English Prints Head Procession of Fabrics for General home dressmaker, for it is possible to buy all such by the yard, ready to Utility Outfits.

RUFFLES MUCH IN EVIDENCE

Frills Are Featured on All Summer row valenciennes lace. One of the Dresses-Such Decorations May most charming summer dresses of this Now Be Bought by the Yard.

The time is at hand to consider the inch hem. The waist, or shirtwaist cotton frock. All of us have a notion, writes a fashion correspondent, that summer dresses are easy enough to make, and so they are; but since such attractive ones, needing slight alteration, can be bought, few of us do. Indeed, I sometimes think that home dressmaking has vanished almost entirely, especially in large cities where everything can be bought ready for immediate wear. Perhaps there will be a revival this summer, since the demand for knitting and sewing for the soldiers is not so urgent and wemen can turn their attention to former occupations. I find a basis for this thought in the vast number of hand made and embrotdered, befrilled and bestitched dresses I have seen, not only for children but for grown-ups as well. Heading the procession of cotton tabrics for general utility frocks come

the English prints. They reveal the same quaint and old-fashioned designs of calico, but are of finer texture and cost very much more-95 cents a yard-those really from Great Britain. For the most part the prints are made up in the plain shirt waist effect, with some frills of linen for collars and cuffs and a bit of ornamentation down the front of the blouse. As the material is substantial in texture and well covered by the quaist designs over the surface little trimming is needed, and there is not much that can be successfully combined. Plain linen collars and cuffs and small hemstitched trills of white to relieve the monotony are about the only really good things to use. Belts of patent leather or of the material finish the waist.

An Interesting New Color. One of the new colors is a queer sort of brick yellow red background with very tiny yellow flowers scattered thickly over the surface. It seems to Frocks of White Volle With Filet ways from Aleppo, from North and me this sort of material calls for oldfashioned companions such as ric-rac braid and piping. I observe many in plainness, has a deep wide fichu of is a mere shadow of that which made destructible voiles and georgettes cream net and valenciennes lace, her great in the past, and of that with printed designs trimmed with crossing after the Marie Antoinette which the future has in store for her, pointed scallops exactly like the ric-rac fashion in front and extending in she remains a collecting and distrib-

has a big hand, and a bony one. He carries it leosely on his wrist. It is not a beautiful hand, as an artist counts beauty; but it is true that mere beauty does not often go with the very highest character. The man who possesses this

large, angular, knobby, capaclous hand never tells a lie. Moreover, he will not pass a misstatement or an exaggeration. It is this exactitude which makes him a scientist, even if his opportunities have never allowed him to study.

If the hand is not only large, but, instead of being knobby and angular, is smooth and inclined to be fat, it belongs to quite another kind of person.

You will see that kind of hand belonging to the well-contented person opposite you at a pube dinner, who is always cal ing for the wine list, and scanning the menu, for fear he may be inadvertently missing something good.

The hig, smooth hand is capacious. It is apt to be rapacious. It is the hand of mammon.

MAY RESUME OLD POSITION Why Mosul, as a Consequence of War, Expects to Regain Her Com-

mercial Importance.

Mosul, the capital of the Turkish vilayet of the same name, once the thriving center of Mesopotamian trade, now exhibiting all the signs of decay, forsees a brilliant revival of her commercial activity owing to her advantageous position on the famous profected railroad line from Constantinople to the Persian gulf. At present the falling off of her trade, so farreaching during the middle ages, when the name of the city was given to one of her chief products, muslin, has been made up to her, in some measure, by greater picturesqueness of aspect. Here indeed is the very heart of the Orient: Mosul, with its narrow, crooked streets, swarming with a population decked out in all manner of gandy misfit: its curious-looking coffee houss; its vociferous bazaars; its great nosque of Jami el Kebir. The high-West Persia and from Bagdad meet at Mosul: and though today her trade ose, overlapping loops in the back, uting center, and heavily laden cara-
