# Saving Your Strength This Hot Weather

Think of what it would mean to you to spend only a few moments in preparing the meals this kind of weather, with the balance of the day at your disposal. With a "Caloric" you are enabled to do this-it is being done in thousands upon thousands of homes. The Caloric Cookstove has completely changed the method of cooking, reducing woman's work and making her life more pleasant every day in the week throughout the year. No home invention of recent years can be compared with it.

We understand how impossible this must seem to one who has not used a "Caloric" cookstove, but some that were the most skeptical are now among the most enthusiastic users and tell us they would not sell their "CALORIC" for several times its cost, if they could not buy
