This Year's Christmas

Never has there been a time when the Christmas event stood under so impressive illumination as it does in this year's Christmastide. The birth of Jesus is this year a larger fact for the thought and life of the world than in any year till now. The phenomenon of the life of Jesus and his power in the world forms the summit question in the thinking of our times. Chough there are some mournful defections from the divine truth of the manger event, the aggregate state of Christendom exhibits the ever enduring power of the grace that then and there came to seek and save the lost. No period has ever seen such wide circulation and study of the Boly Scriptures as the present, although recent events have demonstrated the still existing need of closer adherence to the divine principle of "peace on earth, good will to men." The evangel of a Saviour come thrills more hearts this Christmas than in any other year of this dispensation.
