It is a new idea, however, that the gum-chewer is in danger of a disease that unless checked may be the direct cause of a serious malady that will in a short time prove fatal. It is in addition a most painful ill, and one which will at first prove an unsolvable problem to the inexperienced practitioner.

Audubon, the great ornithologist, with gun and peneli went through the forests of America to bring down and to sketch the beautiful birds, and after years of toil and exposure completed his manuscript and put it in a trunk in Philadelphia for a few days of recreation and rest and came back and found that the rats had utterly destroyed the manuscript, but without any discomposure and without any fret or bad temper, he again picked up his gun and pencil and visited again all the great forests of America and reproduced his immortal work.
