Webster said in 1826: "Cuba is the hinge upon which interesting events may possibly turn." In view of present conditions the soul of the expander would be justified in exclaiming, "I told you so."

In 1810 there were one archbishop, four bishops, seventy priests and 150,000 Catholics in the country. To day there are ninety dioceses in the land, with over 8000 priests and a Catholic population of at least 10,000,000.

The ship Henry B. Hyde has made the trip from San Francisco to Honolulu in ballast in nine days and four one-half hours. Only one other sailing ship has ever equaled this time, the clipper Fair Wind having sailed the distance in eight days and seventeen and one-half hours.

Some one recently stated that the Japanese were making clocks and watches themselves, and would be exporting them to America. A British official in Japan reports that the latter part of the story is probably correct.

According to H. B. Woodward of the British museum, has changed the character of a considerable portion of the British Isles to a remarkable degree. The borders of the fens were once covered with forests, and the beaver was one of the most plentiful animals of the region. Its natural turned the streams from their course.

The national advantage derived from technical training in the public schools is well shown, maintains the New York Mail and Express, by the commercial prosperity of Switzerland, nearly all of whose exports represent the skilled labor of the people, and not any natural resource of the country itself.

The late Spanish minister, Senor de Lome, unwittingly paid a compliment to American women when his idea was to depreciate them. He said that they were the only women who had not yet succumbed to the fascination of the cigarette. Spanish, Portuguese and Italian women use the Havana cigarette; Greek, Turkish, Russian and Austrian women the famous Turkish tobacco; French women revel in the caporal, and many English women have taken up the practice; but in this country the habit is as rare among the sex as it was a hundred years ago.

The report of the commissioner of internal revenue for the year 1897, shows the total receipts from all sources to have been \$146,619,593—a decrease, as compared with the fiscal year 1896, of \$211,022. The important changes in consumption are an increase of \$1,338,472 in the receipts from distilled spirits as compared with 1896, and a decrease of practically the same amount in the receipts from fermented liquors.

Our American exports are still mainly agricultural, notes the Atlanta Constitution. This is evident from the fact that 67.63 per cent. of our entire exports to foreign countries last year consisted of agricultural products. In the aggregate our exports for 1897 amounted to \$1,099,000,000. Of this sum not less than \$730,323,514 is credited to agricultural products.

Catalogues sent out by some American manufacturing houses give both retail and wholesale prices. In Holland this practice is criticised, as information in regard to wholesale rates is considered confidential.

A Boston man who refuses to accept the modern process of photography as an improvement is still taking daguerotypes, as he has been doing for the last fifty years. He says that they remain the most correct likeness yet produced, and he does business of sufficient volume to warrant his sticking to his hobby.

A short time ago the British government wanted four locomotives in a big hurry, but the British manufacturers to whom they applied declared that they could not furnish them in side of four and one-half months.

The government applied to American manufacturers, who completed the four locomotives in exactly thirty-one days.

Over the plains and the meadows—
Out of the light and the shadow,
There is a glow that thrills
In the ruck of the hills,
And rings from the hearts of the firm-
founded hills.

"The star-spangled banner,
Oh, long may it wave
O'er the land of the free,
And the home of the brave!"
—(National Constitution.)

"Why, I'd rather marry her myself," said I. "Nothing, in truth, was further from my thoughts. Amanda's mother regarded me enviously. 'Of course,' said she, 'if that were the case, it would make a difference.'"

"I shall like to take you to some, 'dear,' I assured her. 'I always enjoy myself when I do. But you know I am finishing my book just now.'"

"Oh, yes, I won't worry you, Cousin Frank. And—and I could help you with it, couldn't I? I almost groaned aloud. Amanda on 'Cerebral Convulsions' too."

"Then, said her mother, closing her hard, thin mouth with a snap, 'Amanda will marry Mr. Plutus. There is no one but who has anything to a voice in the matter.'"

"There is Amanda," I suggested. "'Amanda' she is far too young to marry. And—and I could help you with it, couldn't I? I almost groaned aloud. Amanda on 'Cerebral Convulsions' too."

"I shall do my best to stop her," I said. "I know she will not be a good husband, and my heart went out in a great pity for poor little Amanda, who was so like her father and had been a pet of mine ever since she was a child."

"If I weren't too old—" I said, half to myself. "'No sense! Her devoted to you.' 'Not in—that way.' I believe I blushed."

"Yes, you're no older than I," I said. "'Too much buried in my books and in a marriage's recreations.' 'A marriage would soon alter that.' 'I could never make that child happy.' 'Nonsense! She's devoted to you.' 'Not in—that way.' I believe I blushed."

"I looked down affectionately on the riddle and said to myself, 'I know she will not be a good husband, and my heart went out in a great pity for poor little Amanda, who was so like her father and had been a pet of mine ever since she was a child.'"

"If I weren't too old—" I said, half to myself. "'No sense! Her devoted to you.' 'Not in—that way.' I believe I blushed."

"Yes, you're no older than I," I said. "'Too much buried in my books and in a marriage's recreations.' 'A marriage would soon alter that.' 'I could never make that child happy.' 'Nonsense! She's devoted to you.' 'Not in—that way.' I believe I blushed."

"Then, said her mother, closing her hard, thin mouth with a snap, 'Amanda will marry Mr. Plutus. There is no one but who has anything to a voice in the matter.'"

"There is Amanda," I suggested. "'Amanda' she is far too young to marry. And—and I could help you with it, couldn't I? I almost groaned aloud. Amanda on 'Cerebral Convulsions' too."

"I shall do my best to stop her," I said. "I know she will not be a good husband, and my heart went out in a great pity for poor little Amanda, who was so like her father and had been a pet of mine ever since she was a child."
