a Strong Testimonial.

THOMAS P. AITKIN, ESQ.

DEAR SIR:- The No. & Furman Boiler that you put litto my house in 1892 gave me excellent satisfaction last Winter. When the weather was 16 degrees below zero I had no trouble in keeping the Ten rooms Warm and Comfortable. I can heartily recommend it for its Quick Steaming Capacity and Economy in Fuel. With one and a half pounds of steam the lower rooms were kept at about 70 degrees, and the upper rooms from 60 to 65 degrees without any trouble. I heard no noise or cracking in the pipes all Winter. I shall be pleased to show anyone the Boller and explain its workings, so as to get the best results from it. With my experience with it last Winter, I claim it to be one of the best Boilers on the market to-day and can heartily recommend it to anyone who is thinking of putting in a Boiler. I am pleased to give you this unsolicited testimonial as to the merits of the Furman Boilers, and wish you success in the sale of them.

Hall's Cutarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it falls to cure. Send for list of testimonials. Address.

But baking powders must e composed of such, pare and wholesome ingredients or they must be t booed entirely.

Dr. Edson, Commissioner of Health New York, in an article in the "Doctor of Hygiene," indicates that the advantages of a good baking powder and the exemption from the dangers of had ones in which the harsh and caustic chemicals are used, are to ne secured by the use of Royal Baking Powder exclusively, and he recor mends this to all consumers. "The Royal," he says, "contains nothing but cream of tartar and sods refined to a chemical purity, which when combined under the influence of heat and moisture produce pure carbonic, or leavening, gas. The two materials used; cresm of tartar and soda, are perfectly harmless even when eaten, but in this preparation they are combined in exact compensating weights, so that when chemical action egins between them in the dough they actically disappear, the substance of oth having been taken to form caronic-acid gas." Hence it is, he says, that the Royal Baking Powder is the

DRAR SIR:-The No. 2 Furman Boiler that you put into my house in 1892 gave me excellent satisfaction last Winter. When the weather was 16 degrees below zero I had no trouble in keeping the Ten rooms Warm and Comfortable. I can heartily recommend it for its Quick-Steaming Capacity and Economy in Fuel. With one and a half pounds of steam the lower rooms were kept at about 70 degrees, and the upper rooms from 60 to 65 degrees without any trouble. I heard no noise or cracking in the pipes all Winters I shall be pleased to show anyone the Botler and explain its workings, so as to get the best results from it. With my experience with it last Winter, I claim it to be one of the best Boilers on the market to-day and can heartily recommend it to anyone who is thinking of putting in a Boiler. I am pleased to give you this unsolicited testimental as to the merits of the Furman Boilers, and wish you success in the sale of them.
