SELECTMEN WILL CONSERVE LIGHT

All Street Lights To Be Extinguished At Midnight. The board of selectmen held an earnest discussion at their meeting Monday evening regarding the conserving of electric lights and thereby affecting a saving of coal. It is understood that the Manchester Electric Company is agreeable to a curtailment of the street lights at this time in order to follow out the plan of saving coal and it is not expected that any friction will arise from the plan, although the company and town have a contract for furnishing of street lights which will run until next fall. According to the plan of the selectmen the first step would be to burn but one light on each of the white way standards. Under the present street lights are burned from early standards. Under the present arrange-ment was a result there has been considerable of a demand created for these heplers to win the war for Democracy.
