SAM LEEVER FOOLED 'EM.

TEAM'S BATTING BIG FACTOR.

With Cobb, Crawford, Rossman, Schaefer and McIntyre Club Has Best Hitting Team on the Circuit-Base Running Another Feature.

By THOMAS F. CLARK. It now begins to look as if Hughie Jennings' scrappy Detroit Tigers will again capture the American league pennant. Although the race is a very close one, Detroit figures best. Jennings' men rank high in all branches of the game, especially batting and base running. Detroit is playing among the leaders of every column of plays which goes to figure up the batting and field-In batting Ty Cobb is on top, with an

average of .345; Herman Schaefer leads in stolen bases, with 33 for 101 games; Crawford leads the home run getters, with six; Rossman and Cobb are tied in two base hits, and Ty Cobb and Sam Crawford are in three baggers. Taking all this into consideration, the Tigers have the best batting and base running team in the league, besides their strong pitching staff.

Of the three other western clubs St. Louis and the Clevelands have the best chance to nose Detroits out. The Chicago White Sox seem to be out of it. The team has been playing spiritless have already expressed the belief that white Sox have met with many injuries and have not been in the best of Writers around the National league afterward develops into a star. shape of late. One of the most successful workers in the precious metals in America is study them scientifically. Bird study them scientifically. Bird study them scientifically. Bird study them scientifically. Bird study them scientifically in the precious metals in America is handy, and one dress can be worn is called ornithology, and the best pos-Mrs. Elinor Klapp. Her specialty is thin linens, also in all the season's with such a variety of blouses and un-sible way to pursue it is to go among unly raced beneath it. This put a the setting of jewels, and in this artistic and delicate branch of the busitistic and delicate branch of the busitistic and delicate branch of the busitints. There is a soft green linen in derwaists that it fills a real want.

Many of the dresses are so called the moon and the development of the day lengthered and the moon and the day lengthered and the moon. ness she has few equals. Although working in gold and silver is an occuworking in gold and silver is an occuworking in gold and silver is an occustyles of the summer, is cool and, betsleeves are all cut in one in kimono bopping about you, especially if you pation which would seem to appeal to women of artistic tendencies, it is only well and with proper care lasts long but to the elbow, and may be gathered eat. The up to date boy still hunts world would be practically tideless.

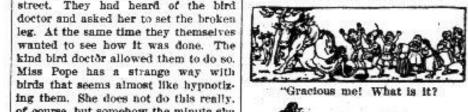

> slight in comparison that the solar tides by themselves are scarcely worthy of consideration. Were it not for these moon caused tides the whole map of the latitudes forty degrees north and south of the equator would have been so vastly different from what it actually is that the most vivid imagination can scarcely picture it. England, for instance, would in all probability still be a part of the European continent, as it was once before the tides and tide caused currents cut the strait of Dover, in which case it is almost certain that the British nation would not have attained its present greatness.

Astronomers and historians would be lost without the moon. Without her there would have been no means for savage or early nations to record time by months. The revolution of the moon around the earth from west to east has been the means of noting time since history began.

Fahrenheit and Centigrade.

boys and girls to love birds and be kind to them. She has in New York city a hird hospital, where she doctors sick birds and performs surgical operations on those that need it. One day three newsboys came into Miss Pope's hospital bringing an English sparrow with a broken leg. They had found the poor thing almost dead in the "Whom have I by the hair? street. They had heard of the bird doctor and asked her to set the broken

"Children, help, help, help!" The Holland Primrose. There is a beautiful flower in Hol land called the evening primrose. It has escaped from cultivation and now grows wild in many places. The plant s about five feet in height and is covered with flowers of a brilliant yellow color. A traveler who came upon a field of these primroses shortly before sunset describes what he calls the dramatic effect made by them. It is at that hour that the flowers open, and as he approached the field they all opened at once, and so suddenly that it seemed as if a magic wand had touch-

Once, some 60,000,000 years ago, 1 garments. There is something very refreshing about a pretty gown, no matter what the material is, but thin stuffs are so much more delightful to the eye of the beholder that it is a

The Fahrenheit thermometer is the one in general use in this country, except among some of the scientists, who use the Centigrade. It would be well for all the boys and girls to know wherein the difference between them consists. In the Centigrade the space between the freezing point and the boiling point is divided into 100 degrees, while in the Fahrenheit it is divided into 180 degrees. A degree of the Centigrade, therefore, is higher Centigrade is at the freezing point and and fields with a camera and sitting in the Fahrenheit at 32 degrees above taking and useful. One made recently For early fall dresses and long as quietly in one place till the birds came that this must be considered in com-All travelers agree that the two in this style was of shrimp pink linen, most beautiful things in the realm of kilted and trimmed with bands of very girlish and pretty, though diffipletures.
