SPLENDOR OF THE "WHITE CITY" AS COMPLETED.

Best Points From Which to Get a General View of the Buildings-Plaster Figures and Columns That Seem to Have Been Sculptured For All Time.

The White City, which Americans hav cent nearly \$40,000,000 in building, is complete in all but a few minor details, says a Chicago dispatch to the New York World. No such temporary home for the arts and siences and the products of all the Nations was ever creeted before. Nor is it probable that its like will be created again soon. It is something that all Americans can view with pride, for the spirit and form of the classic age have been reproduced on the soft of the youngest of the Nations. It is a triumph of art as well as of enterprise.

Then comes a feeling of perplexity. He does not know where to begin his travels through this city. He may remain here several days and then go away, leaving buildings he did not learn.

The Professor of Sargery in the Harvari Medical School, Doctor D. W.
