of the blessed God, which was committed to my trust."—I Timothy i., il.

The greatest novelty of our time is the gospel. It is so old that it is new. As potters and artists are now attempting to fashion pitchers and cups and curious ware like those of 1900 years ago recently brought up from buried Pompel, and such cups and pitchers and curious ware are universally admired, so anyone who can unshoved the real gospol from the mountains of stuff under which it has been buried will be able to present something that will attract the gaze and admiration and adoption of all the people. It is amazing what substitutes have been presented for what my text calls "the glorious gospel." There has been a hemispheric apoetasy.

There are many people in this and all other large assemblages who have no more idea of what the gospel really is than they have of what is contained in the fourteenth chapter of Zend-Avesta, the Bible of the Hindoo, the first copy of which I ever saw I purchased in Calcutta last September. The old gospel is fifty feet under, and the work has been artisted to contrive the philosophy of religion. There is no philosophy about it. It is a plain matter of Bible statement and of childlike faith! Some of the theological sominaries have been hotheds of inddelity because they have tried to teach the "philosophy of religion." By the time that many a young theological student gets half through his preparatory course he is so filled with proparatory course he is so filled with doubts about plenary inspection. and the answer comes, "Christ is all in all."
