# One way to reduce carbon trouble

Heavy carbon deposits in the combustion chamber and on piston heads cause lots of engine trouble ranging from pre-ignition of the fuel charge to the destruction of the lubricating oil. This can be avoided. With uniform, high grade gasoline that possesses even vaporizing and ignition qualities, carburetion can be so perfectly regulated that the fuel charge is burned up completely, leaving a minimum of carbon deposit.

SOCONY Motor Gasoline meets every motor fuel requirement. It is carefully refined to a definite standard of nigh quality. It is as uniform as modern science can make it. Its carburetion and ignition qualities assure dependable wer under all weather conditions. Standardize on SOCONY for motoring economy and satisfaction.

At filling time look for the red, white and blue SOCONY sign EVERY GALLON THE SAME
