Princess Louise chose to marry the hand but there's always the rosy glow of some Duke of Fife instead of a plain and uninteresting prince. The domestic life of the Fifes is said to be ideal, and the pretty Princess | faint outline of the cloud of smoke in

aunt, Queen Mary, is reported to be the special chum of Prince Edward of Wales. There is a good deal of speculation as to whether when the time comes for a decision he may not insist on wedding his fair cousin of Fife instead of any of the other royal princesses whose matchmaking parents are anxious for an alliance with the heir of England.

Princess Victoria Louise of Prussia (on the right), who recently visited England, so far seems to be the chief possibility. Although she is a little | who are too strong for me to build a older than the prince, such differences of age count for little in royalectroles, and there is no doubt the match would please the young man's mother, who is ambitious and who has a warm personal friendship for the traiserin and approves the methods used in bringing up the German princess.

TWO FRIENDS OF THE BOYS IN KHAKI WASHING AWAY THE LAND HE photograph shows two very interesting American women, Miss Erosion of the Drainage Basins of the

Investigations by the United States the east, who has been ordered to repair to Texas to take charge of | geological survey of the erosion of the troops there. The photograph shows Miss Gould on the lawn at the Grant | numerous drainage basins of the Unitresidence on Governors island. New York, where a fete was being given for | ed States show that the surface of the country is being removed at the average rate of about an inch in 760 years. Though this amount seems trivial when spread over the surface of the country, it becomes stupendous when considered as a total or even in separate drainage hasins. The Mississippt river, for instance, carries annually to the sea 136,400,000 tons of dissolved matter and 340,500,000 tons of sucended matter, and of this total the Ohio river carries 83,350,000 tons and the Missouri river contributes more than twice as much. The Colorado river, which has built up for itself a vast delta, brings down more suspended matter than any other river in the United States, delivering annually 387 tons for each square mile of its drainage basin or a total of 100,740,000

The rivers of the United States carry to tidewater every year 270,000,000 tons of dissolved matter and 513,000,-000 tons of suspended matter. This total of 783,000,000 tons represents more than 350,000,000 cubic yards of rock or 610,000,000 cubic yards of surface soil. If this evosive action had been concentrated on the isthmus of Panama at the time of American occupation it would have excavated the prism for an eighty-five foot level canal in about seventy three days.

A FAMOUS DWARF.

Borulwaski, the Pole, Was Handsome,

Scholarly and Witty. notable dwarf, who had a long lease of life over parts of two centuries-he was born in 1739 and died in 1837-was Borulwaski, the Pole, of whose debut an interesting tale is told. As a boy of fifteen, when he was just one inch higher than a two foot rule, Borulwaski was presented to the Empress Maria Theresa, who was so charmed by his good looks and grace that she seated him on her lap and gave him a hearty kiss. To the queen's question as to what he considered the most interesting sight in Vienna the dwarf replied, "What I now behold, so little a man on the lap of so great a lady." This speech rendered the little fellow a great favor-

He became a special favorite of Stanislaus II., who took him to England and introduced him to George III., and for more than half a century whom she somewhat resembles in appearance. Mrs. Grant takes an active | Borulwaski made his home at the
