of its surplus stock. We are not afraid to admit that we have more goods on hand than our factory should have, but it couldn't be helped. As you know, conditions since last summer could have been a great deal better all over the world. Besides, look at the weather we've had. Whoever heard of a blizzard on Easter Sunday, excepting in 1915. So people who usually buy Spring clothing early have not as yet felt the need of light veight garments. Consequently, our factory's surplus stocks that were made to fill duplicate orders with, are still on hand. Here's where history repeats itself. Similar conditions prevailed last year-when we held a MID-SEASON SALE and sold

Food poisoning according to the ablest physicians and health experts, is the cause of nine-tenths of the diseases that handicap the human race. The walls of the small intestines are lined with mill ions of small veins which take up nourishment from the digested food. From these veins this nourishment is poured as a part of the blood into the heart and distributes though the arteries to every part

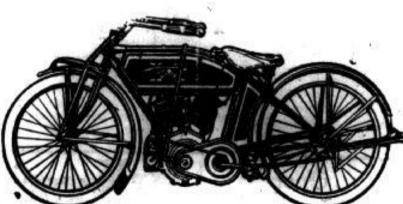

of the body.

Keep your stomach healthy by eating more Goetz's bread instead of so much meat and other heavy foods. You get all the nourishment the body requires without loading and clogging the system with indigestible and poisonous food.
