POSTOFFICE LEASE

ASKED FOR BY DEPARTMENT AT WASHINGTON - NOTICE POSTED

Five or Ten Year Contract Required - This is Usual Form of Procedure - Does Not Indicate Present or Prospective Change of Location

The present lease on the location of the South Manchester postoffice will expire November 1, 1915 and the postoffice department is calling for bids for postoffice purposes under a lease for five or ten years, as may be agreed upon. A postoffice inspector was here yesterday and posted a notice in the postoffice to this effect.

The building where the South Manchester postoffice is presently located is owned by George W. Smith, who operates the shoe and clothing stores in the building. The property was previously owned by Mrs. Sarah G. Cheney and from her the government secured the lease under which it is operating at the present time.

The requirements of the department are that the building must be located in the business center, that it should be at least 3,200 square feet of floor space, must have plenty of windows for light and ventilation, must be heated in winter and lighted at all times when necessary.

The postoffice features in a leased building are supplied by the postmaster and must be maintained by him. In buildings owned by the United States government the postoffice department furnishes the office equipments.

The government is very arbitrary in the matter of leasing buildings for postoffice purposes. Notwithstanding the terms of a lease whether for five or ten years, the government can at any time terminate the lease for postoffice purposes at will. The owner of the building is held to the contract but no contract of this sort can retain any value unless it is a law unto itself and does things to suit his own will.

The postoffice has been in its present location since the building was erected and the calling for a new lease does not indicate by any means that there is to be any immediate change in location. It is simply one of the rules of the department that all postoffices not located in federal buildings must be secured by lease for a term of five or ten years, and then let the government to what it chooses to do with the building.

WANT FIRE PUMP

The fire commissioners of Mystic Inc. Fire Commissioners inspect La France Auto Pump

The fire commissioners of Mystic Inc. were in town yesterday looking over the automobile apparatus of the South Manchester Fire Department. In the presence of Chief Mason Manning of the Mystic fire department, and Commissioners John Kreter, William L. Main and J. W. Lathrop. They first inspected the temporary headquarters of the La France apparatus at 4 where they inspected the La France auto pump of the company. The commissioners and citizens of Mystic felt the need of water at that fire and a recent meeting of the fire department the commissioners were given authority to expend \$8,000 on a pump and apparatus. The commissioners intend to visit several cities of the state where there are pumping apparatus and later may place their order.

While in town they also visited the headquarters of Hose & Ladder Company No. 1 and were shown the excellent equipment of that company and the commissioners expressed considerable surprise that such an adequate and up-to-date outfit could be found in a town of the size of South Manchester. Early in the afternoon they started for Hartford where they inspected the pumping outfits of the several companies of that city and returned to Mystic last evening.
