What ALPHA POTASH-LIME FERTILIZER is:

This new Potash fertilizer is a by-product of the cement industry. Until now this valuable plant food has escaped in the gases from the mills. It has been found most beneficial to the farms in the neighborhood of the mills. The Alpha Portland Cement Company has recently perfected

a process by which the potash is saved. ALPHA POTASH-LIME FERTILIZER contains from 61.2% to 12% total Potash—21.2% of which is soluble in water and quickly available to plants. This potash is in the form of Sulphate.

ALPHA POTASH-LIME FERTILIZER also contains at least 30 % of soil-sweetening LIME—invaluable to all acid soils. ALPHA POTASH-LIME FERTILIZFR is very finely powdered. It will pass freely through a 200-mesh screen, containing 40,000 holes to the square inch. This increases its plant food value since it makes the Potash more quickly available to the growing crops.

In carload lots—Bulk . . . \$12.00 per ton of 2000 lbs. In carload or less—Bagged . \$15.00 per ton of 2000 lbs.

These prices are F. O. B. Alsen, New York Central R. R.,
