THE BOSTON UPHOLSTERING COMPANY

RETIRING FROM BUSINESS

VALUES IN PARLOR AND LIVING ROOM SUITES.

This well known maker of parlor and living room furniture having decided to retire from business found

necessary to invite buyers to their factory, who represented large output and who pay cash for the furni-

ture. We made a very advantageous purchase, buying the frames at the factory and arranging for the man-

ner in which they should be finished and upholstered so that each suite is fresh from the hands of the work-

men and practically custom made. The Boston Upholstering Co. quality is maintained and the prices at

Heavy Hitters

f the Chency Silk League has figured out the batting averages of the play-ers in the factory league and it shows that there are some heavy swatters in the bunch. The figures below are given for the three leading teams in the race for the ailver loving cup. The averages for the Ribbon team are not given as it was an almost hopeless task to figure them out owing to the first that they have had more players than are listed in the Russian army. Six games have been played thus far

FIGHTING IS ! NORTH SEA

Greatest Naval Battle of the Ages Probably Fought GERMAN FLEET IS REPORTED REPULSED

-British Admiralty Refuses to Either Affirm or Deny Rumors Which Are Believed to Be True-Slaughter In Belgium Continues, Two Forts at Liege Being Captured by Germans-Bloody Struggles Will Seem but Skirmishes Compared to What Will Come When Kaiser's Armies Enter French Territory-British Parliament Appropriates \$500,000,000 For War Purposes

London, Aug. 7 .- Somewhere out in the North sea the flerts of Great Britain and Germany have met in the death grapple for which both nations have been preparing for decades. No details of the greatest naval battle of the ages have been revealed. The British admiralty refuses either to affirm or to deny the fact that the fleets are embattled upon the high seas, but an apparent authorization of the engagement is contained in the message sent out by the Press association, in which it is

The three great laws that support

Stomach and intestinal trouble.

The greatest break in the health line Il animal life are: First, food; second, after thirty is from thirty-three to thirty-five. This usually marks the Nature does not require the child or time that men or women are in the the mother to take a great deal of ex- business world, with no one to guide reise, and, as a rule, both get enough them in regard to their eating. resh air to answer the requirements The reason why the health line runs of ordinary bealth. The one thing level from thirty-six to fifty-eight is their eagerness to get the swill. then, that dominates and controls the because when people know enough to bealth of the child is its food. The pass over the critical period between

food question is a serious problem thirty and thirty five they have learned from six months before birth until the "the great lesson" and are very apt to improve in health up to fifty-eight. At The mother's milk can be changed this age, however, there is another nstantly from the best life giving crisis. Becoming assured of their fluid to a virulent poison by emo-tional excitement, such as fear or an-their efforts in the business world are ger. This merely shows what a deli- doubled in order to put away somecete piece of mechanism the human thing for the rapidly approaching body is. The fact that mere mental "rainy day," and another break is exdisturbance can change the lacteal perienced, and a vast number of men fulds of the body instantly from food fall out of the ranks just at the time to poison emphasizes the tremendous they are most useful.

importance of mental tranquillity, espe-cially during the nursing period, and the fact that over a quarter of a mil-experience that has become real knowl-Hon children die in the United States before they treach their first birthday emphasizes the tremendous importance the world, but by their own actions An infant is merely a little animal are most useful to society. If the sixand if treated with reasonable care ty-fifth year is turned in reasonably will grow and develop as hardy and good health, then it is fair to assume that the lesson has been learned again as it was between thirty and mens, woolens, fiannels, laces and othfrom its skin, when we feed it upon the dozens of patent foods of which we that he will reach the ninety year mark

the dezens of patent foods of which we know nothing whatever concerning their chemistry, when we give them sweets that icritate and inflame the fonder success lining of their stomachs, when we give them meat extracts that may be a year old and, worse then all, when we give them medicines, especially soothing grups, the principal desert of which is opium, or at least and gained our health by deprivation and work then we so appreciate this priceless treasure that even the so called the diction, we cannot expect the second that gives no head nor care to what he eats, when he eats or how he eats.

ESSENTIALS FOR FARMING.

traveler and writer of the first century A. D., said that for successful farming just three things were essential-knowledge, capital and love for the calling. As true today as it was when written, the fact that knowledge is essential is too often lost sight of. Men who have succeeded in other lines of work or in none If the child manages to live to its I enter agriculture and fail for the lack of it, then christen it "hard luck." Had Columella been inclined to be a maker of epigrams he would probably have added to his statement that knowledge, capital and love for the calling are essentfal, the no less true statement that lack of the first is apt to result in loss of the second and third.-Better

man family if it cannot lay out a diet now amounts to many millions of dol- ed Pictures. Picture Framing, Debeen reached statistics show that peo- all day should eat food commensurate by man of the natural enemies of

age of thirty, but between the certainly cannot live an inactive life If meadow mice were always preages of thirty and thirty five there is and eat the food of a ditch digger. ent the red tailed bawk would rarely undous break in the health line. There is a vague superstition among touch other food. It is when their which continues up to fifty-eight, and most men that mental work consumes normal food is scarce that predatery from fifty-eight to sixty-five the mor- energy and uses up a vast amount of birds and animals are from necessity ality is something almost alarming. food. No greater mistake was ever forced to take what they can find and but when we pass our sixty-fifth birth- made. The mere process of thinking thus become trespassers on man's

Now let us analyze these figures and see what we can gain by this information.

We will return to the infant class. Children, as a rule, are healthier than their parents. Nature has provided in their parents. Nature has provided in the seed and sweets.

diminutive quantities: therefore the food for the mental worker should be composed largely of foods containing these elements and a very small quantities: therefore the yards, orchards, meadows or gardens overrun by field mice are among the best friends of man, but on the other hand in thickly settled regions comparatively free from rabbits and mice both have to be summarily dealt with.
