We use the best strong spring wheat flour obtainable. No guess work about it. We do not take the Miller's word for it. We use the best, because we know. We make sure, by testing the flour in our laboratory. We set a standard what a flour should be, and reject it, if it does not reach that standard. Then we use good yeast, handle the dough carefully and bake it thoroughly. Because of its lightness and tenderness and perfect digestibility, Goetz's bread is the most nutritious of all foods.

The Present Reign, the House of Ha over, Started With George I. The use of surnames was introd into England by the Normans and for a long time were used only by the nobility. The earlier kings, therefore, had no claim of any sort to a family name, but are often designated by some quality, as Alfred the Great, Edar the Peaceable, Edward the Martyr,

Kings do not have family names which exactly agree with those of common people, their titles or estates more often giving them what corresponds to a surname. The kings from William he Conqueror to Stephen (1006-1154) were of the Norman line. The Plantagenets received their name from the adoption by Geoffrey, Count of Anjou, of the broom (plante de genet) as an insignia. This name was borne by the kings from Henry II. to Richard II.

The Tudor line, which includes the rulers from Henry VII. to Elizabeth (1485-1603), received their name from Owen Todor, a Welshman, who married the widowed queen of Henry V. and whose grandson was Henry VIL The Stuart line includes the rulers from James I. to Anne (1006-1702). Concerning Class Clubs

THE more fortunate classes of our rich men can find beautifully apsary money and influence, they can acquire membership. They are welcome at all the better hotels, restaurants, and cafes, and s general air of privileged respectability appears to exist as to both places and the people one meets there.

No one ever thought of depriving the rich man of his club. No one ever thought of denying him the privilege of drinking just what he wants in these clubs. The hotel or high class restaurant which does not furnish stimulating beverages to its patrons has a hard time in its struggle for existence.

Goetz's bread is made from strong spring wheat flour, because strong spring wheat flour makes the best bread. You cannot make good bread from poor weak flour, nor can you make good bread by using poor yeast or handling the dough carelessly or by half baking it.

We use the best strong spring wheat flour obtainable. No guess work about it. We do not take the Miller's word for it. We use the best, because we know. We make sure, by testing the flour in our laboratory. We set a standard what a flour should be, and reject it, if it does not reach that standard. Then we use good yeast, handle the dough carefully and bake it thoroughly. Because of its lightness and tenderness and perfect digestibility, Goetz's bread is the most nutritious of all foods.
