Chasing U Boats With Sea Slugs A SEA SLUG, British Service Name For Crews of Submarine Chasers.

Copyright, 1917, by the Bell Syn dicate, Inc. The author of this series of four articles is a young American, who has spent most of his time since the war started with the British patrol fleet, taking an important part in helping to organize

that branch of the service known as the Sea Slugs (submarine chasers). He has accumulated a remarkable collection of anecdates incident to this exciting branch of the service, and many of these were personal adventures in which he took part and which make one of the stirring narratives to come out of the war. He recently returned to the United States to assist the American navy in organizing the same branch of the service and should be of great value because of his experience abroad. So far as known he is the Class only American scho served with the British patrol prior to the advent of our destroyer flotilla in British waters. Of course some of his experiences, of military value to the enemy, cannot be related. At the request of the service

quality of the garments we sell that the continuation and success of our business depends. And when we voice quality we include everything that constitutes high class clothes, such as materials, fast colors, tailoring, fit, wearing qualities and low prices. Combining these essentials therefore they are always sure to wear splendidly. This is why every mother who has bought one of these suits in the past for her boy always comes back here to get another one of the same kind for him when the first is worn through.
