## In Tire Building Penguin, who was now her mate,

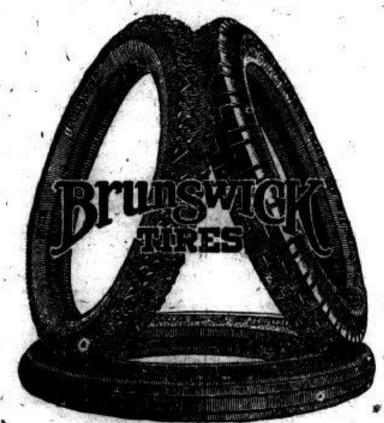

A tire-maker's first problem is to decide how much he can give for the money. This, and every other question in tire uilding, depends upon policies.

A super-tire, such as The Brunswick, can be made only by a concern which knows well and appreciates that there is nothing exclusive in the tire industry except high standards. Since 1845 the House of Brunswick has held first place in

every line it entered. Brunswick Tires, as more and more motorists come to know them, will certainly be awarded that coveted place held only by the superfine. Motorists who buy one Brunswick usually adopt it for complete equipment. Yet this is not strange, since the first, one so completely proves its superiority.

If the name of Brunswick certifies to you, as to most mer en extraordinary tire, at no higher price, would it not be good business to test one or two Brunswick Tires?
