Then, as look of triumph spreads over his the maritime station is full. Mrs. A. H. Clarke of Earls court the last dollar, it is far more praise-worthy in one always to possess a faw don the collection of continental and win the bet. I'll be at the office this

faces are tabooed by factory and shop employers. This fact was strongly emphasized by Mrs. P. J. O'Connell in her address at the opening session of the recent vocational guidance conference in New York. Mrs. O'Connell obtains occupations for several hundred girls a year, who come to her from the various high schools, settlements and religious organizations of the city.

She recited an experience with a girl who had had 14 jobs in five years, and said the girl's persistency in the habit of dress, which was described as follows, was largely to blame for fessor of soology at the university—her "floating" from job to job: "A transfer read from the university of the specimens all carefully set, arranged and labeled; and to it Mrs. Clarke has added her husband's working library of entomologists and designed not only to pierce a gas envelope, but also to set fire to the gas. The projectile, is provided with little wings fired from an old model of German rifle, is provided with little wings and beauty of the specimens all carefully set, arranged and labeled; and to it Mrs. Clarke has added her husband's working library of entomologists and designed not only to pierce a gas envelope, but also to set fire to the gas. The projectile, fired from an old model of German rifle, is provided with little wings that open in flight under the influence of a spring.

An ordinary bullet leaves such a small hole in an envelope that the small hole in an envelope that the gas escapes through it but alowly. The wings on the improved bullet tear a hole of appreciable size in the fabric. What is more, they retard the bullet unificiently to cause a friction device to ignite fulminate contained in the bullet. It is said that experiments conducted at Neumanns-wald gave encouraging results.—Scientific American.

owning real estate, in the Town of Manchester.

Dated at Manchester, this 18th day of October
A. D. 1813

BANFORD M. BENTON, Town Clerk

What brought the clouds after a few
few months? Isn't it odd that lovers
have no philosophy about them?

They do not look for any change as
time passes. There will be no cross
words or falling off in demonstrations
of affection. Behold them? Henry
smashes his thumb with the hammer
one day, and he goes home thinking
what a fool he was to hit his thumb
instead of the nall. He found his wife
in bed with a headache. She was

Vexed about it. Why hadn't the air
"It looks like it?"
Come out and get your punishment," said a voice outside.

"Hen-Henry, I am sorry I have been
them to you," sobbed the wife.

"I have been the meanest of the
two," was the reply.

"I was loving you all the time I was
quarreling with you."

"Same here."

"We will give you one minute more,"
the decking for net.

"Come out and get your punishment," said a voice outside.

"Hen-Henry, I am sorry I have been
them them? Henry, I am sorry I have been
the decking for net.

They do not look for any change as
time passes. There will be no cross
words or falling off in demonstrations
of affection. Behold them! Henry
smashes his thumb with the hammer
of affection and the provide and the pr SANFORD M. BENTON, Town Clerk vexed about it. Why hadn't the all- "Oh, Henry, it will most kill me to ment come to some one else! Why have 'em tar and TO THE BUARD OF COUNTY COMMISslowers for Hartford County. I hereby

factory system. It has been found more difficult to effect organization among female em-ployes than men, and a comparatively ave united with the trade unions.

Political Prophecy. All men are intuitive prophets, This is part of their proud claim to the cossession of reason looking before and after. On all sides one meets happy warriors professing to see in current events only what they foreaw and predicted. Especially in pube affairs are the most unlikely Sauls found among the prophets. Who of us has not been drawn aside by a man bearing none of the outward insignia of a prophet, who begs his hearer to mark his words as he proceeds to unroll the book of fate? His favorite field is political campaigns. He In case of accident because of gates being rammed by ships there are emergency dams which may be brought will tell you who is going to be elect ed and why. Near and far his eye rolls in a fine frenzy, and his forecasts are as universal and sweeping and—we regret to say—usually as foaccurate as those of the old-style almanac. Despite frequent ludicrous confoundings by the event, this kind or prophet comes up smiling after every failure. He is stayed by no consideration of probability or the doctrine of chances, and openly flouts

ettle this thing, my girl. I want that

"But-" she pleaded. "You've got a bit of knowledge that we need and need d d bad. A bit of knowledge we've got to haveand mean to have. Understand that? And what we've got to get, we get. Now, is it fight or not? Will you take

the money I've offered you or will you run your silly young head into the hottest bunch of trouble a girl ever met with? Which'll it be? Speak "I-I don't know. It'll disgrace the Woman, won't it, if I tell?"

of the Smart."

in front. At one side is a panache mounting to a great height and giving a dashing effect that would look well robe is on, for there is no other open-brought the escapes down with them! with a military suit. On a black velvet hat for evening The elbow sleeves are simply wide there is used chantilly lace for the puffs of lace ending in narrow ruffles brim and for the wired bow at the gathered with ribbon and beading. back that holds the turned-up brim. The sugar-scoop hat of black velvet will be a typical fall style. It has no

clearly defined crown and the greatest height is at the back. The tilt is down toward the nose, and a bandeau frequently the means to the end. In a boat-shaped hat the length from front to back is emphasized by a bori-zontal line of feathers. The brim flares up decidedly at the side.

There has been inspiration in the jockey's cap, which is now shown in green velvet, the brim turned up at the back and extending out in front. Wired loops rise at the back. A visor cap has a satin extension in

ront, a low crown and loops of ribbon at each side pointing backward. Half hidden sashes are considered the grand chic. The sash frankly encircles the waist and forms a more or less conspicuous bow at the back. Then the ends pass under a tunic of lace chiffon or machine embroideryaccording to the nature of the costume emerging at the knee to fall over the skirt. Sometimes the ends of the sash are knotted under the semitransparent tunic and caught against the skirt, to give the clinging effect now fashionable. Indeed, most sash ends are now attached to the skirt in some fashion, for floating ends are anything but smart. If the sash not sewed against the skirt at its ends, it is at least substantially weighted, so that even when the wearer dances the ends fall limp and

## DEFIANCE FROM A DISTANCE!

Discomfited Bully Certainly Gave His Adversary What Might Be Called Fair and Proper Warning.

Many of the best Pennsylvania stories come from the lumber camps. This bit of rough-and-ready history was told in a botel lobby by a visitor o Philadelphia from the great West branch valley of the Susquehanna: "Paddy Wood was the porter at the ricky house in my town. He was a mark for mischievous boys who found that he would chase them if properly baited. He had a board about five feet long which he promised to use on his tormentors, thus adding to the spice of danger to

"One summer evening Paddy Wood his board leaning within easy reach against the building. Paddy Plank, swaggering woodsman, with numerous raw or "natural" whiskies under his belt, hove in sight. He stopped in the road, fumbled for his woodstock pipe for several minutes and was a longer time lighting it. The woodally smoked with the bowl turned It was not the pipe of peace, however, for the moment Paddy Plank's orbs sighted Paddy Wood he discovered that his system craved a little Kilkenny fun and he began to hand Paddy Wood some choice compliments, such as are usually set affoat

when one is looking for trouble. "Paddy Wood deliberately arose from the bench picked up his board and smote Paddy Plank on the law. knocking his pipe across the lot, the sparks from which described an are of fire like a rocket.

Wood's response—he didn't expect it by wire-and seeing his disadvantage,

he started to run, with Paddy Wood

trying to lift him off his not with "As soon as he reached a safe distance from his pursuer, Paddy Plank turned around and uttered this piece "Kape away from me! Kape away from me! or you will have you heart's blood on me hands!""

"HUMORIST" AGAIN AT LARGE

Easy to Recognize This as a Sample of the Work of the Dreaded "Clown in Private Life."

A large part of the world's supply of crude rubber comes from the republittle attention to the manufacture of that commodity. Another day is coming. Brazil is about to engage intelli-gently in the manufacture of rubber, an enterprise which, in the course of time, may affect the manufacture of that material in the United States and that material in the United States and Europe, by bringing in a new and formidable competitor. Le Bresil Economique of Rio de Janeiro says that under favorable conditions offered by the government refineries of caoutchouc (rubber) will be established in a number of states and factories for the manufacture of rubber articles in the cities of Manaos, Belem in Para, Recife and Bahia. There will be special exemptions in the way of duties and articles imported for the carry-

upon articles imported for the carry-

dering, "I wish you wouldn't use black-mail to win your fight." "Blackmail?" echoed Blake slowly. Then he paused. The rugged mask of a face had not changed. But the pupils of the half-shut eyes had sudlenly contracted as though a blinding light had been flashed before them. Yet, a second later, when Blake spoke again, there was no trace of pain or

ingward after the manner of a stupid three-carat diamond. Steady there!

manding at her elbow, "you and I will

The matter of the state of the

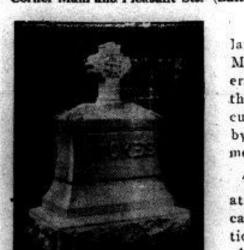

any water, it was difficult to account for the crocodile's strange position. When questioned upon the subject the natives explained that it was put there by an elephant. It seems that when the elephants wade into the Lake Ngami to bathe the crocodiles are in the habit of worrying them and biting their legs. Sometimes when an ele-phant is annoyed beyond endurances it ploks up its tormentor in its trunk, puts it among the branches of a tree, and leaves it there.

per Feeding Saves Lives of Thousands of

FIGENE CHRISTIAN, F. S.

VER 350,000 children die in the subject of infant feeding. Laborious United States every year from analyses have been made: tables have

preventable disorders." Most been compiled; terms in chemistry these, it is true, are under have been severely drawn upon to exwe years of age, but this furnishes plain the findings of scientists. The good evidence that a vast army efforts of all these writers, no doubt, Berenson & Goodrich of little fellows merge from infancy were inspired by the nobleet purpose. into youth every year who have bare. Nevertheless, amid their tables and learned technicalities the average In the city of New York alone 20,700 mother stands bewildered and must

children under two years of age die every year from what might also be termed "preventable diseases." During the months of July and August some knowledge of the chemistry of year 2,886 children under two common food. She should know somerears of age died in that city from thing about selecting and combining Apartments arrheal causes alone—that is to say, intestinal trouble, which, in its last alysis, means wrong eating. analysis, means wrong eating.

It is fair to assume that mothers in

lew York city know as much about it differs from that of the adult. eding as do the mothers in other | Every mother should endeavor to American cities—in other words, it is feed herself so as to nourish her baby from the breast if possible, but where other American cities are as ignorant this cannot be done and artificial feedon this question as are the mothers in ing becomes necessary then the prepa-New York. This being true, it is evi-

> healthy baby food, it must be modified according to the requirements of the Formula For Humanizing Cow's Milk. The nurse or mother should prepare an amount sufficient for only one day's supply at a time after the following Framing. Cameras, Films, Photo-

importance. Cow's milk, of course, is

the logical substitute for mother's

milk, but, taken whole or natural, it

is too high in proteids and too low in

sugar; therefore, in order to make a

formula: ream ....... 2 ounces Milk ...... 2 ounces Water ...... 15 ounces

Milk sugar .... 4 level teaspoonful This should be thoroughly mixed, 317-3 or 46-2. This should be thoroughly mixed, placed in the bottle and set in warm water until it is brought to the tem-

perature of breast milk. The above formula can be used during the first mouth of baby's life. The baby should be given the first The baby should be given the first day five to six feedings of about one TAKE THIS TIP ounce at intervals of from three to eight feedings; third to tenth day, nine to twelve feedings of not more than one onnce at a time two to two and one-half hours apart. During the sec- see all the others, know all their strong Rubber Tiring a Specialt ond, third and fourth weeks it can be points etc. go down and talk

given about ten feedings a day and from two to two and one half ounces w. E. LUETTGENS The formula for the second and third | And Indian Motorcycles

months should contain more cream and Main Street 10,000 children die in a fraction less milk and a slight ineading American cities from crease of milk sugar, and it should be fed seven or eight times a day, ranging ggregate population of the from three to four ounces at a feed-

According to these figures, it is shown The formula for the fifth to the that about a thousand children out of twelfth month is: every million of city population die in Cream .. 6 to 8 ounces July and August of every year before they reach their second birthday.

10 ounces . 5 to 6 teaspoonfuls that mothers, doctors and nurses in small towns out in the country know Amount and frequency of feedings

amail towns out in the country know as little about feeding and caring for children as do the mothers, doctors and nurses in the city of New York. This being true, it is unreasonable to assume that about a thousand children out of every million population in the entire United States die every summer on account of our lack of knowledge in regard to feeding and

knowledge in regard to feeding and caring for them. If this is true, then we have a funeral train of over 10,000 funocent little ones during July and August of every year who die from stounch and intestinal troubles alone, which are the most easily controlled and preventable of all so called children discovers to discovers the case of the case of the case of the case of the first class drug store. The mother should exercise careful vigilance and judgment, especially in reference to

The Committee of One Hundred. the frequency. The moment the child Wherever the health question has shows symptoms of overfeeding the 867 So. Main st. So. Manch ste sen closely investigated astonishing quantity of cream and the amount of sevelations have been made. The fa-mous committee of "one bundred" ap-pointed by Psesident Roosevelt to look the child an opportunity to get hungry. the health of the nation reported "2,000,000 people die every year be United States because they

in the United States because they for not know how to live."

Dr. J. H. Mason Knox, an eminent sutherity on children's diseases, said in a public lecture in Washington not long ago that "300,000 little ones die very year in this country of entirely curable diseases." Dr. Knox further asserted that the number of deaths among children from careless feeding are twice that from tuberculosis and about one-third the number from all no called virulent diseases combined. It is reasonable to assume that nearly all, or at lesset a great majority, of these valuable little lives could be used if mothers were tanget the simple and nutural laws of instant hygiene, scielly infant and children nutrible and control of the combined that control diseases and seed and seed and control of the combined that control diseases and seed and seed about the propose of the combined that the number from all no called virulent diseases combined. It is reasonable to assume that nearly all, or at lesset a great majority, of these valuable little lives could be used if mothers were tangent the simple and nutural laws of instant hygiene, scielly infant and children nutrible and combined that it may do itself not harm. In this way it will move that comined disease and see about they free, care only being exercised that it may do itself not harm. In this way it will move that comined disease that the sum of age. Keep Warm While Asleep.
Among the Musgum tribe of the Kamerun, near Lake Chad, a German explorer reports that he has discovered an unexpected luxury. As the nights are very cold in that part, the heds are built like stone coffins, and underseath a fire burns all night, keeping the alceper warm.
