Where Dentistry is a Pleasure

From our personal experience we find that in a majority of cases where people are suffering from bad teeth the true cause was mostly due to the fact that they dreaded the dental chair.

This dread disappears with those who have received one treatment by the scientific and positively painless method of the Yale Dentists. This fact of painless dentistry is made possible in the office of The Yale Dentists because they use the latest and most improved analysesic apparatus. By this method teeth can be extracted filled or crowned positively without pain, no matter how old and nervous the person may be.

NO NEED WEARING FALSE SETS If you have broken down or missing teeth we can replace them by our Yale bridge work system so that it will be impossible to detect them from your natural teeth, and you will not be obliged to wear any plate. If your teeth are loose do not have them extracted, we can care them and tighten them for you permanently. We invite the people who are wearing false sets of teeth that do not fit or drop to call on us and we will insert the Yale suction, which makes sets stay up.

We can furnish testimonials of patients who could not wear false seth or other makes, and are now enjoying a Yale suction set. Our rices are not higher than what other dentists charge. Extractions ree when sets are ordered. Call on us and let us give you a free estimates the contraction of the con
