Hugo Lauterbach Fred G. Schuetz William Wetherell John T. Hildebrand PICTURE OPERATORS MAY CONTINUE WORK A decision has been announced by the war department whereby moving picture operators are exempt from the selective draft and therefore may continue their work uninterrupted in so far as war movements are concerned. This information will be received with much exultation by many admirers of the silent drama as it has been aptly termed. It was understood here last week that Harold Germaine of the Circle Theater would have to abandon his present position there as operator, under the | \$1.75 Straw Hats now. essential industry.

"Fight or Work" order, and seek some sort of employment which the U. S. government considered to be an \$ \$3.50 Straw Hats now..... John F. Sullivan, the owner of the Circle Theater and of the Park Theater in South Manchester, was more or less disturbed by the situa tion which confronted him in the matter of securing an operator for the Circle Theater. The decision of General Crowder issued last week removed this disturbance and therefore there is to be no change for the present at least in the operation of either of the local moving picture houses. The doors will be open to 0000000 the public afternoons and evenings the same as heretofore and there will be no interruption with reference to the entertainments, As explained in these columns last week H. Phaneuf, the efficient operator and manager at the Park theater was rejected owing to the fact that he was under the prescribed height. The war depart-

These conclusions, if fair and just, are matters of ser-

ious concern not only to those engaged in the meat

packing business but to every other citizen of our

The figures given on profits are misleading and the

statment that the packers have a monopoly is unsup-

The packers mentioned in the report stand ready to

The meat business is one of the largest American in-

dustries. Any citizen who familiarizes himself with

The report states that the aggregate profits of four

large packers were \$140,000,000 for the three war

This sum is compared with \$19,000,000 as the average

annual profit for the three years before the war, mak-

ing it appear that the war profit was \$121,000,000

This compares a three-year profit with a one-year

profit-a manifestly unfair method of comparison.

It is not only misleading, but the Federal Trade

Commission apparently has made a mistake in the fig.

The aggregate three-year profit of \$140,000,000 was

earned on sales of over four and a half billion dollars.

It means about three cents on each dollar of sales-

Packers' profits are a negligible factor in prices of

live stock and meats. No other large business is

Furthermore-and this is very important-only a

small portion of this profit has been paid in dividends.

The balance has been put back into the businesses.

It had to be, as you realize when you consider the

problems the packers have had to solve-and solve

To conduct this business in war times, with higher

costs and the necessity of paying two or three times

the former prees for live stock, has required the use

of two or three times the ordinary amount of work-

ing capital. The additional profit makes only a

fair return on this, and as has been stated, the larger

portion of the profits earned has been used to finance

or a mere fraction of a cent per pound of product.

conducted upon such small margins of profit.

quickly-during these war years.

prove their profits reasonable and necessary.

Winsome Childhood.

The growing child frankly finds himself the most interesting person in the world, and we forgive him to some extent and attempt to show him that he must conceal his personal liking for himself. Some of us may recall the story of the little boy who had been a delightful listener while his mother (real bore) told the neighbors of his cute little manners and ways.

Owis and other birds which are active at night show a rise of temperature at night show a rise of temperature during the hours of darkness and a fall during the day. erated around the pattern. The most row our ball whenever it is not in ree." nurses' quarters.

PREPARES NOW

Red Cross Division Allots 800,-000 Pairs of Socks and 185,-000 Sweaters to Chapters.

Wool Used Sparingly; Substitutes Employed Wherever Possible-Call for Volunteer Service in . Workrooms.

Foreseeing the great needs of the coming winter, the Atlantic Division of the American Red Cross has instructed all chapters within its jurisdiction to speed up production. Calls for greatly increased volunteering upon the part of women, in conse-

quence, have gone out. Next winter our soldiers and sailors will need more socks, sweaters, wristlets, mufflers, belmets and so on, than ever before, and the Red Cross does not intend to be caught short-handed. Chapters in New York, New Jersey and Connecticut have been allotted the task of making 800,000 pairs of socks and 185,000 sweaters to be available early in autumn. Work on surgical dressings, hospital and refugee garments must not lag as a result of

this allotment. Women will be asked to come more and more to the workrooms. Those who have been able to give little or none of their day to the Red Cross will be urged to consider seriously the acrifice of other interests.

Military Needs Come First. In the meantime, the Red Cross is only using wool for articles the making of which absolutely require it. Substitutes are being employed cisewhere, for the shortage of wool has become such a serious matter that the Red Cross is undertaking, among its other activities, the reclamation of discarded garments and the refurbishing and repair of the winter uniforms of soldiers so that not an inch of this valuable product shall go to waste. While the War Industries Board has ruled that in the distribution of wool the military needs of the nation must irst be met, it has further ordered

In order that there may be no wastage through unco-ordinated buying, the Department of Supplies at national headquarters of the Red Cross in Washington will, in future, hold itself inyers of heavy fabric in one opera- to Chapters. Meat Must Be Sold

Fresh meat is perishable. must be sold within about two weeks for whatever it will bring.

A certain amount o beef is frozen for foreign shipment, but domestic markets demand fresh, chilled, unfrozen beef.

Swift & Company cannot increase prices by withholding meat, because it will not keep fresh and salable for more than a few days after it reaches the market.

Swift & Company cannot tell at the time of purchasing cattle, what price fresh meat will bring when put on sale. If between purchase and sale, market conditions change, the price of meat must also change.

The Food Administration limits our profit to 9 per cent on capital invested in the meat departments. This is about 2 cents per dollar of sales. No profit is guaranteed, and the risk of loss is not eliminated.

As a matter of fact, meat is often sold at a loss because of the need of selling it before it
