Some Facts and Suggestions.

By A. A. BORLAND,

State Agri. College, Burlington, Vt.

The fertilizing elements in the nine-

ty-six pounds of dairy byproducts are

10 cents per fowl was allowed. The ing from \$9,000 to \$12,000. In closing, just a word to those wh would try fattening on a small scale.

Most Milk For the Least Money. Don't use buckwheat, because it makes By JARED VAN WAGENEN, the skin white, and the American mar-Practical Farmer and Dairyman. ket demands a yellow skinned bird.

There are three main arguments in THE MILK CAR VERSUS THE favor of the use of a silo-first, it is the cheapest and quickest way to preserve the wonderful corn plant; second, it is much more palabable than the air dried stalks or fodder-hence the cows eat it more freely, and there is almost no loss from the cows rejecting the coarser parts of the stalks (this latter saving is parts of the stalks (this latter saving is route the milk car or the creamery and Dimensions Illustrated Are Result of Considerable Experia very important matter in the course | depends largely upon the value that of the winter); third and perhaps most can be realized from the skimmilk and in the form of pumpkins or root crops | The dairyman who keeps pure bred | ply:

No dairyman will have his milk were worth thirty-one pounds of whole farm in corn, and there will all cornment when three pounds of skimways be some hay to feed. Still, it is milk to one of corn were fed, but when wise to make stinge the larger part of seven to nine pounds of skimmilk to the ration and balance it with proper one of corn were fed 100 pounds of

A common sense ration for a dairy pounds of corumeal. The average of cow giving a good milk yield will be all feeding trials with skimmilk and made up of forty pounds silage, ten corn in varying proportions gave twen pounds hay and from six to ten pounds | ty-one pounds as the comment value of grain, giving the grain in proportion to 100 pounds of skimmilk. With corn at her milk yield on the basis of one \$1.60 per bundredweight the value of pound of grain for each three pounds skimmilk for pork production would be 34 cents per 100 bounds. For yea!

Now, how large a silo and how many calves skimmilk gives fully as large acres of corn are provided for a dairy? | financial returns as when fed to pigs. The following figures will help to de Buttermilk is practically the same as termine this: There are about 200 skimmilk in feeding value for hogs. days of entire stable feeding in north. Then 100 pounds of 4 per cent milk ern states, so to feed forty pounds of should yield ninety-six pounds of sliage per day means 8,000 pounds, or | skimmilk and buttermilk, worth 3° four tons, for each cow during the cents for year or pork production. winter. To help out scanty pasture in summer there is no feed as good as stlage, so provide an extra ton for worth 10 cents, about 7 cents of which each cow for this, or five tons in all goes back to the soil after having been llo holding sixty tons is regarded | fed to hogs. Adding together 33 cents. | ample for a twelve cow dairy, the value of the byproducts, and 7 and this capacity will about be equal- cents, their fertilizing value, we have a ed by a round sile of fifteen feet in total of 40 cents that should be added liameter and twenty-one or twenty- to the returns from the creamery per we feet deep. If it is also to be used | 100 pounds milk in order to place the for summer feed it is better to have it creamery on the same basis as the mly twelve or thirteen feet across milk car. The following table shows

and thirty feet deep. It is possible to grow twenty tons creamery and the milk car: ood yield, and in practice it is much reckon on eight tons, so the man

Work For Every Month in the By E. K. PARKINSON. Agricultural Expert. The man or woman really bent acceeding is always willing to get

oints from any legitimate source, de-

By F. D. COBURN. Secretary of Agriculture of Kansas. The most remarkable development of readers, then, to visit Mr. Laurens' and pasture plant which twenty five airy place? They need it.

ten thousand had heard of. Now more than a million acres of it are growing in Kansas alone, while Nebraska has two-thirds as much, and nearly every other state is increasing its acreage.

Wherever grown it is the handmaiden of Mr. Laurens, his wife, two women who worked on the farm and a team ster. The women and Mr. Laurens fat.

Who esteems it most.

Since its advent alfalfa has sold more Kansas and Nebraska land and at higher prices than any other one prices than any other one prices.

Who esteems it most.

Alrestated line, freely, dated where, is cheap, and will destroy lice, gapes and the roup. ster. The women and Mr. Laurens fatter the fewls, and the plan of operation was as follows: Mr. Laurens went lands, with almost no sale and considered a burden at a five dollar valuation.

With his cart to the nearest public have been quick sales at \$10.577 and the few drops of spirits of campbor.

Teeding chicks when too young and too much at a time are fruitful sources of bowel trouble.

A few drops of spirits of campbor.

When feed gets scarce in pastures. with his cart to the nearest public market every week and bought some 300 thin fowls, ranging in age from six months to one year. (In many foreign countries it is customary for the rear ers of fowls to sell them to fatteners.)

The price paid averaged from 60 cents are selected to alfalfa. Others, although not by many means the best, have year after year paid owners 10 to 40 per cent on valuations of \$200-and more per acre. No farms change hands less frequent-The price paid averaged from 60 cents to \$1 each, depending on the season and the shrewdness of the buyer. The birds were put immediately into long coops with siatted fronts and floors, bolding eight or ten birds each and set up on wooden horses in semi-dark sheds and cellars. Here they stayed up on wooden horses in semi-dark sheds and cellars. Here they stayed one month, being fed twice daily on skinomilk and buckwheat meal. The first week the birds were fed sparingly—in fact, kept hungry—then gradually the amount was increased until they received all they would eat. The buckwheat was purchased by the carload and ground and sifted on the farm. The feed when ready to be poured into the long V shaped troughs in front of the coops looked for all the world like buckwheat cake batter.

As to cost and predits: The birds were dry picked and packed in wicker hampers holding six pairs each, and the price fetched ranged from \$1.50 to \$1.70 and the weight averaged at pounds meh. For hampers and transportation

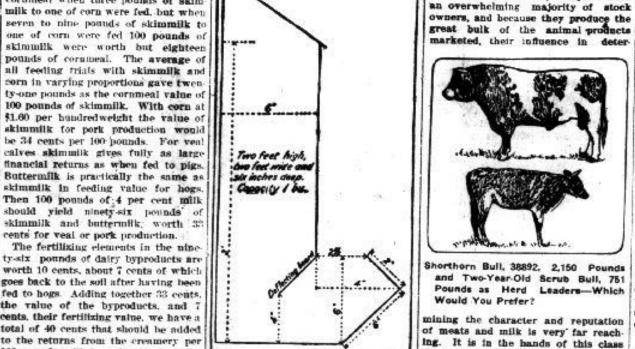

ecceds the ground in the years th follow will be gone over many with mowers, rakes and workmen, and carefully evened surface will prov

## Goetz's bread is Good bread

Goetz's bread is made from strong spring wheat flour, because strong spring wheat flour makes the best bread. You cannot make good bread from poor weak flour, nor can you make good bread by using poor yeast or handling the dough carelessly or by half baking it.

We use the best strong spring wheat flour obtainable. No guess work about it. We do not take the Miller's word for it. We use the best, because we know. We make sure, by testing the flour in our laboratory. We set a standard what a flour should be, and reject it, if it does not reach that standard. Then we use good yeast, handle the dough carefully and bake it thoroughly. Because of its lightness and tenderness and perfect digestibility, Goetz's bread is the most nutritious of all foods.
