THE BOY'S CHANGE.

The outpouring of the college each summer evokes the annual comment and raises the frequent inquiry as to how there is found a place for so many new adventures in the world's activity.

PICNIC BY JUNIOR LEAGUERS.

Swearing to the downpour of rain Saturday, the back picnic of the Junior League of the South Methodist church, as advertised, it took place in the lower apartments of the church and was a success.

The weather, although wet, chilly and generally disagreeable, could not put a check on their enthusiasm and good cheer, and they managed to get plenty of fun out of the occasion.

They took their baskets along and enjoyed the delicacies presented. Instead of having the green sward for their table, they used the tables belonging to the church, and were made as comfortable as possible.

What was lacking from the standpoint of weather was more than compensated by their joyous and enthusiastic spirits. Given a shadow of reality and well fed children will manage to find pleasure enough; and so it was.

There was no discussion of any feature of the meeting, and no contention for any of the office. Twenty-two persons attended the meeting.

Mr. Ann L. Biddle, Rev. W. J. McGurk and Rev. George W. Reynolds were all called upon for remarks regarding the workings of the Junior League.

BARMAIDS IN ENGLAND.

Efforts to suppress them are now being made in various parts of the United Kingdom.

Great Britain is somewhat crossed over the threatened overthrow of one of its conspicuous and altogether distinctive institutions that have withstood the fire of vigorous opposition for several exceedingly active decades.

A plan has been formulated by which it is believed the barmaids of the inns and public drinking places will ultimately be suppressed. The movement already has been started. It has not yet been set going in London, where more than 7,000 barmaids are regularly employed, but in Glasgow, where steps are now being taken to suppress the comely maid who dispense liquors to the town folk in the inns, and the movement has gained such impetus that temperance workers are confident that the issue will be flatly decided in the near future.

Supporters of the temperance cause in England for many years have chafed at the sight of the girls who stand behind the bars of public drinking houses every common and all.

Gray hair is an ordeal to the average woman, and she probably finds it little that it is to be palliated. On the other hand, most women would prefer to have their hair white, if they were certain that all their hair would come out white immediately and not re-grow again in the yellowish, grizzled, mixed stage that comes to all women who have not black hair.

Typical English barmaid. Most universal vogue. In England the temperance movement is almost if not more popularly added to her occupation. During the last few years the barmaid has been the cause of numerous local fames on account of the beauty of her complexion. Indeed, she has been the envy of her friends on account of this supposedly rich gift.

It is a new one on the English nation, because it wasn't up in dew baths. His curiosity was aroused to the point of investigation, so he crossed the lawn noiselessly and, while the girl was not yet dressed, he saw her in a short time it will be quite white. N. Y. Sun.

ATEST CHICAGO FAD.

It is called the Dew Bath and its Devotees Claim That It Improves the Complexion.

Chicago has a new fad which for genuine novelty and originality seems likely to stand unrivaled in a little while. It is the dew bath, and its devotees claim that it improves the complexion.

This absolutely new thing in fads is the morning dew bath for the complexion and it threatens to outclass even the beauty doctors themselves. The author, a woman, writes in a little magazine on the subject of the dew bath. She says the following propositions:

1. The correct hair is the basis of the complexion and it is necessary to the success of a fad.

2. The correct hair is the basis of the complexion and it is necessary to the success of a fad.

3. The correct hair is the basis of the complexion and it is necessary to the success of a fad.

TO WASH CALICOES.

Some Timely Hints on How to Get the Colors and How to Brighten the Same.

Calicoes, before they are put in water, should have the grease spots rubbed off as they cannot be seen when the garment is wet. They should not be washed in very hot water, and should be washed with even colors. Soft soap should never be used for calicoes excepting for the various stains.

Colors can be set by washing the goods in lukewarm water with beef's fall in the proportion of one cupful to four gallons of water. Rinse in rain water—no soap being necessary.

Black calicoes can be laundered in water in which potatoes have been boiled. The potatoes should be sliced and several layers wear sheer black waists, orders all the water in which potatoes have been boiled to be saved.

State President Mrs. Eleanor McCann, County Treasurer, Miss Maagie Murphy, and the officers and several of the members of the Ladies Auxiliary to the A. O. H. of this place, paid a fraternal visit to the division in Rockville last Monday evening, and took part in the celebration of the sixth anniversary of the division. Refreshments were served, speeches were made and a delightful social time was enjoyed at the conclusion of the regular division work. The ladies report having been cordially received and royally entertained by their Rockville sisters.

Large delegations of visiting sisters from Hartford and Rockville were present at the meeting of the Ladies Auxiliary to the A. O. H. in Cheney hall last Tuesday evening and were edited by the capable manner in which the degree team did their work. The initiatory ceremony was performed by the local degree team and elicited much praise from the visiting sisters. They were greeted with the new paraphernalia, and with the new degree work.

HOME AGAIN.

Fatal Alarm in Dr. William Vall's Case—Reported Himself as Being Ill With Small Pox.

Miss Gertrude Abbey has recovered from an attack of small pox, and last Tuesday was released from the Detention house, where she had been since Sunday, June 23. The quarantine was removed from the Abbey and Brainerd residences last Monday. The patients at the Detention house are getting along as well as could be expected.

It is now confidently believed that Miss Ethel Brainerd will recover. She has had the terrible ordeal very well indeed, and most have been graciously sound in order to survive the scourge which was visited upon her.

Frank Abbey and Mrs. Bush are releasing Mrs. Abbey may be recalled next week.

Dr. Vall is getting along comfortably. He had but a slight attack. Notwithstanding his advanced age, his vitality and general soundness are undiminished, and he is proving a winning point in his case.

Dr. William Vall is very much improved in health. Last Saturday he notified the authorities that he had small pox at request of the health officer he was removed to the Detention house for treatment and care. Dr. Keating was sent there and on diagnosing the case decided that the sickness was not small pox, and that therefore it was not necessary to remove the doctor.

O. E. Mannel, an immense, was there with the conveyance used for transporting small pox patients to the Detention house, but the doctor was not given the privilege of having a ride in the vehicle, much to his own peace of mind and also that of his relatives and friends.

It seems now as if the authorities had gained control of the small pox situation, and it is earnestly hoped and expected that we will have no more of the dread scourge.
