Why Compare Beef and Coal Profits?

Swift & Company has frequently stated that its profit on beef averages only onefourth of a cent a pound, and hence has practically no effect on the price.

Comparison has been made by the Federal Trade Commission of this profit with the profit on coal, and it has pointed out that anthracite coal operators are content with a profit of 25 cents a ton, whereas the beel profit of one-fourth of a cent a pound means a profit of \$5.00 a ton.

The comparison does not point out that anthracite coal at the seaboard is worth at wholesale about \$7.00 a ton, whereas a ton of beef of fair quality is worth about \$400,00 wholesale.

To carry the comparison further, the 25 cent profit on coal is 31/2 per cent of the \$7.00 value.

The \$5.00 profit on beef is only 11/4 per cent of the \$400,00 value. The profit has little effect on price in either case,

price of coal. Coal may be stored in the open air indefinitely;

beef must be kept in expensive coolers because it is highly perishable and must be refrigerated. Coal is handled by the carload or ton; beef is deliv-

ered to retailers by the pound or hundred weight. Methods of handling are vastly different. Coal is handled in open cars; beef must be shipped in refrigerator cars at an even temperature.

Fairness to the public, fairness to Swift & Company, fairness to the packing industry, demands that these indisputable facts be considered. It is impossible to disprove Swift & Company's statement, that its profits on beef are so small as to have practically no effect on prices.

Swift & Company, U. S. A.

Wilson was shortly after we entered
the war. I had been summoned to
the great army headquarters to see
him, and when be entered the room
he appeared to be in a towering rage,
indeed, his condition was so apparent
that the kaiserin, who was also present, sought to excuse him with the
explanation that he had been very
much upset and had been sleeping
very poorly, and she asked me to treat
him gently and tried to soothe him

Jou!

We accordingly entered a very large
sitting room. The empress, in a negitgeo of her favorite royal purple, entered and shook hands with me cordially. She looked very worn, and it
was plain that she had been suffering
considerable pain and loss of sleep.
She had a handsome figure and was
stately in her carriage, but her crowning glory was a profusion of white
half. She was then fifty-four years old,
but her hair had turned white many
years before.

Jou!

It that she seldom spoke on other subiting room. The empress, in a negitgeo of her favorite royal purple, entered and shook hands with me cordially. She looked very worn, and it
was plain that she had been suffering
onsiderable pain and loss of sleep.
