SAPOLIO germ-life

The doctors tell us, now-a-days, that disease germs are everywhere; in the air, in the water, in our food, clothes, money; that they get into our bodies, live there, thrive and grow, if they find anything to thrive on. Consumption is the destruction of lung-tissue by germs where the lung is too weak to conquer them.

The remedy is strength—vital force. Scott's Emulsion; with hypophosphites, means the adjustment of lung strength to overcome germ-life. It is fighting the germ with the odds in bur favor. These tiny little drops of fat-food make their way into the system and re-fresh and re-invigorate it. Whether you succeed with it or not depends on how good a start the germs had, and how carefully you can live. The shortest way to health is the patient one. The gain is often slow.
