TOWN NEWS. The hen-coop of Edward Turkington was visited last week and several chickens carried away. Mr. Turkington happened to be awake although it was after midnight, and seeing the man in the night, he gave chase, emptying the chambers of his revolver at them, as they ran. He did not bring down the game however, as the shots fell wide of the mark. At the white party given in the Friends' Brown's hall last Monday evening, Miss Edith Foulds and Mr. J. H. Stannard carried off first prize. There were upwards of fifty players. A collation was served and merry time enjoyed. The entertainment was furnished by Mr. and Mrs. J. C. Carter and Mr. and Mrs. W. H. Powell.

At the grand ball to be given by the St. Mary's T. A. Society in Apo's opera house Friday evening, March 20, the Sacred Heart Chorus will appear in uniform, and during the course of the evening, give an exhibition drill under the direction of John Moriarty. The Cadets are nicely uniformed and equipped and it is expected that their exhibition drill will be a nice affair.

Carl Peterson and bride returned from their honeymoon last Tuesday and went to their new home on Linden street which was all furnished in advance. A number of their friends and neighbors surprised them that evening, by coming in with provisions and music, and spent the evening in exchanging congratulations, singing, dancing, enjoying a beautiful wedding feast and having a good time in general. As a token of their esteem, they presented the bride and groom with a handsome sofa.

DAMAGES AWARDED MR. ROGERS. After a long and tedious contest in the courts, over the assessment of damages in the case of Henry E. Rogers and the South Manchester Water Company, an arbitrator committee consisting of Judge, Dwight Loomis, State Senator, Marens H. Holcomb and H. E. Birden, have had the matter in hand, looked the premises over, heard witnesses and arguments pro and con, finally decided to award Mr. Rogers the sum of \$3,100 as damages to his water privileges. Mr. Rogers claimed \$106,000 damages.

NEW OFFICERS. The annual meeting of Washington Loyal Orange Lodge was held in Masonic hall last Saturday evening, and the following officers were chosen: W. M., Henry Trotter; D. M., John C. Crockett; chaplain, James Marley; secretary, Samuel Gray; treasurer, Irwin Chambers; D. C., Abraham Smith; 1st Com., Jas. Harrison; 2nd Com., John H. McNally; I. T., John Mason; O. Y. T., Wm. Martin; Committee 1st, Wm. Harrison; 2nd, Thos. Fog; 3rd, Jas. Sheehey; 4th, Thos. W. Tedford; 5th, Robt. Brothers.

THE HAUNTED MILL. The presentation of The Haunted Mill, as given by the Y. M. C. A. in Apo's opera house last Saturday evening, was an unusually clever amateur performance. All concerned took an active interest in the work, were carefully trained and executed their several roles in a very pleasing manner. The audience was not large but all who attended were highly pleased with the entertainment, which was said to be the best the society has ever given. It is a new play and a taking one. The after-piece "Casey the Piper" was overflowing with fun. The fan-dance by Miss Holstein, was the special feature of the evening. A sociable followed the entertainment. The young people expect to present the play in some of the neighboring towns soon.

OLE OLSON. Was the title of the play presented in Armory Hall last Friday evening, and was certainly one of the best fun-makers that was ever seen in town. The play was not so large as the play deserved, but the performance was among the best in its class. All present enjoyed themselves from beginning to end and were most lavish in their expressions of pleasure and approval. The play was advertised as a genuine blue-killer, and it filled the bill in every particular. The scenic effects were handled to perfection and unusually realistic and striking results were produced, showing that the stage manager understood his business thoroughly and executed all the details with the precision of clockwork. Miss Lotie Williams was exceedingly handsome, owing to a severe cold and was unable to sing the songs assigned her, but executed the other parts of her work in a pleasing and satisfactory manner. Ole Olson will be pleasantly remembered by all who witnessed its production here.

The total estimated population of the world is 1,479,729,000. The postage stamps made for the United States Government by the American Bank Note Company, New York City, during the year 1893, would supply two stamps to each person on the earth, with a sufficient number left over to be ready for the natural increase.

An interesting and valuable relic of Revolutionary days has been unearthed at Lancaster, Penn. It is the field and camp book of General Sullivan, of the Continental Army, and in it is recorded the history of the famous march in 1779 from New York and Wyoming and up the Susquehanna Valley to punish the Tories and Indians for the Fort Mifflin massacre.

It will probably be deposited with the Historical Society of Pennsylvania.

The new counterfeit silver dollars seen so frequently of late are not only counterfeits ever known worth intrinsically as much as the genuine dollar. Silver is so cheap that the maker of the counterfeit puts exactly as much in them as the government puts in the dollar—that is, about fifty cents' worth, or a little less. Beyond a roughness and varying thickness it is difficult to tell a counterfeit from a genuine dollar.

Both ring alike, and, judging from the number in circulation, both pass equally well. Considerable interest is attached to the fact that oil has "run true" together, to put it in its true light, indications have been found at Ashwick Court, Somersetshire, England. The Atlanta Constitution remarks: "Public sentiment is rapidly crystallizing into a determined opposition to public execution, but it has been reported for Indiana to grant a reprieve of a model private execution."

It is curious to calculate how a man has spent the time of his life and how large a portion of it is taken up with accounting. Adam Smith, at the age of small moment, observed the Atlanta Constitution. A man of fifty years of age, for instance, if he takes the pains to estimate his time, will find that he has spent about 6,500 days; has worked about 4,000; has amused himself for about 4,000; has spent 1,500 in eating; has been sick for about 100 and so on.

There was a reduction of seven per cent in the acreage of winter wheat sown last fall in this country. That was due mainly to the low prices of wheat at that time, though these prices were from twelve to fifteen cents a bushel higher than what prices now. What will naturally be the result if wheat continues at present prices until the time for seeding the spring crop in the great Northwest? At present prices for wheat, almost any other grain would be a better return. Land will produce good crops of wheat and barley, either one of which is worth more per pound than wheat. There will also be a large substitution of corn and potatoes for wheat. These crops will tend materially to reduce this year's wheat crop, which there is a very small chance of being generally approved throughout the country.

TOWN NEWS. R. O. Cheney authorizes the statement that he, and not M. S. Chapman, caused the cut to be made on Center street, as wide as it is, because he thought it necessary and in the best interest of the town to do so, and not for the benefit of the electric road, as has been stated. Wm. Russell of Winter street employed a number of hands on Saturday and Monday last, clearing away a large tract of land in the rear of the premises owned by him on Center street. The Glenwood Range. Contains many new features combined with those proven by experience to be very valuable. Every detail has been considered at great length by men who have had long experience in the business, and nothing has been left undone to make this a perfect range. The castings are of the best quality of iron, and their smoothness and fineness of texture are remarkable. This range should be critically examined to fully comprehend all its many points of excellence. The manufacturers of this range started in business in 1877. They were a half dozen of practical workmen, who had grown tired of strikes etc. and joined themselves into a company to manufacture these goods, which, solely on their merits, in open competition with others, have pushed themselves to the front, until to-day these people turn out more ranges than any concern in New England.
