There were severe pains in my kidneys and at night it seemed as if I could not assume a comfortable position. When I caught cold, the pain in my back alwars became worse and at such times the kidney secretions were filled with sediment and passed too frequently. I heard so much about Doan's Kidney Pills that I was finally induced te get a supply at a drug store. They helped me at once and continued use restored me to good health. I always intend to keep a supply of Doan's Kidney Pills in the house." [Statement given Feb. 17, 1908.]

program as brinted in these c lumns last week was carried out.

The Memorial Day address of Rev. Dr. J I. Bartholomew of New Bedford, Mass., was certainly masterful and won numerous and most hearty expressions of appreciation and approval. The theme of the reverend and talented speaker was that all government emanates from God, and that the hand of God rules the destunies of nations. To this subject he directed his oratorical and intellectual abilities for 45 minutes, to the very great satisfaction, information and admiration of the large and deeply interested assemblage.

If, then, there isn't shown such interest—and I must say that what I have already seen in connection with this matter gives me to think that there won't—and the committee should report against a commission of any kind there will at once go up a howl of protest against such action from the newspapers generally over the state and the legislature will be scolded from Ekonk to the Danbury Fair grounds for sidestepping its duty. Harryord, June 1—It has all of the time been maintained by those who oppose the establishment of a public utilities commission in this state that there was no public demand for it and while there are to come two more hearings this week—and on phases of the subject more likely to interest the general public than did that of today on the control of the financial operations of public service corp rations; namely, control of rates and control of management and operation—the slim attendance at today's hearing would tend to show that they are right. day's hearing would tend to show that they are right. There were present very few to hear Attorney Robbins read President Mellen's most interesting letter to the committee, compared with the number one would have expected and which should have been there if there is any general interest in the matter, and most of the rest are regularly about the Capitol in some capacity or other.

As before remarked, and as other newspapers have tried to make plain of late, tomorrow's hearing on rates is the big hearing of the series and in attendance upon it may confidently be expected to be a large number of men if any real interest in the general propo-

measure unless there is shown a desire on the part of the public for the creation of a commission.

This capitalization and financial end of the public utilities proposition is by no means the popular end, anyway, if it has a popular end. People generally care very little how much water there is in a stock or an issue of bonds. Rates and general management interest them far more To a commission to regulate and control, a commission somewhat along the lines of the present railroad commission, but with broader powers, there would really be little objection on the part of Mr. Mellen's company. There has been no definite opposition from that source heretofore. It is the Southern New England Telephone company and the smaller corporations which have been fighting the corporation end of the right.
