Music A War Time Necessity

It is natural during times like these to conserve everything we can in order to devote our facilities to the production of goods needed in the prosecution of the war. This brings up the question of what lines constitute "essentials" and "non-essentials".

If entertainment is not necessary, why should the Government go to the expense of putting in theatres at each camp? Entertainment must be provided for men who are to do the fighting "over there". Entertainment must be provided for the ones who are fighting at home. And music is the best entertainment. Now as never before every home needs a Piano.

Our Midwinter Sale makes it Possible for every home to have one with very little out lay. Sale is now on but lasts only ten days. If you are interested in a Piano or Plan to buy one during the next twelve
