President Cleveland has determined that an official exhibition of the interests of this country in the Nicaragua Canal, which was authorized at the last session of Congress, shall be promptly made, and the Government Commission to examine the canal route, for which the Senate Civil bill made \$400,000 immediately available, is to be sent to Greytown soon on board a United States warship, to emphasize the concern of this Government in the enterprise.

These positions are the natural outcome of the Cotton States and the International Exposition, maintains the Atlanta Constitution, which adds: Our Spanish American friends doubtless think that if they are going to the great exposition to be held at some future date yet to be fixed, they should get as much benefit out of them as they possibly can.

Literature by the Yard. A correspondent of the Birmingham Mail writes: "I have hitherto regarded the man who bought books by the yard as a mythical person. But I find the books are not so mythical as our leading booksellers are accustomed to make up sets of books which they sell at a stated price, say \$15 or \$25. I have ordered several sets of books from a man who had built a new house some time ago, and said he had a recess filled with shelves, on which he wanted to keep books. I could then send him three \$25 sets? Certainly they would. The gentleman came in a few days after and said they looked very well. "But," he said, "they weren't enough. I wish you would send me enough to fill three yards more." Four thousand volumes! This is how you are appreciated.

R. O. and Mrs. Cheney returned from the South a few days ago, after placing their son and daughter at Asheville, North Carolina, the climate of Summerville proving too enervating at this season of the year.

A gentle springlike rain set in last Monday afternoon and continued through the night, doing a world of good, as it was very much needed. This was the first genuine touch of spring we have had.

Notice—A horse, coming four years, and a three quarter set side bar carriage, will be either sold or exchanged for a bicycle. Address Box 98 South Manchester, Conn.

John Tamm of 99 School street returned from Baltimore last Tuesday afternoon, where he has been attending the Baltimore Medical College. He will have a vacation until next September, when he hopes to return and pursue his medical studies.

One of W. H. Grant's horses ran a way last Monday with the result of breaking the wagon considerably, but the animal escaped unhurt. In his wild course he came in collision with the veranda of The American House and knocked out one of the posts.

Don't forget that Professor D. M. Bristol's trained horses will be exhibited at Apell's opera house tonight and tomorrow night, and that there will be a matinee tomorrow afternoon at 2:30, admission to the matinee being 25 and 50 cents for adults, and 15 cents for children.

The town teams have dumped a lot of gravel all the way through the center of Vine street. It was used very much as the street is very low, but some arrangements should be made for carrying off the water which lodges there, particularly at the corner of Vine and School street.

Miss Harriet Wing Cowles and Charles William Holman were married by Rev. C. H. Barber last Wednesday afternoon, the ceremony taking place at the residence of the bride's parents, Clinton W. and Mrs. Cowles. The affair was entirely informal. The bride couple will reside in Bridgeport.

The east end of Eldridge street is being raised up like the west-end and the improvement is much appreciated, as it was badly needed. Residents on Maple street would like very much to have that thoroughfare attended to in like manner, as in wet weather, it is "a bird road to travel."

W. will surely be there, as well as many others who live at the south end. The electric cars will help local entertainments very much, as people can then be carried back and forth more frequently and conveniently.

THE FROST WENT DOWN.

Cheney Brothers are rejoining the old and putting in new and larger drain pipes from their tenements on School street, to connect with the sewer. The old pipes were three inches in diameter and the new ones are four inches. It was found that in several instances they were full of solidly frozen ice and all broken. They were set three feet deep in the ground, but that was not protection enough to save them from the long continued and far reaching frosts of this winter, which sank as deep as four feet, as has been ascertained recently by the plumbers in their excavations for repairs. Not in many years has the frost been known to be so deep, far beneath the surface, right in our streets here.
