The grand strategy of the New England Lines is to develop the territory it serves.

To win out is to provide a better system of transportation than New England ever knew.

The biggest business-building institution in the community must be the railroad that serves that community.

AN A WOMAN do as she pleases in her youth and by the strength of her will, the force of her deter-

mination, avoid the consequences? Can she, by laborious secrecy and tireless evasion, make the world judge her as the world judges men and not as the world judges women? Can she once and once only step beyond the bounds fixed by Society and resolutely step back without a penalty?

This great problem of a Woman's Will Against the World is the problem of The Woman - a problem only shadowy in the play, become salient and challenging in the intense, arresting story which Mr. Terhune has based upon the powerful de Mille play produced with such great success by Belasco.
