First Spring Showing of Children's SOUTH MANCHESTER POST. Carriages and Go-Carts

The new baby vehicles have arrived, It's as good as an automobile show to see them at our store. There are all kinds of new features, such as fenders, side windows, reversible bodies, etc. and they are painted in colors to suit your fancy. All are the famous Whitney make. It may be interesting to our friends to know that last year we sold more Whitney carriages than any store doing business in a town of equal size in New England. Of course we're out to do it again.

As a special inducement for you to buy your carriage here we will give with every Whitney carriage for only one dollar (\$1.00) extra a

exist, the certainty seems to be, congressmen say, that the expenses must continue to pile up. The Democrats have shown some sympathy with the work of the economy and efficiency commission and granted money so that the commissioners could continue their labor.

Congress has been given information about how to save money. It has been transmitted direct from the computation tables of the economy commissioners. It is true that if the plans of the commission are followed there will be no more billion-dollar sessions for a long time to come. Whether governmental activities will be crippled remains for the future to prove.

Fear They Will Lase Joba.

Already congress has anough advice in its possession to make the saving attempt, but thus far it has not acted upon it. Possibly it is waiting until all the advice comes in. Not long ago the law makers were told how much money could be saved in Naval Militia Bill Favered.

From the beginning of the work of the economy commissioners it has been urged that while billion-dollar sessions may continue to be the rule the government can get a much greater er return for its money if the plans suggested are adopted. It is said that two or three hundred million dollars can be saved yearly by judicious readjustment of the machinery of the government. The plan which has been suggested is to take the money which is saved and to put it to other uses for the benefit of the people, such as the extending of the work of the good roads office, the establishment of a department of health and the founding of a bureau which no accurate test for that happy con-

Just how long a time will elapse before fur-bearing animals are wiped off the face of the earth is a pertinent question. For furs are becoming more and more luxurious, more and more extravagantly used, with the recurrence of winter. There seems no limit to the demand.

Great results are accomplished with moleakin, squirrel and above all mush rat. The prolific rabbit supplies many a pelt which is changed by the furrier into something new and strange past all recognition.

Lavurious coats and furs from Franch establishments are pictured here. Above everything else women are procured here. Above everything else women and time.

Comfortable! They are constantly as vancing in price. Really good furs, therefore, if well cared for, will prove a good investment.

There is nothing which is quite so cleverly imitated (unless it is precious stones) as furs. Besides the furriers the manufacturers of plushes have made imitations of fur in plush that will make one look closely twice to be sure they are not the real fixing. They are much worn by fashionable people and are made up as elaborated by as real furs. When bought ready made they must be conceded to be the common of the common of
