrified spectators at an air show saw the planes lock wings and crash. Remarkable photograph was made from a color transparency taken by a photographer who had his camera poised at just the right instant. (NEA Telephoto).

Jap Premier To Stir Revolt Just Working

Tokyo, Nov. 10.—(AP)—Japanese "trained in discontent" in a Japanese Pan-Asiatic propaganda school in India are responsible for present fighting in The Netherlands Indies, the American chief of counter-intelligence here asserted today.

The Japanese school "left intellectual landmines which are going off now and will explode time and time again," said Gen. Elliot R. Thorpe at a press conference.

In addition to Japanese, pupils at the school for Greater East Asia culture included Malaysians, Chinese, Koreans, Manchurians, Burmese and Filipinos. The school was conducted in American-built St. Paul's university.

Graduates were sent out to try to stir up trouble between the Allies by arousing native populations to revolt against colonial rule, the school for Greater East Asia culture said.

Results Came After War The general said the program was far more successful than the Japanese realized at the time. It was reported that the school had already made arrangements to return to their various Asiatic governments, but hundreds of others had not yet been apprehended, because "they brought three square meals a day from the Japanese and the nationalists in the Philippines did not have the money to buy food."

Espionage Efforts Poor He continued that American intelligence authorities were flattered during the war by their ability to keep a check on Japanese espionage efforts, which he added "wasn't very good."

Wedemeyer Predicts All United States Forces Will Be Out of China By Early Spring; Asserts Flatly Americans Will Not Help Move Troops into Manchuria To Assist Chiang

Chungking, Nov. 10.—(AP)—Lieut. Gen. Albert C. Wedemeyer, commander of American forces in China, predicted today that all United States forces in China would be out of the country by early spring, and asserted flatly that the United States would not help China move troops into Manchuria.

Not Adding Central Government. He emphatically declared at a press conference that U. S. forces and resources were "not being employed to assist the central government of China in its efforts to bring about the order of occupation and disbanding of revolutionary groups."

Difficulties in debarkation of Chinese Nationalist troops in Soviet-occupied Manchuria, he added, are matters between the Chinese and Soviet governments.

And, he added, "we won't be able to move Chinese troops to Manchuria by air. The Chinese themselves must do that."

Want To Buy More Planes. The Chinese, he explained, have already obtained 20 American transport planes and want to buy 50 more. Asked how many surplus American planes were available in the theater for purchase by the Chinese, Wedemeyer said he did not know that an Army-Navy liquidation board is depositing surplus goods in China, save for the military supplies bought by the United States Relief and Rehabilitation commission.

Other sources had estimated the supply of surplus planes in the theater as low as 1,000.

Shidehara Believes MacArthur Moving in 'Fair and Effective Manner' To Carry Out Plans

Tokyo, Nov. 10.—(AP)—Premier Kijuro Shidehara believes General MacArthur is moving "in a fair and effective manner" to carry out his program of ending militarism and establishing democracy in Japan.

Shidehara said he had no objection to the general's move to the front, but he said that the general's move to the front was a "scorched earth" policy in their fight.

The Scientist and Stassen

Retraction of the basic facts about the atomic bomb is getting almost impossible. It is likely to continue until such time as these facts begin to penetrate the thinking and policy of our political leadership.

The defense of the politicians, the men who made the atomic bomb closer and closer together, obviously in the hope that the assembly will be able to find a real hearing. The other day, when a group of atomic scientists spoke to a group of Congressmen in Washington, they were representing an association of more than 1,000, or more than 90 per cent. of all the scientists who worked on the atomic bomb.

According to them, the announced policy of our administration to try to keep the bomb secret has already proved itself into an atomic bomb armaments race. They said that if control of the atomic bomb is to remain on a nationalistic level, the bomb must sooner or later boom against us, and that then, with our great cities and plants, we will be the most vicious of all great nations.

They said that if we continue our present policy, we should be immediately transferring American life underground. They said that the only alternative to such a future lies in establishing control of atomic energy at a world, instead of a national level.

While they were saying these things, they were constituted Governor Harold E. Stassen, a politician, but perhaps a politician who has already heard and understood a little before the news has been saying, was discussing the greatest issue of all time before the Academy of Political Science in New York.

He had a specific proposal to make, admitting that it might not be perfect, but making the best claim that the line has come for all discussion of the issue to progress beyond vague generalities. His proposal was that the Security Council of the United Nations be given authority to maintain a small world police force, to be stationed at five bases around the world, not more than one-third of the personnel of any one of these squadrons to be of one nationality background, and each of these five squadrons to be given atomic bombs for use in the maintenance of world peace.

Perhaps there could be all kinds of argument over the details of Captain Stassen's proposal. Perhaps there should be more or less bombs than he advocated, or a stronger police air force. But his specific proposal illustrates the general principle to which we and the world must come, if we are to survive. The atomic bomb must not be regarded as a potential instrument of national policy, but as the law and peace enforcement weapon of all peaceful nations.

Standing By Helpless

Manchuria was, we suppose, the most territorial prize of the war to Asia. It was the first thing Japan took. It was the thing those propagandists who expect the world of Russia in all circumstances were certain Russia would grab. When Russia renounced it, and awarded it to China, that was regarded as the most just of all possible settlements of the fate of this territory. And in all this, the people of Manchuria itself have been so much helpless pawns, apparently beyond any will of their own.

Now that difficulty over the Chungking Government's occupation of Manchuria, Russia yielded no rights or claims in Manchuria to them. But still the Communists are intent upon grabbing it. They are intent upon so far as international arrangements and diplomacy cover the situation, then, it is the Communist who, whatever their merits, are the ones to be recognized in the present situation.

They are not making any Russian claims to Manchuria. They are not making any Russian claims to Manchuria. They are not making any Russian claims to Manchuria. They are not making any Russian claims to Manchuria.

Comments From River Road

It seems strange to suppose that the smelt season is supposed to be over here and there are, indeed, smelts in the river and even up this river when they take the notion to show up. That is not at every high tide by a jugful. And when they do come they don't very often bite. Yet there appear to be lines, brief and infrequent when these little fish take bait and hook as they are supposed to. One of my neighbors told me some days ago that he had caught 250 on an incoming tide only a few dozen rods from where he lives.

When a week ago today, we surveyed the pre-election scene in Connecticut, we first took a somewhat tinorous assessment from the views of the professional experts. We hazarded a weak guess that the process by which the Communist Party would be recognized in the settlement of the Pacific peace. No one made a treaty with them. They are intent upon so far as international arrangements and diplomacy cover the situation, then, it is the Communist who, whatever their merits, are the ones to be recognized in the present situation.
